

Forum: [Hack Forums](#)

Thread: [\[The Brotherhood\]Toolkit for All Group Leaders/Owners \[RELEASED\]](#)

Cryptic™ - May 23, 2016, 2:21 pm

Over the past 2-3 years I've seen many people make threads in the

[Suggestions and Ideas](#) forum requesting better tools for group leaders / owners, and [Omniscient](#) is always busy with other stuff so it will probably be a long time before they are implemented.

In the mean time '[Remix](#)' is working on a Group Leader/Owner Enhancement Suite similar to HFES ([HF Enhancement Suite - 2 years strong - Making life easier for thousands of HF users!](#) by [Emylbus](#)).

It will be released sometime within the next 2 weeks and here are the features it will have:

Page that shows activity of members in the group such as:

- Posts in the group,
- Posts outside the group

A way to blacklist members so their never added to the group, (basically when a leader blacklists a group, it'll show on the members profile and all leaders can see it.

Highlight users on managegroup.php

Auto Accept/Deny/Ignore All Join Requests

Quick Add / Remove to group by visiting users profile

There are more features being developed that I don't want to mention at the moment.

It is now released.

You can install it here

<https://greasyfork.org/en/scripts/20989-group-leader-enhancement-suit>

Settings will be on this page after you install it:

<https://hackforums.net/usercp.php?action=options>

Don't forget to thank '[Remix](#)' for coding this.

I had a lot of the ideas and he brought them to life.

If you have any suggestions for this toolkit post them below and way may consider it.
Installation:

For the blacklist feature each group has to host their own API on a webserver

Name the file bl_api.php or whatever you want.

Here is the code for the API <http://pastebin.com/dWarXLhp>

also here is a copy incase the pastebin gets removed

PHP Code

```
<?php
```

```
error_reporting(0);
```

```
$output = [];
```

```
if(empty($_GET['action']))  
    die(json_encode(['missing action']));
```

```
$action = $_GET['action'];
```

```
if($action == 'add' || $action == 'remove') {  
    if(empty($_GET['uid']))  
        die(json_encode(['missing uid']));
```

```
    $uid = $_GET['uid'];
```

```
    if($action == 'add') {  
        if(!$handle = fopen('blacklisted_users.txt', 'a'))  
            die(json_encode(['unable to open file']));
```

```
        if(!fwrite($handle, $uid.PHP_EOL))  
            die(json_encode(['unable to write to file']));
```

```
    } else {  
        $content = explode(PHP_EOL, file_get_contents('blacklisted_users.txt'));  
        $after = "";
```

```
        foreach ($content as $val) {  
            if($val == $uid || $val == "")  
                continue;
```

```
            $after .= $val.PHP_EOL;  
        }
```

```
        if(!$handle = fopen('blacklisted_users.txt', 'w'))  
            die(json_encode(['unable to open file']));
```

```
        if(!fwrite($handle, $after))  
            die(json_encode(['unable to write to file']));
```

```
    }
```

```
    $output[] = 'ok';
```

```
} else if($action == 'read') {  
    $content = "";
```

```
    if(($content = file_get_contents('blacklisted_users.txt')))  
        $output = explode(PHP_EOL, $content);
```

```
}
```

```
die(json_encode($output));
```

Once you have that file hosted on a webserver all leaders of the group need to provide a link to that file in the 'blacklist URL' field on the settings page here

<https://hackforums.net/usercp.php?action=options>

All group leaders must use the same API link as it acts as a centralized database for each group.

Group Invitation Settings

The group invitation settings are for the add/remove buttons on users profile.

In the above picture, I can add Omni to the brotherhood with the click of a button, If Omni was in BH it would let me remove Omni

Under the 'Group Invitation' section of settings you must enter your groups info.

For example:

Group Name = The Brotherhood

Group ID = 54

Group Image Name/URL =

https://hackforums.net/images/modern_bl/groupimages/english/brotherhood.png

How to use the Activity Check feature are here

<https://hackforums.net/showthread.php?tid=5279669&pid=51327140#pid51327140>

FAQ:

I am a leader of multiple groups, can I still use the activity check feature?

Yes. Just pop in the thread URL and correct group ID.

How do I find my group ID?

