Thread: [IPB Post Box doesn't show](#)

speedcheck - May 23, 2016, 2:12 am

Hello! I just installed Carbon Blue on my IPB. But when I try to post something the POST BOX doesn't even show up?!?!

Here is a picture of what I mean:

Try opening up the inspector tool, click on the console tab and see if there are any errors.

You couldn't find the console tab or you couldn't find any errors?

The issue is occurring only with this theme? Maybe the CSS for the box is messed up, in which case I'd have to look at the website myself.

I have checked your website and I found one error and two warnings.

Do you have any plugins installed?

Can you check if the issues occur with the default theme?
Have you changed anything in the core files?

I'm not sure what the hell it is, the deafult theam is working. But when I add the "Carbon Blue" on it doesn't work..

Edit: i just fixed the ipb carbon theme.

Have you tried leaving the theme with all plugins disabled?

Nvm, just noticed your edit. Would be good to mention how you fixed it.
