Thread: [\[OFFICIAL\] The Brotherhood | Programming & Web Development Sector](#)

\$lick - May 29, 2016, 12:42 pm

Userbar:

Owner:
[Cryptic™](#)

Leaders:
[illuminati?](#)
[-Hyperion](#)
[Roger Waters](#)

Introduction

Welcome to The Brotherhood's recruitment thread for the Programming & Web Development Sector. This group will be mostly focused on helping out others when it comes to Programming and Web Development, we may also work on projects for The Brotherhood if the need arises. We will also help out when it comes to freelancing, if a member in our group is approached to do some work but doesn't have time then he can pass on the information to you or any other member that is willing to do the work. Make sure to include a ? in your application to show that you have read this.

RequirementsNo open or unresolved scam report.

Must be able to follow The Brotherhood Handbook.

Must be a member of HackForums for at least three months.

Must not have a bad reputation within the HackForums community.

Each applicant will be reviewed by Cryptic. If you are not in good terms with him, don't bother applying.

Application

This group is meant for more experienced members and not for people who are looking to learn.

Code [b][color=#FFA500]Name & profile link: [/color][b]

[b][color=#FFA500]Age: [/color][b]

[b][color=#FFA500]How experienced are you with programming(1 being horrible, 10 being excellent): [/color][b]

[b][color=#FFA500]How experienced are you with web development(1 being horrible, 10 being excellent): [/color][b]

[b][color=#FFA500]Favorite language and why: [/color][b]

[b][color=#FFA500]Link some of your past work: [/color][b]

[b][color=#FFA500]Link some of your Hackforums products and/or tutorials: [/color][b]

[b][color=#FFA500]Why should you be accepted: [/color][b]

Once you are in the sector the only requirement to stay in is to remain high quality, we do not require you to complete tasks to stay in the sector, Cryptic™ may require some activity checks but these are rare.

Reserving application spots is NOT allowed. Post only when you are ready to submit the final application.

Goldbach - May 29, 2016, 2:41 pm

?

Name & profile link: [Goldbach](#)

Age: 21

How experienced are you with programming(1 being horrible, 10 being excellent): 10. I have a Bachelors Degree in Computer Science and am obtaining a Master's Degree specializing in Algorithm Design and Machine Learning. Some of my projects include: Spam detectors, unsupervised learning on handwritten numbers, where a program can detect what number is written. In addition, I've developed booters, and daily fantasy optimizers for customer-centric projects.

How experienced are you with web development(1 being horrible, 10 being excellent): 4-5. I primarily write backend servers for web and mobile apps when I am doing web development.

Favorite language and why: Python. Its just so easy to write scripts/do complex calculations with.

Link some of your past work:

PM me for some of this as my personal name is on my work.

Link some of your Hackforums products and/or tutorials:

eBook: <https://hackforums.net/showthread.php?tid=5107586>

Daily Fantasy Service: <https://hackforums.net/showthread.php?tid=5117983>

No official tutorials though I used to help people in the education and programming sectors.

Why should you be accepted: I believe I bring experience that most people do not have with programming. Mainly that is applying high level techniques and coding them up (Machine learning, graphics engines, etc). Most coders know a language, know how to look something up, and can build basic applications such as crackers, booters, crypters etc. In addition, I love working with people, and I hope to contribute back to the Brotherhood.

Mouse? - May 29, 2016, 6:11 pm

Name & profile link: [Mouse?](#)

Age: 22

How experienced are you with programming(1 being horrible, 10 being excellent): I'd like to think 8-9 considering I've been doing it for 10 years in different subjects, but I don't brag. I'm modest and I know that there are tons of people that are better than I am. Went to school for it, got a job in database analysis, the works.

How experienced are you with web development(1 being horrible, 10 being excellent): See above.

Favorite language and why: C++, I started with it. I'm used to its syntax and it guided me to learn every other language I know.

Link some of your past work: There's an entire folder full of work if you want to look at it, but it isn't exactly uploaded. Will show if needed.

