LOSE WEIGHT FAST!

This is a completely unique and original eBook completely written and produced by me.

You will lose about 1 lb. per week by following this eBook. Which is actually a very big amount of fat to lose, considering you'll be losing 1 lb. every week! You'll learn everything inside the eBook. I make it very clear with pictures and designs.

Google pictures of what 1 lb. of fat looks like and that's actually how much FAT from your body you will burn each week!

I am a fairly new member so I can't post links, pictures, or videos until I have 50 posts. Right now I have less than 50 or else I would have made a nice thread design. For now I'm settling with just this text.

I will be giving out only a few review copies to official reviewers. PM me to review this eBook, it will be a first come first serve basis, sorry if you don't get a review copy!

This eBook is easy to read and easy to follow. It's 18 pages, very nice designs, detail, and very easy to read and understand the information you pay for.

I offer support on HF via PM, or IM, ect. FOR LIFE to every member that buys my eBook. PM me for buying resale rights

The price is \$6.99 via PayPal. Please post here or PM me for any questions or to purchase. Thank you. If you have any questions please ask me in this thread, I will get back to you ASAP.

I received my vouch copy.

Design - The design of the eBook caught my attention almost immediately; bright colors, custom images, and effort that paid off in my eyes.

Grammar - I saw one misplaced ")" but I'll let it slide. Clearly someone that knows how to read and write using the English language.

Contents/Details - This eBook surprisingly blew me away with the contents. 16 full pages of detailed information. Simply put, this eBook teaches you how to lose weight.

Overall: 10/10 - This is a fantastic eBook, I honestly would describe it as \$7 to change your life. The detailed guide explains everything involved with losing weight, and how to do it. For only \$7, this is one of the eBooks I wouldn't regret buying on HackForums.

Hey, I notice that you're ub3r status. Do you know if there's a certain group that does eBook reviews?

The 3 main ranks:

-L33T

-UB3R

-3P1C

Are donation ranks (you must be approved for UB3R). I'm all three, but I choose to show the 3P1C for whatever reason.

I don't think there's a group that is focused on eBook reviews, but I guess Echo is your best bet as they advertise themselves as business savvy.

Since you replied so quickly, you have l33t, ub3r, and epic, and you seem like a good candidate I have sent you 1 vouch copy. Please leave a nice honest review. Thank you.
