Thread: [JMail\[GMAIL\] Java Gmail Spoofer](#)

Null. - May 29, 2016, 11:30 am

Hello, Im practicing my Java skills for my college next semester, can you please make a comment about my first program.

Sorry for Gmail support only, if anyone wants to add another host, Ill try to.

You can also PM me for the source. or just decompile the JAR

im unable to update the thread for the v2

I used Javamail API for this project

changelog :

- bug fixes

- optimizations

- MULTI THREADED

- SPAMMER limit 30 messages

planning to add Proxy support

just decompile it if it feels suspicious

Mouse? - May 31, 2016, 7:59 am

The programming sections are for source code, not compiled files.

I have... ABSOLUTELY no idea what you're talking about.

(Well, would you look at the time, bye.)
