Thread: [DARKCOMET RAT \[5.3.1\] CLEAN COPY](#)

SloppyCode - May 28, 2016, 4:57 pm

I just thought I'd share this for new users who are looking for a clean copy of Dark Comet 5.3.1.

Any user feel free to check the copy for anything Malicious. As for the script kiddies the darkcomet.exe will show up as a false positive.

[Download](#)

NjRAT / Babylon. Any rat that isn't outdated pretty much so yeah.

To OP: file is clean, sha256 equal to original dc.

It's actually pretty useful for beginners.

SIM-2914476 - May 29, 2016, 2:27 am

He might have it FUD'd but fuck do I know :x

Are you serious dude? Lol...

GU€€I - May 29, 2016, 2:28 am

Me personally, I wouldn't download anything from a member with 9 rep

Who asked you to download it?

If you can't tell if it's malicious then I don't think you should be in the RAT section.

Threshold - *May 29, 2016, 3:18 am*

I don't understand why anyone would use this rat

yotoprules - *May 29, 2016, 4:05 am*

eh, its old and doesn't even work for me,(got from somewhere else) guys you should use njRat much more stable and safe to use.