Link some of your Hackforums products and/or tutorials: n/a

Why should you be accepted: I can teach, guide and help with projects, write tutorials, etc.

kznamst - May 30, 2016, 5:45 am

Name: [Webdeveloper](#)

Age: 20

How experienced are you with programming(1 being horrible, 10 being excellent): 9. I'm a Computer Science student and i also did a Math/Info High School. I know C, Python, PHP, Sql, C++ and a little bit of JS(for front-end).

How experienced are you with web development(1 being horrible, 10 being excellent): 9. I've been working in this field for over 6 years. Mostly on wordpress but also on static websites and custom php scripts.

Favorite language and why: It's really hard to choose... i Would go with Python and PHP. Python is easy to use and very powerfull. PHP because i'm more into webdevelopment.

Link some of your past work: [Portofolio](#)

Link some of your Hackforums products and/or tutorials: [My partner](#) We started working together years ago(before we found out about hf). Also my reputation speaks for me, almost all comes from users that i helped or worked for.

Why should you be accepted: I've been searching for a group related to Programming and Web developement. I'm really into programming and webdevelopment and i would like to find new friends(even partners) and share knowledge. Maybe create new projects together. I'm really looking foward to meeting new people with the same interests. ?

radw - May 30, 2016, 6:12 am

cri cri

This is true.

Undefined - June 2, 2016, 1:56 am

Name & profile link: [Undefined](#)

Age: Not specifying my age.

How experienced are you with programming(1 being horrible, 10 being excellent): 7

How experienced are you with web development(1 being horrible, 10 being excellent): 6

Favorite language and why: I'll have to specify two. C# and JS. I like them because they're very spread out and easy to use. They can do so much. I personally can't really tell why I like them so much. I guess every coder has their favorites.

Link some of your past work: I have never really sold anything on HF but here are some examples of my work:

- Web browser put into a desktop application (I'll elaborate on this is asked to)
- Auto DOX program
- A lot of freelance jobs

Link some of your Hackforums products and/or tutorials: Sadly, I currently don't have any as I only recently became active on HF again.

But I do have [my programming service](#)

Why should you be accepted: I'm a generally very helpful and hard working guy. I'm willing to learn and teach others as well as solve problems and help The Brotherhood create programs or anything else they may need help with. I'm going to "summer uni" on C# so I'm going to expand my knowledge a lot more on there which is why I'll be of help. I'm currently working on a bunch of projects that I'll release under The Brotherhood's name (if accepted).

?

Sakuto - June 2, 2016, 4:06 am

It's funny because unless one person, I haven't see any of you in the coding section.

Remix - June 2, 2016, 4:29 am

(Jun 2, 2016 04:06 AM)Sakuto Wrote: [\[CITE\]](#) It's funny because unless one person, I haven't see any of you in the coding section.

2 of them are active in the C/C++ section

Prawnster - June 2, 2016, 8:38 am

Goodluck to all applicants ;)

Sakuto - June 2, 2016, 9:27 am

(Jun 2, 2016 04:29 AM)Remix Wrote: [\[CITE\]](#) 2 of them are active in the C/C++ section

Then my bad, but tbh, you should also suggest to some people instead of just recruiting through application. I can send you some username if you want.

Remix - June 2, 2016, 9:34 am

(Jun 2, 2016 09:27 AM)Sakuto Wrote: [\[CITE\]](#) Then my bad, but tbh, you should also suggest to some

people instead of just recruiting through application. I can send you some username if you want.
Send me the names

Unknown - June 2, 2016, 3:09 pm

Name & profile link: [dat boi](#)

Age: 21

How experienced are you with programming(1 being horrible, 10 being excellent): 7ish

How experienced are you with web development(1 being horrible, 10 being excellent): Never done it, 2.

Favorite language and why: C#, mainly because its easy for me to get things done in it.

Link some of your past work: I tend to avoid sharing my work on HF and haven't really put time into figuring out Git yet, here's an idea of the stuff I've worked on in the past:

Spoiler ([Click to View](#))

edit: I found <https://hackforums.net/showthread.php?tid=4953449> (nothing special, it just used a bunch of APIs for common things. (most are probably defunct by now.))

