Thread: [Please show me how to hack a gmail or facebook password!](#)

kalilover122 - May 27, 2016, 7:59 pm

I am having trouble learning how to hack Gmail accounts with Kali Linux! If you can't do that then Facebook accounts would be nice! please reply with help :)

?

priyanka11 - May 27, 2016, 11:48 pm

To hack gmail account or to hack facebook account you will be needing TUT on MITM- you can know more about MITM

A man in the middle attack is one in which the attacker intercepts messages in a public key exchange and then retransmits them, substituting his own public key for the requested one, so that the two original parties still appear to be communicating with each other

Know more about MITM-

<http://blacklisthackers.com/facebook-user-can-hacked-access-token-man-middle-attack/>

Stop posting a shit ton of your forum all over here.

priyanka11 - May 27, 2016, 11:55 pm

OOOpsss Sorry.

Was try to help people here. If you think i am not doing right- i will stop it.

Ghost_Zarqa - May 28, 2016, 1:17 am

3 way

- 1: hack googel and get all database -
- 2:hack user computer and get the info from keylogger
- 3:by spam

You make it sound too easy mate !

priyanka11 - May 28, 2016, 5:42 am

Its seems to be easy--
Follow the mate :D

kalilover122 - May 28, 2016, 3:15 pm

2:hack user computer and get the info from keylogger
3:by spamI could already do it that way. I could just learn how to make a keylogger and send it to them, although, there are some problems with this.

1. Most emails will go in to spam folder
2. Step 1 "hack "googel"" is a retarded thing to say
3. It can be hard to get close to people in order to get their email

In conclusion there are faster ways that don't require social engineering. I don't know how to use these methods.

?????s??? - May 28, 2016, 3:16 pm

Look into fooling the recovery system and/or bruteforcing.
You're welcome.

XenuKitty - May 28, 2016, 3:29 pm

Myself and two other members have been offering compensation for Gmail for months.
Most tried to scam. I haven't been able to find one single member on here that can do it, without trying to scam.

Djehuty - May 28, 2016, 8:25 pm

Shoot me the email, I'll run a database scan. That's about the only thing you can do for big sites.
You could try social engineering, or one other method that Omni doesn't want discussed here.

kalilover122 - May 28, 2016, 9:10 pm

I'm not gonna do anything with the knowledge that I gain until I know how to not get caught.

besides using a vpn, what can I do to stay anonymous?

umaoidori - May 28, 2016, 11:03 pm

think you'd have to use RAT or keylog

AdMob - May 28, 2016, 11:23 pm

there's no easy way to hack a facebook account nor gmail, they're not wasting million dollar for their security for nothing, , the only chance to hack those kind of account is thru their computer. RAT , make a server ,crypt it , a little bit of SE to send your server and viola..... profit ggg

kalilover122 - May 29, 2016, 8:41 am

Do you know of any good rats or keyloggers?

AdMob - May 29, 2016, 9:52 am

(May 29, 2016 08:41 AM)kalilover122 Wrote: [\[CITE\]](#) Do you know of any good rats or keyloggers? the first thing you need to do is find a good crypter, any RAT program will become more useful if antivirus cant detect your server

sassy the sasquatch - May 30, 2016, 1:31 pm

The easiest way to hack an account is by leaked database.

- Leakedsource.com is a fantastic place and easy to use.

If you have no luck with this, try using an account cracker from the market place!

Good luck!

Arcazel - May 30, 2016, 3:31 pm

You can use bruteforce which is what the account crackers do, but bruteforcing is quite ineffective

Daddy6969 - May 30, 2016, 3:35 pm

Well if u wanna "hack" gmails or facebook etc than use a R.A.T or just use brutforce also use nulled's db. Hope that helps.

hAwK001 - May 30, 2016, 4:58 pm

Hacking gmail with kali linux ?????? Noooooo.....you can't enter in a gmail account ...only in rare case...if you already know the password or if you have the victim's phone etc...MITM attacks are pretty unlikely and difficult...someone says bruteforce...lol....no...every serious site like gmail have defence against that ancient techinque.....hihihihi

Try to know the name of the victim's dog...parent..son..wife...and guess the password...if you are lucky you can enter...

DO FIRST THE SIMPLE MOVE...

HF_ATL - July 26, 2016, 6:23 pm

So, is it really possible to get the gmail pass of a guy without him to know that someone is trying to hack it?

What if his email is from an entity? Like...abcdef@entity.eu ? Easier?

thank you

Cxdde3990xc - July 27, 2016, 1:17 am

You can't hack anything with Kali Linux
It's just a stupid distro

HopeBaptistChurch - July 27, 2016, 4:06 am

Im the same Kitty, I gave up about 4 months ago on Gmail. Ive not found anyone who can get past the same level I can get

Im the same Kitty, I gave up about 4 months ago on Gmail(I should caveat, from other sites, not this one, so I guess it is pretty universal). Ive not found anyone who can get past the same level I can get.

They have stepped up their protections

Dave from the lawyer firm - July 27, 2016, 9:04 am

hit me up with a PM, i might be able to help you out

besthacking - July 27, 2016, 11:44 am

the best way to hack gmail accounts is Brute force , try to make a huge list with common passwords then guess it

40Glock - July 27, 2016, 12:34 pm

Use a cracker lmao thats your best bet
