Quote:"The most significant news story that has ever been broken."

"We are going to get disclosure this year. I am not sure who will win the election, but I think Obama will be the disclosure president.

"He will be looking at a Nobel Prize for making an announcement like that.

"I am 85% sure Obama will make the announcement before he leaves office and within days your Prime Minister David Cameron will follow."

"If there's nothing there, let's tell people there's nothing there. If there is something there, unless it's a threat to national security, we ought to share it."

What do you think about this?

True or not?

Febreze - May 25, 2016, 10:08 pm

It's hard to tell what's true or not. If he reveals the FACTS about the paranormal then it will confirm/deny every single theory. They are afraid to tell the truth, to cause mass hysteria, to always make people wonder. If it's real it will put people at rest.

I'd like to know if it's factual, but it's hard to tell because of all the conspiracies and the government is usually really fucky ducky.

I don't believe in "aliens" necessarily, just that there have to be some sort of other existential being out there, with advanced technology. They could be what created us, created everything that we know, they could be "god".

Who knows?

webdev77 - May 25, 2016, 10:12 pm

Load of bull crap as usual. If something like this were theoretically even possible, someone would stop him from making such an announcement.

Threebones - May 25, 2016, 10:15 pm

I wouldn't get my hopes up.

Watch it be some photoshopped stuff that he releases or some fake siting. Really doubt they'll

actually release pictures on it. If they did, it'd cause chaos through out the entire world.

That's what already happened back in '47.

PleasantBeing - May 25, 2016, 10:17 pm

No chance of this occurring. What would be the point of waiting till he is leaving. Doing such a landmark thing would be in his best interest if he was able to go for another term

Plague - May 25, 2016, 10:17 pm

Yeah.. I'm thinking like this isn't gonna happen.

GrandpaSherman - May 25, 2016, 10:19 pm

I'm excited either way. Can't wait to see the sea sludge animals they reveal. It'll be great

Collected - May 25, 2016, 10:20 pm

This is to good to be true. There is no way they would allow such sensitive information being released to the public just because he is leaving office.

Xerotic - May 25, 2016, 11:41 pm

I feel this situation is a fallacy. Obama could potentially make an announcement that is 100% fabricated and we would be none the wiser.

I dont think i will do it now just because he will expose his "alien secrets"

Tharp - May 26, 2016, 1:47 pm

This would be cool but we would never know whether its valid information or not.

Corpse - May 27, 2016, 3:06 am

Hopefully he does. The world needs that kind of hope and information.

Ha Haaa - May 27, 2016, 3:18 am

Yeah nah. I highly doubt we have encountered aliens. Its too unlikely.

Urge - May 27, 2016, 6:01 am

Doubt it, he'd get killed. Probably in his contract because info that sensitive could cause riots and everyone in America to demand answers

xMyth - May 27, 2016, 1:15 pm

Religion is used to control people. If this ever happened it would undermine some (if not most) of the largest religions in the world and cause mass amounts of chaos. Not to mention if he did try something he would be assassinated before he could do anything.

python1 - May 28, 2016, 4:52 am

Probably will get assassinated like JFK bu some inside agent of the government.

irtehwiner - May 28, 2016, 7:46 am

Aliens do exist, look at the mathematical perfection of the 26000 year old pyramids aligned perfectly with the previous equator?

Stonehenge

(even donald trump will apparently be influenced by them when making speeches for many hours per day but will be normal donald trump when he goes back to his family.

don't believe me? Listen closely to his recent public speeches. We are at the end of this 26000 year cycle, which in the next 10 years or so from now the earth's magnetic poles will change, this is the cause for the climate change we see now, similar to what I assume Atlantis civilization experienced.) If you need more proof, youtube and google has many answers. Hint: "Rudolf Of Germany"

(May 27, 2016 03:18 AM)Ha Haaa Wrote: [\[CITE\]](#) Yeah nah. I highly doubt we have encountered aliens. Its too unlikely.

Unlikely? We barely encountered flying machines 100 years ago, and have JUST entered the computer age 20-30 years ago. We are barely above that of a chimpanzee.

https://en.wikipedia.org/wiki/Drake_equation

Stephen hawking and other brilliant minds are indeed very intelligent, but are looking at it wrong. Light is the top possible speed of anything in the universe EXCEPT thought. We humans have a purpose, which is to create emotional energy. This expended emotional energy is of no use to us anymore, and is stored in the pyramids where it is "purified/filtered" then being beamed up to another place, which is then used as fertilizer for their mushrooms which they eat. People pray to "god" when they should reflect on themselves instead. There are aliens, but if they meant us harm, we would not be alive today.

Take this into thought

George125 - May 28, 2016, 9:12 am

Lets go back to the opollo and moon landing.

Once they first stepped on the moon, they felt the presence of another species, they immediately aborted the mission instead of staying up , and then the usa government never returned back to the moon (even on this day)

There's also a person who has the power of remote vision, he said in 1981 that he saw rings on jupiter, that is until later after years passed, they sent a spacecraft onto space (voyagers) and then detected the rings of jupiter, he was right.

He was asked to do remote viewing to certain coordinates on the moon, he was shocked to see civilization (that looks like human life beings) , he tried to report it and oublish it as a book but the government didn't allow him, he was then assassinated.

Ok, the government knows that there are aliens on the moon, what then? Do you really think they will anounce it to the world? Such a secret is hard to keep, thats why there would be some people who expose it, but still no one will believe, and would only regard it as theories, such as area 51, ufo ciggarre shapped, disk shapped whatever shape it is.

Alien abduction has increased over the years, doesn't that tell us something? Implanting some 200 ghz chips (whatever they call it) onto humans, people experiencing days reporting being experimented on, they also say a ball of light, change color and sometimes seen on the moon. Actually if you use physics and calculation, theoretically, the moon should not exist, every planet in solar system has 3-8 moons, even on planets outside out solar system the odds are rare to have one perfect moon.

I believe ufos/aliens shift in dimensions from 7.32 (3rd dimension) to 8-9 (4th and 5th dimensions) Not spatial nor time, but the frequencies. So they disappear and pop up in another.

And people who say that aliens are not on earth, they are a bit ignorant, there is no smoke without fire, and it's impossible to announce that kind of secret to the world without consequences or lies. Would they want to fake an alien invasion? I doubt, but thats what they call "New Age Movement"

It's actually the complete opposite. The chance's should be so high that it's actually quite mysterious we haven't encountered aliens already. Hence the Fermi Paradox.

I do honestly believe that there is something else out there, where and if we have ever had interaction with them though, is well beyond me. But here is the thing.

Going back to even biblical days, there are written documents detailing visitors from the stars. And to this day, there is a lot of stuff on this planet that would make a whole lot more sense to have come from another place, or at least with the guidance from a more advanced species than we are able to rational in many ways as is.

Well, releasing sensitive info about nation security of the states is one thing, but sharing their theories about extraterrestrials is another.

I think every person who's smart enough would figure this out, that we're not alone in the vast infinite, it would be just matter of time that we will cross some other alien species.
