Thread: [<{#1 KEYLOGGER}> AutoLOG v2.5 | Native | Bypass UAC | DOC/XLS/PDF Exploit | Immortal](#)

DamienVC - June 3, 2016, 6:20 am

Previous thread with 2000+ replies: <https://hackforums.net/showthread.php?tid=5043535>

Welcome to the sales thread for AutoLOG, one of the best keyloggers ever seen. We ensure that this will work effectively as well as it will have more functions than any other keylogger on HackForums. The new features that have been implemented in AutoLOG include a multi-platform password stealer, a screenshot logger, a snapshot logger, automatic stub update mechanisms as well as a working USB spreader. AutoLOG features very strong persistence that will prevent termination of the process. AutoLOG has a UAC exploit that will grant you admin rights without the UAC prompt. AutoLOG has been coded in AutoIT & Python and has no dependencies. We currently have a 90-95% FUD stub so a crypter is completely your choice.

PROMOTIONAL OFFER: Free FUD Macro DOC & XLS Exploit Builder along with Advanced, Professional & Premium Packages
Premium users also get a FUD PDF exploit builder!

Autobuy has now been 100% initialized!

DOC/XLS Exploit Compatibility: Microsoft Office 2003-2016 (with macros)
PDF Exploit Compatibility: Foxit Reader (all), Adobe Reader 6-9.
REG Exploit runs stub on computer restart

Terms of Service

AutoLOG is a casual monitoring tool developed for legal use. We do not condone or endorse malicious use of our software in any way.

Customers are not entitled to share their licenses or build stubs for anyone else than themselves.

We will only offer refunds if deem necessary & reasonable in our views.

Attempt to reverse engineer our program will result in an instant license closure.

We exercise utmost control over any decision regarding AutoLOG.

You automatically agree to all the Terms of Service on purchase.

Violation of the Terms of Service will result in license termination & denial of service.

Chargebacks result in an instant license termination + denial of support.

All exploits provided with AutoLOG are free of cost & are macro exploits.

(Nov 3, 2015 04:10 AM)endellrod Wrote: [\[CITE\]](#) i should say autolog is one of the best keylogger here

first i think this is a random keylogger that came and will not work

but then after i buy it it works so perfectly fine
its works so fine. \$45 well spend

the support team is A++ they all help me over teamviewer to build the stub
and the stub is also FUD! :D

autoLOG is best keylogger on HF!!

Review #3

(Nov 4, 2015 04:42 AM)v.csoka67 Wrote: [\[CITE\]](#) i got help in setup over skype and teamviewer they help me fast and i rate this 10/10

instant reply to skype
always helping over teamviewer

and they all are very friendly and take good suggestion and qestion

i hope this keylogger stay more common and useful for everyone

here is keylog test i get on notepad i.imgur.com/eOGEt0p.png
here is scan result i get on virus scan!
refud.me/results/omekjh5onkx8ojj3wnp8cnvdsjxvnzsdzxs.png

Review #4

(Nov 6, 2015 08:13 AM)dominic0719 Wrote: [\[CITE\]](#) just bought this keylogger a while ago - i wasnt able to set this up myself but the support team came online and assisted me through TeamViewer - seems like their premium support is an actual point - I would totally go for this keylogger, its the best on hackforums in my honest opinion! :) Always liking this and the stub is still FUD too!

Review #5

(Nov 6, 2015 12:43 PM)ozone453 Wrote: [\[CITE\]](#) Bought this keylogger lately this has not been working but a small new update fixed everything
I can easily get log on my email in short interval with everything working fine
I made sure not to use unkillable on my self haha
It is working good so far I just download a new update from licensing
It seem very good by looking and provides the same prouct
Very legit product - Irecomend it

And if there is a problem the support team usually sort out in a few minute and get update/rfix in few

hour

This is good support

More Vouches. Too lazy to collect all of them ?

(Dec 7, 2015 08:40 PM)TheThree8s Wrote: [\[CITE\]](#) I give a huge vouch for this Keylogger. I want to say that every feature of it works flawlessly. I've done extensive testing on VM's and it works like a charm. The Keylogger is constantly updated and passes every virus test everyday I use it. BTW I used VirusCheckMate.

This Keylogger is updated every two days and is constantly REFUDe'd. I've had it for about a month and haven't had the need to buy a crypter yet. The new update that came out worked as soon as they released it. I haven't had any bugs/problems since I've had the keylogger. They included a document that teaches you every possible button/function. I'm highly impressed in the work they put in on this Keylogger.

Functionality: 9/10 the only thing I would add is a MB section for the File Pumper.

Design/GUI: 10/10 it's absolutely flawless and with the new GUI in the latest update makes it look even crazier than before.

Working: 10/10 there has never been a time I've had a problem with this. It could replace a RAT and crypter which is usually a \$60 bundle.

Price: 10/10 honestly I think they should raise the price because it's worth 5 times more.

Overall in my opinion this crypter gets a 39/40. Keep up the good work guys and I wish you the best of luck in the future.

In no way shape or form was I paid to give this vouch. I wrote this because I'm very satisfied with what I purchased. Check my posts I barely post anything vouch related.

(Dec 7, 2015 01:30 PM)aghomili Wrote: [\[CITE\]](#) Finally my Autolog has fully been setup, I got support from DamienVC through TV 5 minute support,?

(Dec 7, 2015 01:31 PM)james.stenbeck Wrote: [\[CITE\]](#) This is the best keylogger out there Get it now!

(Dec 7, 2015 01:46 PM)Stellen Sie TT Wrote: [\[CITE\]](#) I like the new update version and functions. Any1 scripting should change the googlemail smtp settings to smtp.gmail.com, it was a bit confusing to me initially but I used a 6th sense to figure it out. Thanks Redd and his team of support staffs

(Dec 7, 2015 02:43 PM)Blackbolt Wrote: [\[CITE\]](#) Been using this a bit now, everything works well more or less (occasionally some of the keys typed in the logs goes a bit wonky but that happens with all loggers)

My only problem is now I need to figure out how to spread :(

(Dec 6, 2015 08:23 PM)Blackbolt Wrote: [\[CITE\]](#) I keep getting an error, whenever i build my stub it says stub.exe is on the desktop but it's not there when i check?:/

Edit: No worried i figured out what i was doing wrong, logger works 99.9% efficiently, definitely worth the lifetime package, thanks guys! :)

Changelog

AutoLOG v1.0.0.0 released - 11/02/2015

AutoLOG v1.1.0.0 released - 11/07/2015

- Automatic Firewall Exception
- FTP/SMTP Delivery Updated
- Screenshot/Snapshot Logger Updated
- Stub Obfuscation Updated
- Disable UAC Added
- GUI Changes
- DOC/XLS Prototype Builders

AutoLOG v1.1.1.0 released - 11/13/2015

- File Binder Updated - You can bind any files to it now, .png, .mp3, etc.
- Compiler Updated

AutoLOG v1.2.0.0 released - 11/13/2015

- Multiple Keylogging Methods - Keyboard Hook / IsPressed option added!

AutoLOG v1.3.0.0 released - 11/27/2015

AutoLOG v1.3.0.0 released - 11/27/2015

- Steam Recovery/Stealer Added
- Steam Reset Added
- Screenshot/Snapshot Logger Delivery Updated

AutoLOG v2.0.0.0 released - 12/06/2015

- Self Destruct Date
- Customizable Fake Error MessageBox
- IP Logger
- Anti Debug/VM
- Time Interval for Delivery - Screenshots, Passwords, Keylogs
- Custom Process Name
- Custom SMTP Port Selection
- FUD Stub
- Stub Compression Improved
- Stub Size Decreased
- HotLogging (highlight specific windows)
- Highlight Keylogs (4 different colors)
- New GUI
- Keyhook Updated

AutoLOG v2.0.1.0 released - 12/08/2015

- GUI Updated
- Readme Manual Updated
- Log Formatting Options
- Attach to Previous Logs
- Delete Logs After Delivery
- USB Spreader Updated
- Screenshot Logger Updated
- Compiler Updated
- Time Intervals System Updated

AutoLOG v2.1.0.0 released - 01/02/2016

- Admin Requirement on Startup Removed
- Admin Requirement on Password Recovery Removed
- Drop to Custom Subfolder w/ Installation
- Custom Keyword Highlighting
- FTP Delivery Updated
- File Pumper Updated

AutoLOG v2.2.0.0 released - 02/28/2016

- Secondary Password Recovery Added
- Skype Chat History Stealer
- Browser Cookie Stealer
- Updated Steam Recovery/Reset
- Screenshot Trigger (fast screenshots when keyword/host/title is triggered)
- Custom Keyword Addition for HotLogging
- Updated Compiler/Obfuscator

AutoLOG v2.3.0.0 released - 03/15/2016

- Persistent Keyhook
- Minor GUI Updates
- Readme Updated
- Optimized TestMail

AutoLOG v2.4.0.0 released - 04/26/2016

- Private/WebMail Support
- Notification Messages
- Updated Compiler/Obfuscator
- Optimized SMTP Usage

AutoLOG v2.4.0.0 released - 05/20/2016

- DOC Exploit Added
- Stub reFUD
- FTP Fixes

AutoLOG v2.4.0.0 released - 10/12/2016

- FUD DOC Exploit Added
- FUD XLS Exploit Added
- FUD PDF Exploit Added

- Notification Email Removal
- UAC Bypass Exploit Upgrade (all Windows versions)
- 271 License Key Recoveries
- Added Windows Key / Opera / Microsoft Office Key stealers to Secondary

