Thread: [Laptop becoming. unresponsive](#)

Joy - May 31, 2016, 8:11 am

My laptop is becoming unresponsive when i open pictures or microsoft word and sometimes when doing other things. Please help me. My laptops running windows 8.1.

Joy - June 2, 2016, 1:41 am

I still need some help here. Anyone?

yotoprules - June 2, 2016, 3:16 pm

hmm, i can try to help you, you have skype? if so pm me

Joy - June 3, 2016, 5:07 am

Can someone help me with the current issue and also i uninstalled some programs and now when i connect to my wifi it shows connected but it doesnt actually get connected.

G Money - June 3, 2016, 5:08 am

Do you have an antivirus or firewall installed? I had the same issue when my antivirus started causing hanging on my computer. I had to uninstall it. Firewall was a resource hog as well.

I had to uninstall it. Firewall was a resource hog as well. Yah i have an expired antivirus. Doy ou think thats causing the issue cauz i can do other things other than opening documents and pictures.
Now i cant connect to the internet too. I may have uninstalled something for which i cannot connect to my wifi or ethernet.

G Money - June 3, 2016, 5:32 am

Yeah. That might be the cause. Uninstall it and report back to us. Hope it works.
edit hmmm

hey i pm you and btw can you message me on skype

Joy - June 3, 2016, 5:55 am

I will remove my antivirus soon and let you know.