You go to <https://hackforums.net/usercp.php?action=usergroups>

If you highlight the "View Members" button for any group you lead you will see

<https://hackforums.net/managegroup.php?gid=XX>

XX is your group id

ze-slade - May 23, 2016, 2:23 pm

Sounds pretty useful, the blacklisting part would actually be pretty nice since the owners wouldn't have to check the UID of each member if they got accepted.

Michael - May 23, 2016, 2:25 pm

Cryptic back at it again with the white Vans.

OT: sounds very promising.

Cryptic™ - May 23, 2016, 2:26 pm

(May 23, 2016 02:25 PM)?ichael Wrote: [\[CITE\]](#) Cryptic back at it again with the white Vans.

:)

A lot of the HFES features were my idea (like Pretty PMs), so I'm back at it again with the ideas. :)

Krave - May 23, 2016, 2:29 pm

This sounds sick, I will let you know if I have any suggestions.

Thanks for this!

Roytoy - May 23, 2016, 2:32 pm

As always The Brotherhood is being the HQ group that it is!

Krave - May 23, 2016, 2:32 pm

I also have the userscript to add/remove a user to the group from a button located on their profile, shown below.

It would be cool to add this into the toolkit as well. I have the code if you're interested, but I'm not sure who originally made it.

Compulsive - May 23, 2016, 2:33 pm

I dont know if there would be a way to implement this, but a check of members in the group that recently got warnings, bans, etc.

Cryptic™ - May 23, 2016, 2:34 pm

(May 23, 2016 02:32 PM)Krave Wrote: [\[CITE\]](#) I also have the userscript to add/remove a user to the group from a button located on their profile, shown below.

My erection is already fierce.

kawaii - May 23, 2016, 2:52 pm

Group leader interested in testing such features posting here.

glitchgxd - May 23, 2016, 3:04 pm

I was literally just working on something like this (GlitchKit as I was going to call it), to make group leader/owner administration easier.

The Fro - May 23, 2016, 3:05 pm

Nice work but I don't think I need something like this for my group. Good luck though!

zSerity - May 23, 2016, 3:11 pm

This sounds great and I can't wait to use it. ?

Cryptic™ - May 23, 2016, 3:16 pm

(May 23, 2016 03:05 PM)The Fro Wrote: [\[CITE\]](#) Nice work but I don't think I need something like this for my group. Good luck though!

Your not a current group owner or leader o_O

This script is for official groups only.

The Fro - May 23, 2016, 3:19 pm

(May 23, 2016 03:16 PM)Cryptic™ Wrote: [\[CITE\]](#) Your not a current group owner or leader o_O
Sorry, I don't see what that has to do with anything?

nique ta mere - May 23, 2016, 3:22 pm

I will be using this for my group.

Cryptic™ - May 23, 2016, 3:23 pm

(May 23, 2016 03:19 PM)The Fro Wrote: [\[CITE\]](#) Sorry, I don't see what that has to do with anything?
Well...first of all, you said you wouldn't use this for your group.

Second of all, since your not a current owner/leader you wouldn't really know how much the current tools suck.

Simple things like adding/removing users via their profile page or highlighting rows on the group members page make a huge difference and make things 1000x easier.

The Fro - May 23, 2016, 3:27 pm

(May 23, 2016 03:23 PM)Cryptic™ Wrote: [\[CITE\]](#) Well...first of all, you said you wouldn't use this for your group.

Thank you

I'm working hard on it

Mr Kewl - May 24, 2016, 10:05 pm

I think it'll be easier for you to do it when we upgrade to 1.8, nevertheless good luck.

Remix - May 25, 2016, 2:22 am

(May 24, 2016 10:05 PM)Mr Kewl Wrote: [\[CITE\]](#) I think it'll be easier for you to do it when we upgrade to 1.8, nevertheless good luck.

Most work will probably be the adjusting of the selectors (when hf was upgraded)

Shouldnt be a big problem

Undefined - May 25, 2016, 3:20 am

Pretty awesome stuff. So this will be a userscript megapack (along with all the tools for group owners/leaders)?

Remix - May 25, 2016, 3:39 am

(May 25, 2016 03:20 AM)Undefined Wrote: [\[CITE\]](#) Pretty awesome stuff. So this will be a userscript megapack (along with all the tools for group owners/leaders)?