Link some of your Hackforums products and/or tutorials: Haven't really sold anything on HF. I try to stay away from the marketplace. It's just not my place to be. And I haven't really done any tutorials on here as everything that I know well enough to write a tutorial on has already been covered pretty well by others. I also tend to lurk a lot.

Why should you be accepted: I feel that it would be a cool experience to be in a group with other developers and to learn from others. It would also be pretty cool to see what its like on the inside. I've always thought The Brotherhood was a HQ and highly respected group (from the outside looking in.).

Thanks for reading, dad ?

It doesn't

I've seen many good coders which don't spend their time in the coding section

NinjaLeaks - June 4, 2016, 8:05 pm

Name & profile link: [NinjaLeaks](#)

Age: 18

How experienced are you with programming(1 being horrible, 10 being excellent): I would say a solid 8, I am fluent in many programming languages including java, c++, c, html, visual basic, python and a little ruby. Over the course of 8 years I have learned many things through coding and continue to learn new stuff every day!

How experienced are you with web development(1 being horrible, 10 being excellent): I think around 7.5 or 8. I am a freelance web developer and have coded a few sites so far. I have been experimenting for the past 4-5 years in web development but have not yet perfected it. There is always more a person can learn ;)

Favorite language and why: Personally I love C++ because it is simple when learned and can be expanded to accomplish amazing things. Its the root language for Objective C and probably the easiest language to use when making a HQ product, game, etc.

Link some of your past work:

Here are a few websites that I built or am currently working on

Spoiler ([Click to View](#))<http://clashingtips.com>

Nasyr - June 7, 2016, 1:59 am

I retract this application as of June 7th 2016.

Mobile error has caused me to rethink this application.

Members within this group are enough to discourage me from applying.

My opinion on this group has been affected.

Thank you.

Original Application

Spoiler [\(Click to View\)](#)

Name & profile link

[Nasyr](#)

Age

19-years-old

How experienced are you with programming(1 being horrible, 10 being excellent)

5/6

I studied Computer Science which included programming, I was not the best at it as I never actually gave it my mass amount of attention.

How experienced are you with web development(1 being horrible, 10 being excellent)
8-10

Studied website development for seven years, completed three college courses on Website Development.

I've also done quite a bit of web development work here on Hack Forums for people.

I've also worked with other developers from Hack Forums as well on projects.

Favorite language and why

PHP

The reason for this is that I love forums, I've owned many of them and I love being able to create customer plugins for my own forums which are unique to my forum. Additionally I just love the way the code looks in general.

Link some of your past work

The majority of my work is under my real name and I do not feel obliged to share that to be accepted into a group unfortunately.

However some work can be found here on HF for MyBB and Web Dev.

[MyBB Forum Tweaks and Development Service | Since 2014](#)

Best Regards

Hey there Wardrobe sir,

The current amount of application has not yet reached the amount of applications that I would wish to have before I (or Remix whom is also part of the application picking process) can make a well thought out decision, the plan is to get a bunch of applications and then narrow it down to a smaller amount, once we have this smaller amount we will then pick the best of applicants and forward the information that we have gathered on the users to our Mr Boss man, our Mr Boss man is Cryptic, he is the head of the brotherhood and he needs to review applicants before they can be fully accepted, if Cryptic decides not to allow the user (Which can be for many different reasons but mostly it is because they are low quality or just don't fit the group very well) then we will look into the other applicants that did not make it into the final picks and give them another shot, if however you Cryptic says he is fine with you being added to the group then we will contact you and give you information on how to apply, once you apply you will need to read our handbook and respond in the thread.

We are currently looking to get around three web developers and three desktop developers currently we do not have the list that we seek but when we do we will lock the thread and keep everybody updated with what is happening behind the scenes, we are currently looking for only the most experienced developers in the areas that they claim to be good at, so that limits the amount of applicants that meet the expectations of the group, although we do add community involvement as part of the equation on whether to accept you or not, that doesn't mean that it's the largest aspect that we are looking for, currently the main aspect is experience in the field but we don't just take your word for how good you are at what you say you can do, we will look into all your threads and projects that you include in your application, we expect these projects to be your own work and not just bought projects or heavily template based, obviously we allow frameworks to be used because frameworks are a huge part of how development is done these days, but if you have just copied a template off the internet and edited the information then you are less likely to be accepted, in fact you may as well not apply if that is all you can do, we don't want anybody that is slightly experienced in the field and if all you can do is edit templates or open source projects then you probably aren't able to do anything worthy of the group.

