Thread: [server with an awful owner.](#)

The owner of this server will ban you NO MATTER what. i had been IP banned because of my username, which was an "ugly ass name" according to the ban. (p.s, you cannot appeal the ban.) He/She has also been prone to ban AFK users, or users who don't even grief at all. here's the IP, if you're interested in checking it out: cubixcraft.cubed.pro

You have been banned. Boo hoo. Move on.
It is his server if he wants to be a dick then let him be a dick.

idk what you're talking about OP.

i joined and called the owner's mother a very rude name and he didn't do anything.

Lol keep in mind this kid is like 11 and annoying as hell xD... Im not a dick... Ask any of my staff members... They love me as an owner but its a simple rule... To prevent people from screwing up a server currently not in launch, and being built, if you fail, your banned (the build test, interview, etc)... After launch, we unban everyone... Thats fine, people can come and hack us, i mean it takes a very simple rollback from like 5 minutes to restore it. Like this dude is complaining on a form that he doesnt even know if im a boy or a girl... Like wtf

and also, Proctor, i dont know wtf you are talking about either xD... I dont even know you Imfao... Stop trying to show off bro

This guy is a magnificent twat.

His "Jr Builder" decides he has the right to teleport members here and there and to build "peni" and stripper cells around players and kicking them for no reason other than being a "douche" (As I commented on his "quality builds" that they possibly believe are "good") If this is how the owner decides he wants his server to be known, so be it. 10/10 community service, this server is utter shit.

The owner is incredibly immature. Does he think that banning a player on your open server (if you don't want it open then whitelist it? Also the server MOTD is "Beta 3.0"... I'm pretty sure a beta is for players to test it out...) and un-banning them after a supposed relaunch will bring that player on? First impressions are all.

Also they call themselves CubixCraft "Network". It's not a network, just some perworldchat and perworldplugins with some water portals and shitty builds.

Just my two cents. Great reputation so far. Keep on being shit! :D
