Thread: [How to use kik "fake camera" on Bluestacks/MEmu - Gallery -> Camera](#)

Fortunate - May 21, 2016, 2:12 pm

How to use kik "fake camera" on Bluestacks/MEmu

Hey guys. I've seen a lot of people ask how to use fake camera on bluestacks/memu, so I decided to make a tutorial on it. Hope you enjoy.

1. Firstly, [download Bluestacks](#) or [download MEmu \(recommended\)](#) if you haven't already.

2. When in bluestacks/MEmu, go to the app store and download an application called "Fake camera"

It should look like [this](#)

3. Go [here](#) and download version 7.2.2.99 of kik messenger.

It should look like [this](#)

4. Open the .apk file and Bluestacks should automatically install it. If nothing happens, go to BS/MEmu and click the "Install apk" button.

5. You're done! When you want to send a picture, press the + sign and choose camera. Then pick from Windows/MAC and select the image you want. [It should now show up as taken with a camera.](#)

You should do it like [this](#)

To add Images to Memu, there should be a folder located somewhere in your PC called "Memu gallery" or "Memu pictures" so you will have to copy your pack there first.

If you encounter any problems, check the "Known Bugs" spoiler below or PM me or post in this thread for help.

Hope you enjoyed this tutorial, good luck!

Known Bugs ([Click to View](#))

If the Kik app glitches to the point it is unusable, it means your Android version is 6.0 or higher. You either have to downgrade or use a modded Kik.

Fake camera is glitching? = Reinstall/Restart Bluestacks or try another fake camera application.
Autoupdates? = Unable auto updates in the Play store

Other trouble? = If you tried all of the ones above, try installing memu instead of bluestacks. Or post here or PM me.

Please report bugs to me.

Witnessed - May 21, 2016, 2:16 pm

Thanks man! Really appreciate the help

Fortunate - May 21, 2016, 2:16 pm

(May 21, 2016 02:16 PM)Witnessed Wrote: [\[CITE\]](#) Thanks man! Really appreciate the help
No problem, glad i could help someone ?

Purplexcite - May 21, 2016, 7:03 pm

Thanks for this OP. I was really confused on why I couldn't send any fake pictures, but this tutorial really helped me!

kezikarma - May 21, 2016, 7:16 pm

Nicely written, thank you!

Stoke - May 21, 2016, 7:18 pm

Simple tutorial and will hopefully stop all the threads asking how to do this.

Nice.

Fortunate - May 22, 2016, 12:03 am

Thanks for the feedback, glad i could help someone out ?

DooSaM - May 22, 2016, 3:13 pm

When I try to install version 7.2.2.99 it say App Installation Failed Downgrade any idea what I need to do?

Nvm I just had to uninstall the version I already had figured this was the case after I posted here.
Thanks for the tutorial OP!

Fortunate - May 23, 2016, 9:34 am

(May 22, 2016 03:13 PM)DooSaM Wrote: [\[CITE\]](#) When I try to install version 7.2.2.99 it say App Installation Failed Downgrade any idea what I need to do?

Thanks for the tutorial OP!

Yes, indeed. Just remember to have the older version uninstalled before installing anything again! ?

SkinX - May 23, 2016, 9:42 am

Add some pictures and it'd be a pretty good tutorial :)

It all seems okay tho, just would be nice to have some pictures :)

Drug Problems - May 23, 2016, 9:44 am

Pretty decent tutorial man

fast and clean stay HQ!

Fortunate - May 23, 2016, 9:45 am

(May 23, 2016 09:42 AM)SkinX Wrote: [\[CITE\]](#) Add some pictures and it'd be a pretty good tutorial :)

It all seems okay tho, just would be nice to have some pictures :)

There are pictures, just click the links.

In the e-whore section pictures won't show if you won't click on them.

I think it has all the pictures needed, what more should i add tho?

(Oct 2, 2016 10:28 PM)chefharambe Wrote: [\[CITE\]](#) When i install kik, it doesnt show in bluestacks?
Be sure to click the .apk file and it should install it. Can you be more specific? If it does that it should be in there with other apps. Be sure you have the old kik removed. Any version of kik should be removed before installing a new one. Hope i could help.

(Oct 2, 2016 10:01 PM)RainGaming Wrote: [\[CITE\]](#) Does fake camera still work on a normal phone without bluestacks and an outdated kik?

I'm pretty sure it works on some occasions or jailbreaks.

Bumping this thread as a lot of people are asking for help regarding fake camera and kik since Modded kiks are always getting patched.

Fortunate - October 31, 2016, 9:39 am

(Oct 31, 2016 08:42 AM)Oedipus Wrote: [\[CITE\]](#) Bumping this thread as a lot of people are asking for help regarding fake camera and kik since Modded kiks are always getting patched.