Knowledge on frameworks are actually preferred, frameworks are super popular and useful so I see no reason to exclude them from the application process, I guess frameworks like JQuery won't be

held as highly as knowing and understanding a harder to use framework but it's always a plus, the more knowledge the better really.

Also bypassing the one hundred character limit is super easy, I personally believe it should be at least one thousand characters excluding punctuation and quotes/image/videos.

Thank you kindly.

Glad you now answered,

May I address my opinion on the Clover Award character count, I agree with your opinion, but aswell should the odd be reduced.

Best Regards

Why should you be accepted:

Because I've been a very active member of the brotherhood in the past.

I was a very active member of the Music / EDM sector 2 years ago, unfortunately this sector was deleted so I had to leave.

I've always liked it very much in brotherhood and I had a really nice time in the group.

I'd love to build up more social contacts and I think the Brotherhood is also a nice source of information exchange.

People learn from me, I learn from other people.

I also think I should be accepted because I'm a nice person, well at least I try to be.

I try to be friendly to everyone and I love to help people out, I mean that are the fundamentals for a good community.

\$lick - June 14, 2016, 11:18 am

We only have one spot left, so the quality of applications should be increased to better your chances of being accepted.

We also accept bribes.

Breathless - June 23, 2016, 7:00 pm

Name & profile link: Michael, and [Breathless](#)

Age:

18 years old.

How experienced are you with programming(1 being horrible, 10 being excellent):

8.

I'm currently majoring in Computer Science, I've been programming for 5 years and I am certified in

Java, PHP, Computer Hardware Management and JavaScript from Kent State University.

How experienced are you with web development(1 being horrible, 10 being excellent):
6.

I've made several of my own websites, as well as a custom analytics API for displaying statistics of players from my plugins on a website such as kills, deaths, location, etc.

Favorite language and why:

I have two favorite languages, because they are both used for different contexts. Only a crazy person would be able to label one favorite language, when chances are that language can only be used in a few contexts.

For website development, I prefer to use PHP because of how easily I find making my code flow. I've never felt restricted with PHP and I can pump out line after line and see my results. I really enjoy how easy making dynamic items is with PHP, and that is why it is my favorite web dev language.

For desktop application development, I prefer to use Java because of its power of the computer, while still being relatively safe for use. I feel Java is one of the best OOP languages a person could know, and it was my first language so it has a special place in my heart. I know how to use over 20 Java APIs / Frameworks to a sufficient degree and I know the language like the back of my hand, even though I still learn new tricks every day.

Link some of your past work:

[Minecraft minigame cheat](#)

[Custom GTA server played on by Bashurverse, Cibseption, SkyDoesMinecraft and more! \(coded by me\)](#)

Other than this, I sadly don't have anything else public, but that's the whole reason I want to get involved with a group. It will give me the motivation to post those kick-ass tutorials.

Link some of your Hackforums products and/or tutorials:

[Custom Bukkit plugin shop](#)

Why should you be accepted:

I honestly feel that I have what it takes to be a member of your group. I finally have time to be active on HackForums now that I've made it through the thick of the start of college, and my hours at work are stable. I love programming and I love helping users out. I can be silly and stupid sometimes, which I regret afterwards sometimes however I feel my quality shines over anything stupid I've posted. I've never had a scam report open against me, I've never scammed anybody and I've been a legitimate seller with vouches. I've ran large-population gaming servers that I've coded myself, and I feel I could be a valuable addition to your group. I'm working on several tutorials right now as we speak that will be released within two weeks and I am attempting to make them as high-quality as possible. This is just the start, and I hope I can continue to grow and experience HackForums as a member of the Brotherhood!
