Thread: [\[Guide\] Avoiding getting scammed for trading virtual assets. Use G2G Marketplace!](#)

**ActiveSeller** - May 25, 2016, 12:38 am

Hi guys and girls,

This guide will teach you how to avoid being scammed while buying and selling your in-game assets.

## The PROBLEM:

Many people deals directly with other players while buying / selling virtual assets, and most often, the transactions are done through PayPal which is problematic because selling gold as a gift through PayPal is not allowed. When there is a dispute, you are most likely to lose your money, and PayPal may even flag your account.

## The SOLUTION:

Use G2G Marketplace at <https://www.g2g.com> .Now let me tell you what this site is about. It's a platform facilitating trading of in-game services such as World of Warcraft Gold, items, high-level accounts, boosting services and even trading game card! It comes with wide variety of payment options and a secured checkout system called Gamer Protect.

## HOW BUYER IS PROTECTED:

1. Buyer places order
2. Buyer and seller confirm successful transaction
3. Seller receives payment

## HOW SELLER IS PROTECTED:

1. Buyer places order
2. Gamer Protect filters buyer integrity and confirms positive buyer integrity
3. Seller delivers product with peace of mind
4. Buyer and seller confirm successful transaction
5. Seller receives payment. Gamer Protect assists in any dispute or chargeback

As you can see, the seller will only receive the payment after the buyers has confirmed to received their orders.
