IOS 9.3.3 JAILBREAK - COMING SOON!!!

How to stay prepared for this?

DO NOT, i repeat, DO NOT update your phones just yet. Stay on the lowest firmware possible, This because you might not be able to downgrad, but you can always update.

When the jailbreak is ready and seems stable, update your phones and jailbreak.

ABOUT

Hello, this is my help desk. You got the questions, i got the answers. I can help with almost everything within Iphones and jailbreak.

If you have any questions just leave them down below or send me a PM.

Most common questions

•Q: Is there a jailbreak for 9.2 or 9.2.1

•A: No, there is not. We still got to wait on that one.

•Q: Is it possible to downgrade to a earlier version of IOS?

•A: Yes there is, but for that to be possible Apple must have the firmware signed.

But at the moment you would NOT be able to downgrade to a jailbreakable firmware.

•Q: Can i jailbreak my iPhone?

•A: It depends on what firmware you're on. If you are over iOS 9.2 you would not be able to, if you're on a lower firmware you are.

•Q: How do i jailbreak my iPhone?

•A: I will have a tutorial on how to jailbreak your iPhone further down this thread.

•Q: When will iOS 9.2+ Jailbreak release?

•A: As of right now no one really knows, we would just have to wait sadly.

Important words

Jailbreaking is always a risk, but if you know what you're doing and follows the instructions right you would not have any troubles with this.

Jailbreaking older firmwares when there is new out there could end up you getting stuck in a bootloop

and your only way out is to update your phone which leads to you getting a non-jailbreakable

firmware.

-- This is still relevant, so keep this in mind even tho they have released a stable jailbreak.

How to jailbreak iOS 9.0 and iOS 9.0.2

- Step 1: Download Pangu's jailbreak tool [here](#)
 - It is recommended to backup your device with iTunes•
- Step 2: Turn off find my iPhone. Go to your settings -> iCloud -> Find my iPhone [Off]
- Step 3: Turn off your passcode. Settings -> Touch ID & Passcode -> Passcode [Off]
- Step 4: Turn your device into airplane mode. Settings -> Airplane mode
- Step 5: Open the jailbreak file you downloaded from Pangu's site.
- Step 6: Plug in your cable into the PC.
- Step 7: The tool should now detect your iDevice. Click on the start button.
- Step 8: If you already have a backup on your device click the Already backup button.
- Step 9: Somewhere around 55% your device will restart, once that's done turn airplane mode back on.
- Step 10: Somewhere around 75% it will tell you to unlock your device and run the pangu application.
- Step 11: Once you have opened up the app press accept and allow on the popup that follows.
- Step 12: Wait until its done.
- Step 13: You should now have Cydia on your phone. Open up cydia and let it doing its thing.

How to jailbreak iOS 9.1

OBS THIS IS FOR 64BIT DEVICES ONLY

YOU MUST HAVE ITUNES INSTALLED ON YOUR COMPUTER

- Step 1: Download Pangu's jailbreak tool [here](#)
- Step 2: Turn your iPhone into airplane mode.
- Step 3: Disable your Passcode by going into your Settings -> Touch ID & Passcode -> Passcode [Off]
- Step 4: Now logout out of iCloud.
- Step 5: Plug in your Device into your computer and trust it.
- Step 6: Open up the Pangu jailbreak you downloaded earlier and press "start"
- Step 7: If you already have a backup on your device press " Already backup" and press "start" again.
- Step 8: Your device will reboot a few times during the installation and that is normal.
- Step 9: At about 90% it will ask you to unlock your device and press the Pangu app you have on your phone.
- Step 10: Now you're done.
- Step 11: You should now have Cydia on your phone. Open up cydia and let it doing its thing.

Cydia sources

- Insanelyi - Has it main focus on customizing your device; also has a lot of cracked apps. To add this put in: <http://repo.insanelyi.com>
- Bigboss - The biggest source there is, it has tons of tweaks. To add this put in: <http://apt.thebigboss.org/repo/cydia/>
- xSellize - Has it main focus on emulated games, you'll find all different types of emulators such as

Gameboy, Nintendo 64 and NES. To add this put in: <http://cydia.xsellize.com>

• SiNful iPhone - Has it main focus on cracked tweaks and apps. To add this put in: <http://sinfuliphonerepo.com>

Tweaks that are compatible with 9.1

- Activator
- ApplInfo
- Snapchat - phantom
- SwipeSelection and SwipeSelection Pro
- Filza
- Tage
- Minimal Hosts Blocker - /u/ReddestDream
- Cloaky
- EqualizerEverywhere
- SwipeExpander
- VirtualHome
- NoSlowAnimation
- Speed Intensifier
- FlipControlCenter
- Acapella II
- BatteryLife
- betterFiveColumnHomescreen
- betterFiveIconDock
- BetterWifi7
- Call Enhancer
- CallBar
- ClassicDock Non-Themes
- CrashReporter
- TetherMe
- Auxo LE
- MyWi 9
- PhotoAlbums+ iOS 9

Let me know if there's any tweaks you'd like me to add into this list!

