Thread: [Api.php to create api for ddos vps](#)

g1nox - May 31, 2016, 6:59 am

Hi guys, i need api.php/send.php
if possible stop button; without SSH2 if possible.

Thanks !?

<http://pastebin.com/raw/biHziTg7>

try this man i hope helped you

Sakuto - May 31, 2016, 9:43 am

What the hell are you talking about?

Sakuto - May 31, 2016, 9:45 am

Api.php is something generic? :'D

Kedox - May 31, 2016, 10:12 am

1. store the get data
2. use exec() on your server to do what u need to do
3. yay

(May 31, 2016 09:45 AM)SI0th. Wrote: [\[CITE\]](#) i think dossing

Nahh, I think OP is talking about magic.

It can't be anything else then that, it really can't!

???

Your "attack" class is completely useless.

PHP Code

```
<?php
```

```
if (isset($_GET['host'], $_GET['time'], $_GET['method'], $_GET['key'])) //all are set
```

And pls learn to anonymous function

PHP Code

```
<?php
```

```
$methods = array(
```

```
    "tcp" => function($host, $port, $time) { /* do tcp */ },
```

```
    "udp" => function($host, $port, $time) { /* do udp */ }
```

```
);
```

```
$methods[$_GET['method']]($_GET['host'], intval($_GET['port']), intval($_GET['time']));
```

I can make an API for you, I'll also collect some awesome scripts. (only \$2 :v)
