What's the difference between Package 3 and 3.1? They both include VPN/DNS/Setup but one is \$30 more expensive.

The difference will be the DNS provided during setup.

Hello friend BlazeHø?en recently I know that you have authorization to sell the link of luminosity
and since KFC does not respond I would like to ask you something

I hope you can help me with this a few days ago I bought the light link and the mail I received from
the seller said that soon I would receive an email with the product but this never arrived
Then try to communicate with the support, but I found out that KFC SANDIA was not available and
nadien has known about it and I have not been able to recover my money because of this I decided
to buy the imminent monitor that by the way is cheaper and very good

Sorry if annoying with this issue is just that I would like to know if I can still get my money back or
receive the product

In advance thanks for the help and here I leave my skype already send a request to your skype