AutoLOG v2.5.1.0 released - 10/27/2016

- Password Recovery Optimization

AutoLOG v2.5.2.0 released - 11/15/2016

- FUD REG Exploit Added

AutoLOG v2.5.3.0 released - 12/10/2016

- Startup Method Changed
- W10 Startup Fixed

AutoLOG v2.5.4.0 released - 12/22/2016 (upcoming)

- Internet Explorer exploits (MHT/HTA) added

Wardow - June 3, 2016, 6:23 am

Ayy new thread, this keylogger having a long run :)

You should try to recode this one in another language such as Delphi, VB6, or if you can afford, C or C++!

Raymond Reddington - June 3, 2016, 6:24 am

Since I will be inactive, Damien will take care of AutoLOG. Previous thread got closed at 2k posts. This is the official sales thread now.

Thanks for the vouch again, another customer. ?

CindyDirty - June 4, 2016, 9:45 am

Hello Have WebPanel? french Support is Possible?

Thx

DamienVC - June 4, 2016, 10:07 am

(Jun 4, 2016 09:45 AM)CindyDirty Wrote: [\[CITE\]](#) Hello Have WebPanel? french Support is Possible?

Thx

it has unicode support, and two methods of keylogging. If one doesnt work the other will. IsPressed also worked for virtual keyboards too.

Webpanel isnt there but you can setup private webmail from Shinjiru

ubermensch511 - June 4, 2016, 10:21 am

Thanks very interested

Yeah,

You can see from the changelogs that our Logger is updated frequently. This also reduces the known detections from previous versions.

Currently it is around 3/42.

Let me know if you have more queries.

Imagination* - June 7, 2016, 3:54 am

Thanks for the link , Can i have the code to activate it please ? it says license doesn't exist :)

i can recommend you this key logger personally im using it and 97% fud all the major virus guard companies this keylogger bypass ?

Note -

This comment is to help you , I don't have any affiliate with this key logger ?

Scanner2 - June 10, 2016, 8:50 am

I have a bug.

When I Compile/build I have this error : "error please check if your mail is working". But I use a FTP not a mail...

NoisyFrost - June 10, 2016, 5:59 pm

Looks great! Might purchase :D

Jimson - June 10, 2016, 6:01 pm

Bought it. Works quite well and suits my needs tbh.

NoodleBot™ - June 10, 2016, 6:02 pm

Vouch for AutoLOG, some good development.

halearn - June 11, 2016, 8:02 am

your password are visible for a split second in the video

MiXiN - June 11, 2016, 9:48 am

I set it up correctly, even did a test by infecting myself and all was working great, I used the cure pc and that worked fine too.

Now when I changed some delivery settings (Minutes between logs) and when I executed the stub it reads - Line 2262 (File "C:\Users\MyName\Desktop\stub.exe")

Error: Variable used without being declared

Also may I know why it only sends logs once after 5 mins (I set it to 5 mins)
Shouldn't it be sending them EVERY 5 mins not just after the initial send ?

taco85 - June 11, 2016, 6:49 pm

Autobuy link is not working :(

ParadiseDealz - June 11, 2016, 6:54 pm

I just bought it, How long it will take to send license after the payment?

bunny884 - June 14, 2016, 8:17 pm

very bad keylogger very unstable do not buy it guys he is a ripper :D

DamienVC - June 15, 2016, 4:31 am

Having some time, so attending to left out posts.

We have been running since over 8 months and this is what I have to say.

The program works 100% fine, we have been here all the time, constant presence in this section with constant stickies. We will never abandon our customers or rebrand into another project thrice like others did.

We are one of the best, if not the best keyloggers out there. Native - only one. Near to FUD generating stubs that are UD? Just 2-3 detections?

Other loggers dont give you scan results mainly because they dont focus on maintaining a FUD status on their stubs. The scans, if so - would be having over 10-20 detections when done.

We have USG - one of the reasons why stubs that are VT'd do not affect our stub that much in general - and the reason why we're generating stubs with 0-3 detections since months.

I suggest everyone to read the provided readme.txt - all instructions & precautions are provided there already. Manual setups by me or the support team are following the same procedure specified in the readme

Off to replies

<https://hackforums.net/search.php?action=results&sid=94ad0b410a48e2166e0ce32b5b91427f>

Since you already shown how LQ you are - I'd just save the conclusions.

i) You never purchased it.

ii) You did but have no idea how to operate it.

But for ii) though, we provide a good readme.txt file alongside it written in English that tells all the steps that you need to fully know how to operate this keylogger.

But for people like you who never purchased it in the first place, you would never know...

