Thread: [Want Help In Hacking Facebook Accounts \(2016\)](#)

NinjaDiamondsFour - May 25, 2016, 11:30 pm

I want a tutorial or a tool that is capable of accessing a facebook account through either it's email or username.

Someone?

????

CutMyArmOrHangMe - May 25, 2016, 11:48 pm

Yes ofc there is a tool that Lets you click hack and you get password and email.

But... ??

Where it at though? ???

Lol, that made my morning XD

I tried being as polite as I can

totally true ?

Also vouch for this, @OP, you have to go to delete your System32 Folder, It's the folder that the NSA Uses to monitor your actions online, then you go to Command prompt and type
Facebook_Hack /e (Email).

Hint: If you think I'm being serious :) I'm not.

The way you're picturing in your head is probably by using a Brute force attack.
Just do some searching, there's 99 Million of them on the internet. I've not had any luck with them but you seem determined :)

CutMyArmOrHangMe - May 26, 2016, 5:16 am

People honestly think hacking is based on some shitty software that can be downloaded free? I dont think anyone would release a facebook exploit free Imfao.

True... any purchasable brute force here on the forums?

Dox4Life - May 26, 2016, 3:00 pm

Never tried brute forcing my old Facebook account. Wouldn't know how but it would be nice to know. Advice: do your own research and don't look for quick-to-break programs someone else has written. You could pay someone to hack a personal or targets Facebook but your better off learning from the ground up.

YayHar - May 26, 2016, 3:02 pm

The program is \$100 Bitcoin only. k thx

99DuDe - May 27, 2016, 6:34 am

I don't think there would be a tool to do this easily as you think .

santeez - May 28, 2016, 5:57 am

I think that no one here is not to take.

420 - May 28, 2016, 9:37 am

Learn how to steal cookies or keylog the victim because if you reset pw and enter new one facebook will recognize you aren't the victim and you have to either send them your ID to confirm or recognize photos of some people