No, just the tools for group leaders

Cryptic™ - May 25, 2016, 7:21 am

(May 25, 2016 03:20 AM)Undefined Wrote: [\[CITE\]](#) Pretty awesome stuff. So this will be a userscript megapack (along with all the tools for group owners/leaders)?

It will be a "megapack" of tools for group leaders/owners.

xVulnerable - May 26, 2016, 2:17 am

Nice! This actually looks very useful.

Bluffer - May 26, 2016, 2:20 am

Very cool idea Cryptic, good luck with this.

Cryptic™ - May 27, 2016, 1:33 pm

I just came up with another great idea for this toolkit.

Remix will start developing it tomorrow.

Code [2016-05-27, 4:30:45 PM] HF Cryptic: i got another idea for a userscript

[2016-05-27, 4:31:01 PM] HF Cryptic: Activity Check Plugin:

[2016-05-27, 4:31:17 PM] HF Cryptic: see my thread

<https://hackforums.net/showthread.php?tid=5281520>

[2016-05-27, 4:31:36 PM] HF Cryptic: i enter that link into the userscript.

[2016-05-27, 4:31:43 PM] HF Cryptic: the script gets a list of all users who posted in it from

<https://hackforums.net/misc.php?action=whoposted&tid=5281520>

[2016-05-27, 4:32:00 PM] HF Cryptic: then it takes me to this page

<https://hackforums.net/managegroup.php?gid=54>

[2016-05-27, 4:32:07 PM] HF Cryptic: and selects all the users that DID NOT POST in the thread.

[2016-05-27, 4:32:12 PM] HF Cryptic: so i can easily remove them all in one shot.

[2016-05-27, 4:32:14 PM] HF Cryptic: understand?

[2016-05-27, 4:32:23 PM] Michi | Remix: yeah

[2016-05-27, 4:32:31 PM] HF Cryptic: if u could have it built within 48 hours we can test it out and use it for this activity check. :D

[2016-05-27, 4:32:36 PM] HF Cryptic: beta testing ftw

[2016-05-27, 4:32:43 PM] Michi | Remix: alright

[2016-05-27, 4:32:47 PM] Michi | Remix: will start tomorrow with it

Mr Kewl - May 27, 2016, 1:37 pm

In the future it can be further developed so it searches for certain strings within each users post in the thread, like if you want each user to post a picture it can check if the post contains [img] tags , or youtube video [yt] tags, etc.

Krave - May 27, 2016, 1:45 pm

We got most of the features done, Remix is finishing it up. Maybe by Wednesday?

Nuworld - June 4, 2016, 2:34 pm

(Jun 4, 2016 02:27 PM)Cryptic™ Wrote: [\[CITE\]](#) We got most of the features done, Remix is finishing it up. Maybe by Wednesday?
Great! Thanks Cryptic and Remix.
Good job!

Cryptic™ - June 16, 2016, 9:45 am

I just conducted the first ever Activity check using this script

Works perfectly.

I created a thread in BH asking ppl to post to participate in the activity check.

After the check was over I closed the thread and entered the URL and GroupID into the script.

I hit run and it took me to hackforums.net/managegroup.php?gid=54 with all the ppl that DID NOT POST check marked, so all I had to do is hit remove.

The whole process took less than 10 seconds from start to finish.

Without this script I would have spent a few minutes manually check marking people, which is a pain in the ass.

Nuworld - June 16, 2016, 10:05 am

Does this mean the tool kit is almost finished?

Cryptic™ - June 16, 2016, 3:47 pm

(Jun 16, 2016 10:05 AM)Nuworld Wrote: [\[CITE\]](#) Does this mean the tool kit is almost finished?
Yeah, Remix is ill at the moment so he'll finish it off when he gets better

Krave - June 16, 2016, 4:03 pm

Kind of ruins the point of having this then doesn't it?

Krave - June 18, 2016, 1:22 pm

(Jun 18, 2016 01:04 PM)The JOker Wrote: [\[CITE\]](#) Kind of ruins the point of having this then doesn't it?

People who are on vacation do not appear in the memberlist as they're temporarily removed from all usergroups. It's easy enough to remember who they are and remove them when they're back, if needed.

Doesn't ruin the point at all and it wouldn't be worth Remix's time.

The activity check will be hella useful actually, good job Cryptic and Remix :)

Krave - June 27, 2016, 4:10 pm

(Jun 27, 2016 03:59 PM)Nuworld Wrote: [\[CITE\]](#) Does not work for sector leaders or maybe I'm doing something wrong.