Thanks man. Really appreciate this ?

Constantia - October 31, 2016, 9:49 am

If the Kik app glitches to the point it is unusable, it means your Android version is 6.0 or higher. You either have to downgrade or use a modded Kik. Just for future reference, took me a while to figure this out.

Fortunate - October 31, 2016, 10:02 am

(Oct 31, 2016 09:49 AM)Constantia Wrote: [\[CITE\]](#) If the Kik app glitches to the point it is unusable, it means your Android version is 6.0 or higher. You either have to downgrade or use a modded Kik. Just for future reference, took me a while to figure this out.

Added to "Known Bugs" Thanks.

Have you tried reinstalling? Also try memu, It's mire stable, but bluestacks is fine as well. Hope this helps!0

Hmed - November 13, 2016, 12:23 am

(Nov 11, 2016 11:22 PM)Fortunate Wrote: [\[CITE\]](#) Have you tried reinstalling? Also try memu, It's mire stable, but bluestacks is fine as well. Hope this helps!0

Yeah reinstalled kik and fakecamera plenty of times still the same

kushkaripordhi - November 13, 2016, 2:32 am

Nice tutorial,I'm sure it will help the beginners ?

Fortunate - November 13, 2016, 11:30 am

(Nov 13, 2016 01:23 AM)Hmed Wrote: [\[CITE\]](#) Yeah reinstalled kik and fakecamera plenty of times still the same

I'd go with MeMu. Solved a lot of problems for me.

Fortunate - November 16, 2016, 9:39 pm

Bumping this thread in case anyone needs this!

DanDaniel - November 18, 2016, 10:54 am

This worked great for a few days. I'm running kik v 6.8.0.61 on BlueStacks. Older versions would not load, it seems like they can't even connect to the kik servers, because I can't get past the login screen. Now this version also stopped working all of a sudden. I never reset or logged out, but when I try to open it on BlueStacks it shows the loading screen then it quickly returns to the BS home screen.

Anyone else having the same problem or any idea how to fix it?

Thanks!

Fortunate - November 20, 2016, 8:12 am

I haven't used Lynx in a long time, but I'm sure there's a folder called Lynx pictures (or something in similar) on your PC where you can import images. You can disable your camera, but as long as you're not taking any pictures with it you are safe.

DConny1 - February 1, 2017, 1:25 am

Thanks

Somewhere in your PC there is a folder called "Memu pictures/media" where you have to put your pictures in. You can also locate the folder in your Memu settings.

For me memu automatically put it on my pictures folders.

Fortunate - August 24, 2017, 11:10 pm

Are you using Memu or Bluestacks?

So you are having problems selecting the photo for fake camera or?

calv4554 - September 8, 2017, 1:14 pm

Hey, thanks for the tutorial. I feel like no matter what I do, I cant get a fake cam to work. First, I've tried K+, Night, and Lynx all with Bluestacks, Nox, MEMu. I've tried the combination of all of them, and no matter what, it says camera for me, but on their side, it says gallery. I saw one or 2 other posts about this today with people saying the same thing, so maybe it's just bad timing and bad luck on my part, and they just patched it. So I tried your tutorial. When i get to: "5. You're done! When you want to send a picture, press the + sign and choose camera. Then pick from Windows/MAC and select the image you want. It should now show up as taken with a camera." in KIK, when i click the camera, 2 options come up for me, both "camera" and "fake camera", then i choose fake camera and select a photo, but again, on my end it says camera but on their end it says gallery. But it doesn't happen like your step 5 happens where it goes right to "choose from windows"...I first have to select "fake camera". Not sure why. Any help appreciated. thanks.

First, I've tried K+, Night, and Lynx all with Bluestacks, Nox, MEMu. I've tried the combination of all of them, and no matter what, it says camera for me, but on their side, it says gallery. I saw one or 2 other posts about this today with people saying the same thing, so maybe it's just bad timing and bad luck on my part, and they just patched it. So I tried your tutorial. When i get to: "5. You're done! When you want to send a picture, press the + sign and choose camera. Then pick from Windows/MAC and select the image you want. It should now show up as taken with a camera." in KIK, when i click the camera, 2 options come up for me, both "camera" and "fake camera", then i choose fake camera and select a photo, but again, on my end it says camera but on their end it says gallery. But it doesn't happen like your step 5 happens where it goes right to "choose from windows"...I first have to select "fake camera". Not sure why. Any help appreciated. thanks.

Kik is currently having problems sending live pics, it's not just you.

This would be a good opportunity to take advantage of not having it and just sending gallery pics with the excuse that live pics arent working.

Yeah thanks, already thought of this. It's hard to convince someone who is already skeptical that the app is having problems, though. they ended up just asking me to send a pic doing a certain thing with my arms :/
