Thread: [\[ANN\] HFiles - Direct Link File Hosting!](#)

BassBoostOfficial - May 27, 2016, 8:01 am

Hello, and welcome to the official thread for HFiles!

HFiles is a non-profit direct link file hosting service for HF users. It's meant to serve as a stable CDN for images, files and other media.

As there's like no websites that do this, I decided to be the first one!

Hopefully you will find this useful, I spent some time doing this and I will try my best to keep this free and clean of ads for as long as possible! ?

Please also let me know if you have ANY ideas or suggestions regarding the site. :)

I feel like you don't know what a CDN is.

I will be opening a Community Alert on you. False advertising. <http://prntscr.com/b94aw1> doesn't work.

Spoiler [\(Click to View\)](#) I'm joking

That sounds awesome. I've found myself in need of something like this several times. I hope you can keep it running for a while :)

Content delivery network? I know it isnt that exactly but it delivers content :D

Fixed the uploads, had a small problem with it. Also fixed the file limiting etc :P