This is a userscript for OFFICIAL group owners/leaders. "Sector leaders" are unofficial.

If your name is somewhere on: <https://hackforums.net/showgroups.php> then it'll work.

Cryptic™ - June 27, 2016, 8:28 pm

(Jun 27, 2016 04:10 PM)Krave Wrote: [\[CITE\]](#) This is a userscript for OFFICIAL group owners/leaders. "Sector leaders" are unofficial.

If your name is somewhere on: <https://hackforums.net/showgroups.php> then it'll work.
Correct. Sector leaders don't have any powers lol.

Their just regular ppl.

Group leaders / owners have access to group management functions.

TRAUMA - June 27, 2016, 8:30 pm

just downloaded and im not even a group owner.

For some reason, it lets me join any group I want. sweet

TheChi?f - June 27, 2016, 9:20 pm

I don't think it was mentioned in the OP but how do you get the group ID?

Zexo - June 27, 2016, 9:21 pm

(Jun 27, 2016 09:20 PM)TheChi?f Wrote: [\[CITE\]](#) I don't think it was mentioned in the OP but how do you get the group ID?

you can go and apply user cp and see it in the address.

Cryptic™ - June 27, 2016, 9:25 pm

(Jun 27, 2016 09:20 PM)TheChi?f Wrote: [\[CITE\]](#) I don't think it was mentioned in the OP but how do you get the group ID?

You go to <https://hackforums.net/usercp.php?action=usergroups>

If you highlight the "View Members" button for any group you lead you will see

<https://hackforums.net/managegroup.php?gid=XX>

XX is your group id

TheChi?f - June 27, 2016, 9:26 pm

(Jun 27, 2016 09:21 PM)Zexo Wrote: [\[CITE\]](#) you can go and apply user cp and see it in the address.
Alright Ty. Never paid attention to that.

illuminati? - June 28, 2016, 12:19 am

Installed it, very easy to use.

This will make every leaders job easier.

Cryptic™ - June 28, 2016, 12:58 am

An update has been released, update your scripts to version 0.3 contains some minor bug fixes.

Hydra - June 28, 2016, 1:53 am

Wait, so how do you blacklist members? It's 4 AM so forgive me for being stupid. ?

Zexo - June 28, 2016, 2:00 am

(Jun 28, 2016 01:53 AM)iHydra Wrote: [\[CITE\]](#) Wait, so how do you blacklist members? It's 4 AM so forgive me for being stupid. ?
also confused me a little.

Remix - June 28, 2016, 2:03 am

(Jun 28, 2016 01:53 AM)iHydra Wrote: [\[CITE\]](#) Wait, so how do you blacklist members? It's 4 AM so forgive me for being stupid. ?
you need to upload the api on a webserver and specify the url in the settings
it will save the blacklisted UIDs in a text file

Hydra - June 28, 2016, 2:55 am

(Jun 28, 2016 02:03 AM)Remix Wrote: [\[CITE\]](#) you need to upload the api on a webserver and specify the url in the settings

I did the first part but how do I add users to the list? Manually add them to a text file or through the forum?

Remix - June 28, 2016, 2:57 am

(Jun 28, 2016 02:55 AM)iHydra Wrote: [\[CITE\]](#) I did the first part but how do I add users to the list? Manually add them to a text file or through the forum?
there will be a button on each profile:

illuminati? - June 28, 2016, 3:20 am

Not sure why, but for some reason it's highlighting random peoples names.

Cryptic™ - June 28, 2016, 5:39 am

(Jun 28, 2016 05:13 AM)xadamxk Wrote: [\[CITE\]](#) If you are still working on this, I have a few older (outdated) group user scripts that could be redone for this. I'll shoot you a PM of all of them later. CC me on that one as well.

Armada - June 28, 2016, 7:08 am

Damn this looks quite handy dude. Thanks.

Hydra - June 28, 2016, 11:21 am

(Jun 28, 2016 02:57 AM)Remix Wrote: [\[CITE\]](#) there will be a button on each profile:

Ah, there you go. Thanks and great job on the userscript!

Roger Waters - June 29, 2016, 4:37 pm

Some kind of notes system would be pretty cool. Maybe something that appears on profiles for leaders to see.