Raymond Reddington - June 15, 2016, 9:58 am

(Jun 16, 2016 02:34 AM)alphonso69 Wrote: [\[CITE\]](#) so what all are the new functions added in the keylogger since last update?
You can read the changelogs
<https://hackforums.net/showthread.php?tid=5291787&pid=51152244#pid51152244>

(Jun 16, 2016 02:34 AM)craggie.barzelay Wrote: [\[CITE\]](#) alright im logging off see you on skype i will continue msging there
Alright

alphonso69 - June 16, 2016, 2:36 am
that seems good, how do you manage skype chat steal?

DamienVC - June 16, 2016, 2:37 am
(Jun 16, 2016 02:36 AM)alphonso69 Wrote: [\[CITE\]](#) that seems good, how do you manage skype chat steal?
We steal the main.db file that you can open using Skyperious

alphonso69 - June 16, 2016, 2:38 am
ok so what all will i be getting in the main.db file you tell me?

DamienVC - June 16, 2016, 2:39 am
(Jun 16, 2016 02:38 AM)alphonso69 Wrote: [\[CITE\]](#) ok so what all will i be getting in the main.db file you tell me?
Skype chat history, contacts, timestamps, everything to be honest. You can also search for any particular words throughout all chats using Skyperious

alphonso69 - June 16, 2016, 2:42 am
WOW that is awesome thanks, seems like time to try this out hehe :D

ganstephanos - June 16, 2016, 2:43 am

been some time using this keylogger
will my license still be there?

DamienVC - June 16, 2016, 2:44 am

(Jun 16, 2016 02:43 AM)ganstephanos Wrote: [\[CITE\]](#) been some time using this keylogger

Alright contact me on damienvc@blah.im

sshawar - June 16, 2016, 3:40 am

I disabled the antivirus but the Autolog.exe did not run I got pop msg "Unable to continue due to an
error. Exception written to 'loader.log' file"

And what I found in the loader.log file is as follows:
16/06/2016 10:36:32 AM

Index was outside the bounds of the array.

```
at AutoLOG.ThreadPriority.DecryptData.CompatibilityFlag.ProcessDebugNode()  
at AutoLOG.ThreadPriority.DecryptData.TOKEN_SOURCE.WasStrongNameEvidenceUsed()
```

DamienVC - June 16, 2016, 4:47 am

at AutoLOG.ThreadPriority.DecryptData.CompatibilityFlag.ProcessDebugNode()

at AutoLOG.ThreadPriority.DecryptData.TOKEN_SOURCE.WasStrongNameEvidenceUsed()

Usual procedure

Update .NET (builder needs .NET, stub is native - doesnt need it)

Unzip to desktop Run as admin

Turn off AV including WinDefender

Daniel_HBK - June 16, 2016, 4:54 am

i added you on skype to buy it but i have some questions. Thanks in advance ^_^

Responded, glad to be of service

h33ttp - June 16, 2016, 6:01 am

I pm'd You.. please respond. Thanks

Daniel_HBK - June 16, 2016, 7:00 am

BOUGHT IT and its works fine!

i was afraid that Windows Defender could detect it

it only detect it after execution the stub file if you checked AV Killer, Bot Killer, System Information & Recovery Passwords

Tips for Windows Defender or other AVs: don't use recovery passwords

don't use AV Killer don't use Bot Killer

don't use System Information

after that i tried an other time with just generation Stub file for screenshots and logs and Windows Defender didn't detect ANYTHING!

this software is better than Aradmex Keylogger and any other keylogger i tried all over my live!!!!

Thanks guys for this amazing software! <3

* don't use recovery passwords
how then do you recover passwords?

DamienVC - June 16, 2016, 6:00 pm

(Jun 16, 2016 05:40 PM)pota4love Wrote: [\[CITE\]](#)

* don't use recovery passwords
how then do you recover passwords?
That's for a completely FUD setup and as per that user's preference for your kind information

You want passwords, it'll become UD. (1-3)
You want FUD + passwords, you'll need a crypter.

Aj Modz - June 17, 2016, 12:25 am

In regards to your old "issues" regarding the keylogger.

To activate secondary recovery, you need primary recovery checked in the first place

We have stated that it is not FUD, it picks up 3 detections at scantime and also had 2 runtime detections (back when reFUD.me existed), must be around 5-6 now.

Its priced at the almost same level as other .NET keyloggers, and this is native (no dependencies). They give you 10+ scantime detections, we give an almost FUD / UD stub.

* Main stealer works for FF and it has been shown in a video and tested multiple times ever since you purchased

Also, to mention that you wanted a refund within 2 days of not being able to use it properly, and I did process it as soon as I could. You were refunded in full.

Now if you'll ask other sellers regarding a refund, they'll ignore you + show that their ToS forbids refunds. Ou ToS says refunds is at our discretion and it still can be manipulated but we're running a good product here and we don't mind refunding a few people who aren't able to use it as the few of us may not be able to reach out to all customers (2500+) so far.

