You may join and buy whatever you like. You start with \$50,000 and it ends in 1 year.

I will be posting weekly updates with the top 3 balances and the top 3 highest day earnings. Goodluck everyone, PM me w/any questions.

Faq:

q: How much do you start with?

a: \$50,000 (though margin trading is available)

q: What is the commission per trade?

a: \$5

q: Can I invest in whatever I like?

a: Yes

q: Can I use more than one account?

a: Sure! Feel free to do whatever.

Let's do it for less than a year though. How about 3 months?

Also, everyone who enters the game, post your name on the game so you won't open 10 different users and try your luck with each lol.

Trading is risky. Unlike investing the value of your shares are guaranteed to go up. But it is more profitable then investing. On a virtual stock market game you can practice trading before investing real money in to it.

Most people will fail because they want to make money fast. Investing and trading requires a lot of patience.

I'm giving you a beginners tip. You must look at stock chart. You must look at the average lowest value and the highest value. Place an order to buy the share at the lowest value and sell it on the highest value. It can take weeks to buy and sell.
