Thread: [{C#//WPF//JS} Undefined's programming service \[CHEAP\]](#)

Undefined - June 1, 2016, 1:00 pm

Welcome to Undefined's programming service!

Offering programming services in:

-C#
-WPF
-JS

ToS:

1. I have the right to decline any deal
2. If you have a deadline, please specify it
3. You'll pay 50% upfront
4. I won't make crypters because they're a pain in the ass to keep FUD

PM me to order.

Mefie - June 1, 2016, 1:05 pm

I have a C# application on a server. On this server, a website is hosted. I want you to write a JS that I can put onto this website. The script must be able to communicate with the C# application. I will send you the source code of the C# application in a private message. Hopefully, you can help me with this.

Bummer you don't make any crypters. Could you make a private one?