Download and executes stub from a direct EXE link using macro code. Pretty easy but that's what all the "exploit" sellers have been selling so I just included it as free alongside AutoLOG.

Professional is 6 months. costing \$35

Premium is lifetime, costing \$45

Saldanha - June 23, 2016, 6:48 am

enezfamo - June 24, 2016, 1:40 am

hello please can you give me best settings for this??

Thanksss.

DamienVC - June 24, 2016, 2:49 am

(Jun 24, 2016 01:40 AM)famo Wrote: [\[CITE\]](#) hello please can you give me best settings for this??

Thanksss.

First tab:

Use email (Yandex or webmail) with SSL

10min delivery on logs

12 hours in passwords

Disable notification

Second tab:

Fake error msg

Add to startup + hidden startup

Melt File

Hide Folder

password recovery + secondary

Mutex

Third tab:

Screenshot Logger

CLipboard Logger

Unkillable

The one thing is I don't understand why the hell people want to know the "best settings". The best settings is 100% dependent on your use. Targetted, mass spreading, business targetted, trolling, anything - all have different configs and I cannot define every single config

Aj Modz - June 24, 2016, 5:50 am

I 100% Vouch for Auto Log & Would recommend it to anyone.

The support is there for you 24/7 to help you.

Auto Log is one of the best Key Loggers on HF.

Trust me, it's worth the money.

also question - why do I get this

We are sorry but we require 25 quality posts to send a PM. Any LQP (Low Quality Post) spamming will result in a closed account. If you upgrade to l33t membership this requirement is removed. Yes, the builder requires .NET, the stub doesn't.

Install .NET 4.6.2 (latest)

And you need 25 posts to send a message

max.crawford - June 24, 2016, 11:29 am

(Jun 24, 2016 11:27 AM)DamienVC Wrote: [\[CITE\]](#) Yes, the builder requires .NET, the stub doesn't.
Install .NET 4.6.2 (latest)
And you need 25 posts to send a message
Hmm I see, that is the error. I will indeed install .NET soon. thanks.

DamienVC - June 24, 2016, 11:29 am

(Jun 24, 2016 11:29 AM)max.crawford Wrote: [\[CITE\]](#) Hmm I see, that is the error. I will indeed install .NET soon. thanks.
Yes, and the builder will execute and you can register on netseal then

max.crawford - June 24, 2016, 12:41 pm

(Jun 24, 2016 11:29 AM)DamienVC Wrote: [\[CITE\]](#) Yes, and the builder will execute and you can register on netseal then
I have finally got it to run somehow, now how could I operate the keylogger?

DamienVC - June 24, 2016, 1:19 pm

(Jun 24, 2016 12:41 PM)max.crawford Wrote: [\[CITE\]](#) I have finally got it to run somehow, now how could I operate the keylogger?
You can take a look at the readme.txt file

max.crawford - June 24, 2016, 1:33 pm

(Jun 24, 2016 01:19 PM)DamienVC Wrote: [\[CITE\]](#) You can take a look at the readme.txt file I have been reading it. Understood almost everything.

So if I need to run it on Yandex what should I do?

DamienVC - June 24, 2016, 1:33 pm

(Jun 24, 2016 01:33 PM)max.crawford Wrote: [\[CITE\]](#) I have been reading it. Understood almost everything.

So if I need to run it on Yandex what should I do?
Enable all options in email clients (settings) & save.
Use smtp.yandex.com with SSL on port 465
Username = email without @yandex.com

All fine.

max.crawford - June 24, 2016, 1:59 pm

Hmm I have done it and its working fine Thanks.

Also a question is, why do you have two password stealers?

DamienVC - June 24, 2016, 2:17 pm

(Jun 24, 2016 01:59 PM)max.crawford Wrote: [\[CITE\]](#) Hmm I have done it and its working fine Thanks.

Also a question is, why do you have two password stealers? Heavy ones for those who want all passwords and compact ones for those who just need a few ones

max.crawford - June 24, 2016, 2:17 pm

(Jun 24, 2016 02:17 PM)DamienVC Wrote: [\[CITE\]](#) Heavy ones for those who want all passwords and compact ones for those who just need a few ones Hmm it seems very good.

Also how does automatic stub update work

DamienVC - June 24, 2016, 2:18 pm

(Jun 24, 2016 02:17 PM)max.crawford Wrote: [\[CITE\]](#) Hmm it seems very good.

