I am thinking about selling a private method of mine, you must have a dog/cat in order to do it, I'm not really sure on how much you can make around \$500~ a hit or something like that
How much would something like this go for? probably around 5 copies sold

If this has anything to do with selling your pet for \$, reinvesting the \$ in shelter animals, and then flipping them on classifieds, I'm done.