Cryptic™ - June 29, 2016, 5:17 pm

(Jun 29, 2016 04:37 PM)Roger Waters Wrote: [\[CITE\]](#) Some kind of notes system would be pretty cool. Maybe something that appears on profiles for leaders to see.

Ouuu Raj had an excellent idea for once.

Remix - June 30, 2016, 2:47 am

i think i should let you know youre able to use the blacklist feature without uploading the files but you cant share it

Raymond Reddington - June 30, 2016, 2:52 am

Will keep this in mind. Thank you for this awesome tool.

illuminati? - June 30, 2016, 3:39 am

(Jun 30, 2016 02:52 AM)Raymond Reddington Wrote: [\[CITE\]](#) Will keep this in mind. Thank you for this awesome tool.

If you click the blacklist, anyone who you've added to it, will appear in red.

It's fantastic,

Remix - June 30, 2016, 3:45 am

just fixed some small glitches & added a function to export all members as mybb list

edit: a function to check all members in the member list has been added

NinjaLeaks - June 30, 2016, 3:47 am

Thanks for the HQ tool! Definitely going to be useful in the future :)

Zexo - June 30, 2016, 3:48 am

Yay I don't have red all over my screen when I view members.

Cryptic™ - June 30, 2016, 9:36 am

Updates were released last night, more group management features.

TheChi?f - June 30, 2016, 10:07 am

I have tried the activity check and it works flawlessly. Thanks a lot Remix and Cryptic for making this happen :)

Krave - June 30, 2016, 1:51 pm

(Jun 30, 2016 09:36 AM)Cryptic™ Wrote: [\[CITE\]](#) Updates were released last night, more group management features.

Sounds good. Would be cool to see some sort of changelog.

Cryptic™ - June 30, 2016, 3:09 pm

(Jun 30, 2016 01:51 PM)Krave Wrote: [\[CITE\]](#) Sounds good. Would be cool to see some sort of changelog.

Accept / Ignore / Deny all was added to the join requests page.

And some other minor bug fixes / improvements.

Roger Waters - July 23, 2016, 12:08 pm

I'd like to suggest an addition to the feature that check 1 thread for activity. I think it would be better if it could check more than one thread, since activity check threads never determine how active members really are. Being able to check multiple threads for activity would be a better way of checking how active your members really are.

Cryptic™ - August 27, 2016, 8:54 pm

(Aug 27, 2016 02:02 PM)xadamxk Wrote: [\[CITE\]](#) All of these features had already been made... before you suggested them to Remix :P
But good job Remix.
Not all, the activity check feature was made from scratch by remix.
Along with some other stuff but I cant remember atm, on the road.

Realizm - August 30, 2016, 8:11 pm

For some reason the adding/removing members from their profile part doesn't work. I haven't tried all of the other features out but for the most part everything else works. Just haven't tried things like the BlackList.

Cryptic™ - August 30, 2016, 8:19 pm

(Aug 30, 2016 08:11 PM)Realizm Wrote: [\[CITE\]](#) For some reason the adding/removing members from their profile part doesn't work. I haven't tried all of the other features out but for the most part everything else works. Just haven't tried things like the BlackList.
Works fine i use it everyday. you prob have a setting wrong or wrong group id

Realizm - August 31, 2016, 2:17 pm

Group Name: Titans
Group ID: 53
Group Image: https://hackforums.net/images/modern_bl/groupimages/english/titans2.png

Help me pleeze ?

Nuworld - October 3, 2016, 2:22 pm

(Jun 16, 2016 09:45 AM)Cryptic™ Wrote: [\[CITE\]](#) I just conducted the first ever Activity check using this script

Works perfectly.

I created a thread in BH asking ppl to post to partipcate in the activity check.

After the check was over I closed the thread and entered the URL and GroupID into the script.

I hit run and it took me to hackforums.net/managegroup.php?gid=54 with all the ppl that DID NOT POST check marked, so all I had to do is hit remove.

The whole process took less than 10 seconds from start to finish.

Without this script I would have spent a few minutes manually check marking people, which is a pain in the ass.

This does not work for me.

I'm now a leader (Enigma) and when i input the url and the group id then hit Run.
Nothing happens.

also the Group invitation does not work. I try to add a member from there profile.
I hit add to Enigma and nothing happens and they are not added to the group.

Any help and or ideas?

I have firefox and greasemonkey.

TheChi?f - October 3, 2016, 2:26 pm

Enigma | 46 | URLonly.

Yes that's how I have it.

I open the thread I want and copy the Url in my browser.

Then add that url into the tool.

Nothing happens when I hit run.

(Oct 3, 2016 02:43 PM)Zexo Wrote: [\[CITE\]](#)

Never heard of tamper monkey.
Currently using grease monkey.
Maybe that's the issue?

I'm drive home from work right now.
Should I change to tamper monkey?
The. I'll try your script.

Zexo - October 3, 2016, 3:05 pm

The. I'll try your script.

Idk tamper monkey works for all the scripts that I run but I have never used grease monkey before so I can't say that is the issue but it may be a good place to start.

Bingo! It was greasmonkey causing all this issues.
Installed tamper monkey.
I tried your script but it did not work.

I then installed the one here in the OP and all works.

Thanks for all the help Zexo.
and thank you to The Chief

One more question.
Blacklist: option.

I own/run three sites and have uploaded bl_api.php code to my servers and have entered the url into the Blacklist field of this tool.

I do not see any other settings or options to view the blacklist.

How do I/We see and use this option?

Zexo - October 3, 2016, 6:27 pm

How do I/We see and use this option?

Not sure if this will help or if you are talking about this but at the bottom of a profile you will see this option:

After you click that it should light the name up red:

If you have it hooked up to the server then it should add it. However not really sure since I don't use that feature.

Nuworld - October 3, 2016, 6:38 pm

Yep i see it now!

Once again thank you buddy. ?

Thanks Remix, awesome tool and great work.

Doxicity - October 4, 2016, 3:26 pm

This script is essential for all group leaders.
Makes shit way easier.

Nuworld - October 15, 2016, 5:09 pm

Would like to see added in the next version the option to view members activity group wide.
Not just one thread but ALL threads.
Would help to weed out UB whores.

I think Roger also requested this too.

And the option to list members with open scam reports.

Other than that the tool works Great!! Thanks

Cryptic™ - November 25, 2016, 11:12 pm

A little b.ump since there are a lot of new group owners since the time this was posted...this will prob help.

You stole Emy right from underneath me/us you fuck lol
?

>Yeah, but more of them were mine.

u sure. ?

Captain Steve Rogers - November 29, 2016, 3:57 am

Nice script OP, will help group owners a lot.

Nuworld - November 29, 2016, 6:01 pm

Maybe this issue is on my end but there might be an issue with the last update.
(Updated for ssl)

once i updated this scrip i can no longer remove member from my group from there profile.
It only shows Add to Enigma.
Even though the member is already a member of Enigma.

Cryptic™ - November 29, 2016, 6:56 pm

@Nuworld, works fine for me.

Make sure your settings are correct.

What should the setting be set as?

As i said before, everything worked great up to the last update.

Cryptic™ - November 29, 2016, 7:30 pm

I haven't had any issues with the latest version, and i use it daily. Try reinstalling?

Nuworld - February 1, 2017, 6:54 pm

Now this does not work for me at all with the current version of Firefox 51.0.1
Nothing showing up in UCP

Too many errors to post here.

PM me for screen shots of errors in the current version of this script/code.

Yes i have uninstalled/reinstalled many times now and it's broken with current version of Firefox.
BTW: I do not use Chrome. Don't trust it!

(Feb 1, 2017 08:54 PM)xadamxk Wrote: [\[CITE\]](#) Spoil that damn image, geez.
And I don't see the 6 pages of errors you are talking about?
Never mind! It's broken. I'll just go back to the old school way of managing members.

Thanks.

Nuworld - February 3, 2017, 6:34 pm

OK i found the problem.

Problem is Version conflict of this scrip with current version of FireFox 51.0.1
The link in OP points to V0.1 when current version of this script is V0.4.2

Plus if one looks at the history/updates to this script the dates do not match.

In the below image you can see there are two different versions dates of V0.1 with two different dates

Now for some reason TamperMonkey does not see any new updates for this script.

What worked for me is to Delete/Remove the script V0.1 from TamperMonkey Dashboard
Then install V0.4.2

Now everything works just as it should.

Problem solved.

The OP download link needs to be updated to point to the current version of this script. V0.4.2