Also how does automatic stub update work
I may have reworded this a bit strange, include a version.txt in the same directory as the stub.exe on your webhost, and then make sure that the version.txt is edited with values 1, 2, 3, 4, etc for the respective updates.

max.crawford - June 24, 2016, 2:20 pm

where can i get myself a webhost? i was just using my email

DamienVC - June 24, 2016, 2:20 pm

(Jun 24, 2016 02:20 PM)max.crawford Wrote: [\[CITE\]](#) where can i get myself a webhost? i was just using my email

You can look around

[Hosting Services](#)

max.crawford - June 24, 2016, 2:24 pm

Yes and recent scans do show its not detected by Avast when scanned.

Zedz - June 25, 2016, 12:05 am

nice logger mate, i would like to see if you have updates in the future!

ridfesh1 - June 25, 2016, 2:22 am

(Jun 22, 2016 03:10 AM)DamienVC Wrote: [\[CITE\]](#) Thanks for the vouches

In regards to your old "issues" regarding the keylogger.

To activate secondary recovery, you need primary recovery checked in the first place

We have stated that it is not FUD, it picks up 3 detections at scantime and also had 2 runtime detections (back when reFUD.me existed), must be around 5-6 now.

Its priced at the almost same level as other .NET keyloggers, and this is native (no dependencies). They give you 10+ scantime detections, we give an almost FUD / UD stub.

* Main stealer works for FF and it has been shown in a video and tested multiple times ever since you purchased

Also, to mention that you wanted a refund within 2 days of not being able to use it properly, and I did process it as soon as I could. You were refunded in full.

Now if you'll ask other sellers regarding a refund, they'll ignore you + show that their ToS forbids refunds. Our ToS says refunds is at our discretion and it still can be manipulated but we're running a good product here and we don't mind refunding a few people who aren't able to use it as the few of us may not be able to reach out to all customers (2500+) so far.

Sorry, I was travelling for the past few days.

Haha you write such a long reply but still you don't really answer my question...

DamienVC - June 25, 2016, 4:28 am

(Jun 25, 2016 02:22 AM)ridfesh1 Wrote: [\[CITE\]](#) Haha you write such a long reply but still you don't really answer my question...

Last known update was in May and if it didn't seem good to you, I'd just suggest you not to buy. Its the buyer's choice after all.

And had it not been for our refund policy, other keyloggers would've been the same as us saying "All sales are final"

McDolands - June 25, 2016, 6:50 am

I can vouch for gaymienvc products

pota4love - June 26, 2016, 2:21 am

The detection rate is getting higher.can you at list refund this

DamienVC - June 26, 2016, 4:33 am

(Jun 26, 2016 02:21 AM)pota4love Wrote: [\[CITE\]](#) The detection rate is getting higher.can you at list refund this

Well at \$15/month, we offer rates that are like 66% less than what other keyloggers do.

Build a fresh stub, you will have detections under 5.

max.crawford - June 26, 2016, 5:01 am

Came again to say thanks, i got private version and it is really good in undetection, I'm enjoying my time with AutoLOG keylogger

DamienVC - June 26, 2016, 5:05 am

Thanks, contact me for any queries.

salmonella121 - June 26, 2016, 5:17 am

hi

i am new to the scene.

in a rat i see you need DNS noi-ip and more
does keylogger need it? or not?

thnx

DamienVC - June 26, 2016, 5:17 am

(Jun 26, 2016 05:17 AM)salmonella121 Wrote: [\[CITE\]](#) hi
i am new to the scene.

in a rat i see you need DNS noi-ip and more
does keylogger need it? or not?

thnxNah, you don't require a DNS or portforwarding to use a keylogger.

salmonella121 - June 26, 2016, 5:19 am

ok do i need anything else to use the keylgger
do this keylogger require no port then?

DamienVC - June 26, 2016, 5:20 am

(Jun 26, 2016 05:19 AM)salmonella121 Wrote: [\[CITE\]](#) ok do i need anything else to use the keylgger
do this keylogger require no port then?

Keyloggers use the SMTP port 465 which is open by default in all PCs.

You may need a crypter alongside AutoLOG.

salmonella121 - June 26, 2016, 5:24 am

may i ask what is a crypter

DamienVC - June 26, 2016, 5:25 am

(Jun 26, 2016 05:24 AM)salmonella121 Wrote: [\[CITE\]](#) may i ask what is a crypter
A crypter is something that makes your stub FUD
AutoLOG offers a stub with 3-4 detections, hence its just UD, so you'll need a crypter.
We also do offer private FUD versions

salmonella121 - June 26, 2016, 5:26 am

hm ok then, i will purchase the private version.

DamienVC - June 26, 2016, 5:27 am

(Jun 26, 2016 05:26 AM)salmonella121 Wrote: [\[CITE\]](#) hm ok then, i will purchase the private version.

