Thread: [\[Android\] Latest kik update with working fake camera + auto reply](#)

Flaming Hot Cheetos - May 22, 2016, 9:04 pm

Changed some stuff up, do avoid leechers this is for l33ts/ub3rs or regular users with positive rep

Post or PM me for this, it's an updated modded kik that has a working fake camera mod.

This came out less than a month ago so its guaranteed to work, but im not %100 sure about working on bluestacks

Edit: I also found a new kik that has auto reply feature + custom auto reply, It auto replies instantly after every message, not sure if this would be useful for anyone but you never know

The fake camera mod on Kik makes the receiver see it as gallery now, I got an updated modded kik that fake camera works on again

Sc00by - May 23, 2016, 4:03 pm

You could just use an old version of Pikek. It has a live camera feature built into it which works very well. It also doesn't pixelate your pictures.

di3g0_69 - May 29, 2016, 6:31 pm

If you're talking about K+ (or Kplus)

It's not working for me.

Intalled in Android 4.2.2..... didn't work (error while opening then it closes)

Installed in BlueStacks... didn't work (same error, not opening)

Installed in AmiDuOs (another android emulator) which has android 5.1.1.... didn't work (same error while opening)

So... no working modded kik yet I guess.

If there's another kik that have a working fake camera please PM the link.

Thanks.

Just use the old version of kik with fake camera. Boxy's guide has had it for ages.

Whallah! Problem solved, did you really need to make a thread to try to get free rep over something so easily done lmao.

thatfurryhacker - June 22, 2016, 12:55 pm

Not sure if this has been said or not, but K+ (devs from Pikek and Pikik helped create this) as well as the older versions of modded Kiks, usually before the hashtag update, still have working fake cameras. Be wary to test it out though, it might say camera on your side but then only say gallery for them. ?

kotzenfoppe - June 22, 2016, 1:21 pm

I tried K+ but it wont let me log in to my kik account.. :/

So is this the newest version of Kik and it works with fake camera, or is this the latest compatible version of it?

If it is the up-to-date version what are the changes?

is this a fucking joke? this post here or pm me bullshit is getting ridiculous. you are afraid of leechers for something that takes minutes to find on google? it isnt as if u have a goldmine of information. you are literally telling people what version to download.

For those of you who want it:
