Here is the back story, I was looking to trade my £30 BTC as you can see here

<https://hackforums.net/showthread.php?tid=5277011> Dark

<https://hackforums.net/member.php?action=profile&uid=2025980> messaged me and said he can perform this trade. I got him to add me on skype then started a conversation, I asked for his Address intending to send straight away but as soon as i sent it he said Dont send it yet, I am going out for food. It has now been nearly 15 hours.

Note this can not be an impersinnator as he messaged me without commenting on my post

In my opinion OP you should have waited a bit longer to make a scam report as hes been offline since your deal and something could have came up. I'd understand if he was browsing the forum.

Update: He has been online on hf <http://prntscr.com/b73rtl>

I doubt he will scam as his account looks trustworthy.

Imao he has like 20 scam reports, why his rep isn't worse is beyond me, you have to be more careful next time. you will bounce back from this, although he won't since he really has to scam for pathetic amounts we should really feel sympathy for him. ?

Hope it gets solved, but don't deal with such a users with opened scam reports, or use a middleman.
