Basically, I have a sub account of a business account. If the sub account becomes limited, will the main account be limited too?

I would assume that is the case.

You're best of contacting support for a definite answer.

If you use the same Contact Details and IPs im sure it will get limited too.

From my experience, if you have the same phone number etc attached it won't be limited. I move my money to several accounts and then refund and send again. This avoids limitation believe it or not because you have active outgoing and incoming payments.

This did happen to my friend once. He got limited because some asshole chargebacked 3 payments of \$100 from him and he got limited. He tried to log in into his second account but he was limited there. Same goes for his other 2.

Yes. If your account is limited and you don't do anything about it, your sub account will get limited as well.

I'm pretty sure that same goes.

Yes, if the sub account gets limited it will take the main account with it.

Any account that has the slightest relation with the limited account will get limited as well.