I'm pretty sure AutoLOG will deliver upto your expectations

salmonella121 - June 26, 2016, 5:55 am

i got the emai, what should i do

DamienVC - June 26, 2016, 5:56 am

(Jun 26, 2016 05:55 AM)salmonella121 Wrote: [\[CITE\]](#) i got the emai, what should i do
Download the files, open AutoLOG1.exe and register on netseal and redeem your license code.

salmonella121 - June 26, 2016, 5:57 am

it says i need to have .NET FRAMEWORK 3.5 (includes 2.0)
ISNT this keylogger saying "no need for net??"

DamienVC - June 26, 2016, 5:57 am

(Jun 26, 2016 05:57 AM)salmonella121 Wrote: [\[CITE\]](#) it says i need to have .NET FRAMEWORK 3.5

(includes 2.0)

ISNT this keylogger saying "no need for net??"

You need .NET framework to run the builder, and the stub is written in AutoIT so it needs no dependencies.

salmonella121 - June 26, 2016, 6:02 am

isnt that a bit unfair i thought it wont need .net to be install.

DamienVC - June 26, 2016, 6:02 am

(Jun 26, 2016 06:02 AM)salmonella121 Wrote: [\[CITE\]](#) isnt that a bit unfair i thought it wont need .net to be install.

Let me clarify - the builder needing .NET won't affect anything as it is controlled by the owner, and the stubs are still having no dependencies. Your execution rates remain intact.

salmonella121 - June 26, 2016, 6:04 am

hm sorry for the mess, i understand now.

alright now, if i want to use with gmail to control my local computer network, what should i do?

DamienVC - June 26, 2016, 6:07 am

(Jun 26, 2016 06:04 AM)salmonella121 Wrote: [\[CITE\]](#) hm sorry for the mess, i understand now.

alright now, if i want to use with gmail to control my local computer network, what should i do?

Go to settings > connected apps/devices > enable less secure

Then go to <https://accounts.google.com/DisplayUnlockCaptcha> and unlock it

Then go to the autolog controller, and type in the following creds:

Username: email without @gmail.com

PW: your PW

SMTP: smtp.gmail.com

Port: 465

Use SSL

Send the test mail then.

Also if you're controlling PCs in your network, then gmail is fine but I suggest offshore mail (eg. Yandex/Mail) if you're controlling others.

salmonella121 - June 26, 2016, 6:07 am

alright that is good. the keylogger works on gmail. i tested it right now

what is the settings for yandex

DamienVC - June 26, 2016, 6:08 am

(Jun 26, 2016 06:07 AM)salmonella121 Wrote: [\[CITE\]](#) alright that is good. the keylogger works on gmail. i tested it right now

what is the settings for yandex

For Yandex, go to settings > email clients and enable everything & save changes.

Then use the following deets on AutoLG:

smtp.yandex.com port 465 with SSL

username = email without @yandex.com

salmonella121 - June 26, 2016, 6:11 am

(Jun 26, 2016 06:08 AM)DamienVC Wrote: [\[CITE\]](#) For Yandex, go to settings > email clients and enable everything & save changes.

salmonella121 - June 26, 2016, 6:23 am

my review of autolog keylogger

OVERALL 10/10

keylogger - works fine, records onscreen and symbols/other character too

screen/snap logger - works real fine, gives it at exact interval

clipboard - awesome logger, includes clipboard

overall logs are in very good format

i am enjoying using this keylogger, its password stealer is really good

Grabbed over 1000 password from my computers and even has my wifi password in them

definitely worth the money, i will not miss out on a chance to buy this logger.

best one in the world for me.

Thanks for the vouch mate, recent scan with ALL functions enabled:

[img]http://NoDistribute.com/result/image/Sq0wDVuXrBPvj9LYFIZGpJts.png[/img]

Still at 3 detections

Guess why other keyloggers never show their stub scans? LOL they're heavily detected asf

banned212 - June 29, 2016, 9:13 am

Hey guys please how great is the stuff and do i need crypter after building a file? If yes what crypter that is cool with it ?

Dzed - June 29, 2016, 9:14 am

could i please have this dude? thanks man

DamienVC - June 29, 2016, 10:32 am

Crypter is your choice, many users have used the stub without a crypter and haven't faced a problem.

A crypter would make it more effective though.

(Jun 29, 2016 09:14 AM)Dzed Wrote: [\[CITE\]](#) could i please have this dude? thanks man
Its a paid keylogger.

I am online via phone, dont have access to skype rn.

Are you the person who sent me a VM initially and lied about it?

EDIT: Finished your setup completely.

