Thread: [.COM Domain + 15 GB Web Hosting + SSL + Full Setup = \\$1](#)

Born2Help - May 29, 2016, 5:03 am

Hey Guys,

The title says everything. Now time to get a
.COM Domain (For 1 Year) + 15 GB Web Hosting (For 1 Year) + FREE SSL (Lifetime - Depends
On Their 3rd Party Site) + Setup Fee..

Everything Is Just For \$1 ? ? ?

Follow the instructions very carefully to get everything:

Click the link below (My Ref.) ? :

<http://www.clicko.me/1dollar/>

Link's password: DigitalMart

Choose The Starter Package > Select Your Domain & Check Out.

Note:

If you are from USA, Then don't read. But, If you are not. Then must read.

- You have to use a USA IP to get the \$1 offer. I suggest you to use Zenmate Premium VPN /
Browser's Plugin Or VPS (Will Be Good) Or If You Have Private Proxies (Will Be Best).

- If you are not from USA, then you have to find a USA address, zip code, phone number from
Google.com/Maps (Don't Use FakeNamegenerator.com)

If you use information from fake name generator, Then they will ask you to verify the address and
account by giving them profile ID / Gov ID / Passport.

So, I highly suggest you to use Google Maps... Visit & type any city name or a known USA
company name. You will find the address and all other information.

I hope you will comment your review or vouch. :-) If you get success.
Don't be hesitate to ask questions.

? Want to know a twist on it? ?

Comment below with the word "Twist".

I will PM as fast as possible (within 24 hour). Have a good day!

It's pretty easy to do. Just follow the instructions carefully I've wrote on the thread.

Born2Help - July 2, 2016, 7:01 am

BUMP.. Still Working.. Hurry Up and get the domain and hosting from the provider (so cheap, no other providers give)

mftzy - July 2, 2016, 7:31 am

Twisty bro! Let me see :) thanks in advance

yotoprules - July 2, 2016, 11:05 am

Nice, I will try this later, Twist!
Does this support bitcoin?

blobtown - July 2, 2016, 11:06 am

I already have a domain registered! Can I transfer it for \$1 still?

HariboFX - July 2, 2016, 11:59 am

I ordered it and now I'm waiting for order confirmation.

Okay.

I'm sorry. But one.com doesn't support bitcoin.

You can use Paypal or vcc.

Sorry to say, there are some issue with the Twist.
Can't even edit the thread.
Sorry for that. Hope the domain, hosting and SSL will be useful for ya. ?

Bulgarian - October 4, 2016, 12:53 am

What is the Twist? btw how can anyone offer free SSL for lifetime?

Born2Help - October 4, 2016, 2:16 am

(Oct 4, 2016 12:53 AM)WhiteG Wrote: [\[CITE\]](#) What is the Twist? btw how can anyone offer free SSL for lifetime?

SSL certificates are provided free of charge to all One.com customers. Since SSL certificates are delivered by a third party vendor, we cannot guarantee that they will be provided free of charge forever. If at some point we are going to charge for SSL certificates, then all customers who have enabled SSL will be informed in advance and they will have the option to deactivate it.

--- One.com

Sorry man, about the Twist. Not properly working. So can't give anymore. Can't even edit the post and remove the Twist. -.
