Thread: [agar.io](#)

jairjils - May 23, 2016, 3:27 am

does anyone know how to play agar.io on school? The stie blocks my connection or something. I've tried playing on hotspot shield but it laggs like a mf

Spoiler ([Click to View](#))

im bored..... so ye

Lexxi - May 23, 2016, 3:32 am

id suggest a proxy, though this is wrong section, should be in the vpn/ proxy section.

otherwise there are programs that auto set proxy/ allow through server. Best suggestion is to ask the proxy related section, best of luck :D'

simple google search around will help you find, or even searching in the HF search section, am sure many people have asked the q before :)

Try another DNS server, if that doesn't work try a proxy.

Amaa - May 23, 2016, 1:34 pm

Maybe use unblocker site?

R2-D2 - May 23, 2016, 1:36 pm

As already mentioned above I would suggest using a proxy or vpn. There are a lot of programs and tutorials for that. My school blocks vpns so I hope you are lucky.

M?tt - May 23, 2016, 1:37 pm

Don't they have this on phones now too? You should just play it on your cell phone if you have one.

iPwned - May 23, 2016, 1:38 pm

What works for me is if i choose another region. I can't play EU region servers only those in Asia and US(I live in EU).

It's laggy as fuck but funny.

Hash G. - May 23, 2016, 1:40 pm

Just get an URL which leads to a popular private server.

Scymo - May 23, 2016, 1:40 pm

download browsec and use that to play

Warbeak - May 23, 2016, 2:00 pm

Who plays agario when you could play slitherio or diepio?

But, as other people have said, choose a different region
