Thread: [\[OFFICIAL\] KIK LATEST PATCH \[OFFICIAL\]](#)

LuckyFriend - May 24, 2016, 3:00 pm

This only applies to MODDED KIK APKs:

The news seems to be that kik has developed a patch and now all fake camera pictures will be sent as gallery when sending!

Does anyone know any modded kik not the original kik app that still has fake camera working thanks!!

PIKEK & GHOSTKIK LIVE CAMERA DONT WORK ANYMORE!!

Confirmed from my end as well. This is a big hit, seems to only be working on people's newer versions of kik.

Have your accounts on your modded kiks and when you need any live pics send them to your modded kik account from old kik as live and then forward them to your customer. ?

And if your wondering how to forward hit the little 'k' at top right of the pic

using slices and kik8 on a iphone and you can do multiple accs again. you need a jailbroken iphone though. or you can have multiple devices.

Who gives a fuck? XD

Just go back to how it use to be with plain old KIK and a lil bit of fake camera!

LuckyFriend - May 24, 2016, 3:59 pm

what is commands guys and yeah i found an app that works now, go here quick:
