Thread: [Live chat coddling rooms](#)

newmecha - May 27, 2016, 4:18 pm

Is there any live coddling chats going on, I'm interested in finding chat rooms dealing with dotnet framework in general.

If not anyone willing to start one and get people to join? I know aeonhack does live coding once in a while etc.

Do you mean only a chat? there's irc chat out there for c# at freenode :)

newmecha - May 27, 2016, 4:26 pm

Primary chatting, general chat etc.

While I do like forums etc I find them for more archiving tutorial base situations

Do you know the channel by chance? I don't mind IRC but was really looking for something like gitter.im but those are targeted more to the things people have created and not what people are creating.

there's a site called livecoding.tv , i used to follow some nice streamers there... although if you're trying to learn, msdn is always good.
