Hello,

We do not keep logs of any kind, and we never ask for any personal information to create the VPN ?

Thanks, is there a way I can use this with my phone? Maybe create authentication for proxies.

Nice share OP! I have been using your DDOS protection on one of my websites and it seems pretty good. This VPN would also be a good addition to the tools that I use.

so when trying to go onto <http://orcavpn.com> it rejects the connection is it down?  
or is this service not available anymore?
