Thread: [anyone else having connection issues](#)

Raz Riverblade - May 29, 2016, 4:51 am

I'm posting this in name of Leroy Jethro Gibbs uid=1512695 who can't post it himself for obvious reasons.

My buddy Leroy Jethro Gibbs can't seem to get on HF. It keeps saying hes timing out. He has no way of contacting anyone (so he can't get to the contact form either).

Is anyone else having similar issues?

Edit: it seems to only be related to Cloudflares Dallas server.

This may be related to the ongoing speed issues since the slow down a couple of weeks back. Can he access the forum on a different connection?

Mr. Robot - May 29, 2016, 5:27 am

I'm getting random drops in connection but like only 1 in 10 pages I visit.

Omni and Leroy didn't know if it was DNS for Cloudflare or not. But it was a possibility. All other connections are blocked VPN wise but they do attempt to load.

All Leroy is getting now is 503 Cloudflare failed to connect to origin server.

Leroy Jethro Gibbs - May 29, 2016, 10:52 am

I'm good now guys. DNS was screwed for majority of the sites I went too. Seems to be working fine now.
