Quick Adworkmedia Cash

So everyone does PPD and it's getting saturated and harder to use. I've used a method on and off to generate a little income that's recurring. I haven't put that much effort into it so I don't make that much but I still get some okay money from it.

- 1) Go to [Adworkmedia](#) and create a new account
- 2) Generate a referral URL + banner
- 3) Find internet marketing related FB group, G+ groups, FB pages and even forums
- 4) Post on the forums offering tips and tricks if they signup under your referral link.
- 5) Put the ref link in your signature and post around a lot.
- 6) Create a Skype group dedicated to PPD where your referrals can discuss.

The key to this is teaching and motivating your referrals to make money. The more they make the more you make. If you can get 10-15 referrals and talk to the daily, keep them motivated and link them to tutorials and get them earning you can make a killing. At 10 referrals you'll get around 10% of there earnings. If each of them is making \$20 daily you'll make \$2 off of each of them and you'll be making \$20 daily as well. The more people you have under your ref link the better.

I remember a while ago some guy had a few hundred referrals and was making an absolute killing without doing any actual PPD.
