Thread: [NetSeal Error](#)

iiTiago - May 29, 2016, 5:29 am

Hello could you guys help me putting netseal in my program. I put Seal.Initialize("programID"); but then the word seal is underlined in red. I have imported it aswell by putting Using netseal and i have added the netseal class.

1) <https://s3.amazonaws.com/nimoru/License.zip>

2) Net Seal -> C# -> Samples -> 1# Simple

Code is in MainForm.cs, 3 lines in total.

2) Net Seal -> C# -> Samples -> 1# Simple

Code is in MainForm.cs, 3 lines in total. I have done that but when i run the login screen thing dont load

EDIT:

[httpss://prntscr\(dot\)com/b9soyn...](httpss://prntscr(dot)com/b9soyn...) remove the 3 dots and the 3 s's at the end and replace (dot) with a .

You've placed that in the load event, which is raised after it's loaded and before it's shown. Follow the example project as I said before and place it before the call to InitializeComponent in the constructor. Come on man.