* - Old thread [HERE](#) Had to make a new once since i cant update the other one.

THREAD WILL BE UPDATED EVERY NOW AND THEN WHEN I GET MORE INFORMATION,
HUGE UPDATES COMING SOON!**

TopKekeroni - May 30, 2016, 3:35 pm

When it comes to jailbreaking, Shay is the man you're looking for. Helped me in the past, and I know he will be able to help others as well!

Fish - May 30, 2016, 3:37 pm

thanks! im planning on jailbreaking my ipdad in a few days. il come back to this later :D

Long John Blonde - May 30, 2016, 3:48 pm

Yeah this is fucking sick...

I want to jailbreak 9.3 so bad!

Would love a skype group chat up and running :D
TY Shay(OP)

That was quite a while ago, haven't been able to rephrase that just yet haha. Its safe to jailbreak 9.1 right now. But its always good to keep in mind that things can go wrong.

Rephrased everything now, thanks for pointing that out

Birdperson - May 30, 2016, 4:01 pm

Anything out for the iPhone 5C 16 GB?

sHAY - May 30, 2016, 4:03 pm

Yaniel - May 31, 2016, 12:10 pm

When it comes to this kind of stuff...I'm more lost than a fat kid at a salad bar, Vouch for this user.

TopKekeroni - May 31, 2016, 12:11 pm

Vouch for my boy Shay, he knows what he is doing!

Eternal. - May 31, 2016, 12:30 pm

This looks awesome, will definitely refer to it when 9.3.3 is released. Thank you for the resource.

I will let you know! ?

chase. - May 31, 2016, 9:35 pm

Just to update you all solo jailbreaker Luca Tedesko has achieved a 1.9.2 jailbreak it is somewhat untethered and is like jailbreak.me as it is through browser. He says he will not release it due to it being very malicious if it falls into wrong hands

sHAY - June 1, 2016, 3:46 am

Indeed. hopefully, GS team doesn't let us down.

angrymcdouble - June 1, 2016, 4:15 pm

GSMagic looks like a pure troll.

Every now and then a new "team" comes out and says they have a jailbreak.

And every time, it turns out to be a scam/troll.

It could be true. But yeah, 99.5% of the time: bullshit.

SlaYoRz - June 2, 2016, 8:25 pm

I just had an Iphone 4S given to me. My friend does not remember the passcode though. Is there a way to bypass this without updating the phone? I'd really like the option of jailbreaking.

sHAY - June 3, 2016, 4:23 am

If it is your friend's phone and he has all the paper for it etc you could simply go to your local Apple store and get it fixed there. I dont know any methods to bypass the lockscreen.

They might be, the more i look into it the less convinced i get. At this time its only time to tell since they have a "release" date the 10th. But lets hope for the best

Its my boss's old phone, I've already tried about five different passcodes that he thought it would be. I can tell he is getting kind of annoyed with me, so if I have to do all that I'll most likely just give him it back. I found them online for about \$60 anyways.

sHAY - June 4, 2016, 3:47 am

yea, buying one that functions might be your best choice right now.

Bobmillionaire - June 16, 2016, 9:22 pm

I was wondering if you could help me with a few questions about jailbreaking.

i have my iphone 6s+ on 9.0 jailbroken and was hoping i could update to a 9.1 jailbreak. since theres various apps out there requiring 9.1 and a few of which i would like to get.
also a jailbroken iphone 4s on 7 jailbroken, would like to get that up to 9.1 lol.

if i used ipsw to download the 9.1 file, i would then use that to upgrade to 9.1, which i could then jailbreak 9.1 with pangu correct?

what would i need to make sure i have backed up? list of my cydia apps? do they get erased?
never actually done an ios update after jailbreaking.

Marcus Hopson - *June 17, 2016, 11:34 am*

I keep hearing different things, i'm on 9.1 but did Pangu ever fix the Bootloop problem? I'd be really sad if I try to jailbreak only to have to restore bc of the BootLoop thing.

sHAY - *July 24, 2016, 6:14 pm*

Hm, my question right now is if you guys would like to see an updated version of this. Meaning 9.2-9.3.3