Thatguy09 - July 14, 2016, 9:27 pm

Damien,

I messaged you last week about an issue I am having with autoLOG not capturing keystrokes. Here is what I decided to do. I manually stopped the process, deleted the installation folder, and removed the registry files for both Run and Msconfig. I created a new stub with different setting and clicked to install it on my system. This is what I noticed, it added the process to task manager and the startup and install directory, BUT did not

1. Send me an email confirmation of the stub execution
2. Send me the initial email containing passwords and system info
3. Did not melt the file upon installation(Had that option enabled before I compiled stub)
4. Installing the exe file to the desktop rather than the default(AppData\Roaming\)

So this makes me believe that I did not delete all traces of the previous installation. Before manually attempting to uninstall autoLOG, I did click on the Cure Infected function in the program, but it did not detect the keylogger on my system. Which is strange because it was running and still installed. I think it's because I changed the name of the process from securityscan to something else?

Please I need your help and detailed info on how I can manually delete all traces of the program so that I can install the new stub on my system. I am a premium member and have a lifetime license to autoLOG and would like to be able to use this program of yours for years to come. I still vouch for autoLOG. Love the program. Just have had some minor issues with it that I know can be fixed. I will send this message to you on Skype in case you prefer to talk there. Thanks Damien!

fox_reaper - July 15, 2016, 12:32 am

so..i'm interested in getting this keylogger.. how do i get it?

DamienVC - July 15, 2016, 1:16 am

So this makes me believe that I did not delete all traces of the previous installation. Before manually attempting to uninstall autoLOG, I did click on the Cure Infected function in the program, but it did not detect the keylogger on my system. Which is strange because it was running and still installed. I think it's because I changed the name of the process from securityscan to something else?

Please I need your help and detailed info on how I can manually delete all traces of the program so that I can install the new stub on my system. I am a premium member and have a lifetime license to autoLOG and would like to be able to use this program of yours for years to come. I still vouch for autoLOG. Love the program. Just have had some minor issues with it that I know can be fixed. I will send this message to you on Skype in case you prefer to talk there. Thanks Damien!Please do turn off the notification message function, I've been telling this countless times as over 10mil+ mails have been sent in SMTPs having the AutoLOG notification tag, hence it is now used to block all future mails.

A detailed TuT is in readme.txt, and an abridged version is here:

Press any of the links saying Basic/Advanced/Professional/Premium to purchase the keylogger.

Mons - July 15, 2016, 10:15 pm

Big vouch for my gay friend here.

Truly amazing keylogger.

Don Genovese - July 16, 2016, 2:01 am

I am curious to know what you mean by "Copy-Pasted .Net Loggers". Are you implying all .Net Keyloggers on the market are just copy and pasted? If that is the case, I can ensure you I put a lot of work and effort in to ensure my keylogger is up to the standard it should be. Anyway, GLWS ?

DamienVC - July 16, 2016, 3:08 am

Not exactly, but we have had so many competitors who couldn't keep upto their words at all. People abandoning their project, people false advertising, people ignoring the complete fact and not mentioning to their customer that it has .net dependencies.

(Jul 15, 2016 10:15 PM)Mons Wrote: [\[CITE\]](#) Big vouch for my gay friend here.

(Jul 18, 2016 08:02 AM)kingsbig2001 Wrote: [\[CITE\]](#) having some issues with good crypter for this as ghostcrypter aint working well on it

As told to others..

I suggest you to use the following: native/ non .NET file option on crypters

No injection or self injection only, dont inject to other process Do NOT duplicate processes eg. startup, persistence, etc

Just use the crypter for crypting only, not for adding functions.

(Jul 19, 2016 12:44 AM)jesusuku Wrote: [\[CITE\]](#) Am buying this today, I hope its still working perfectly and no bugs..... I love it

thanks in advance on ur response

You cannot make it an exact image or video without the use of exploits. Such exploits are not known and even if they exist, they will cost tremendously high amounts (in the thousands range). Existing exploits involve using .doc/.xls/.pdf/etc and macro ones being the most easy and affordable. So you can make him run a macro doc and that will help you to infect the person

We offer a macro doc exploit with the professional & premium packages of AutoLOG. It is a creation guide, so you can use it for any .exe files. (including AutoLOG stubs)

MezMo - July 21, 2016, 11:30 am

The passwords aren't being delivered to my Email. I only see screenshots & keylogs. I'm using the recommended settings. What do I do?

Can someone help me set this up so I can get the passwords? I'll give you some money if you can help..

donat2013 - July 22, 2016, 2:19 am

I used Autolog keylogger before but it didn't served me so much as i expected.

I want to confirm if the features has been improved and does FTP delivery work fine?

Gangg - July 22, 2016, 9:34 am

Looking to purchase this however I haven't touched any of this for a very long time.

Is it noob-friendly? I just don't wanna be pestering you with questions if I was to purchase it, also what crypters would you recommend that would work well with your product.

cheers

MezMo - July 22, 2016, 11:39 am

I'm not getting any passwords to my Email other then Keylogs & screenshots :(

peteje - July 23, 2016, 6:40 pm

will my stubs be disabled after my subscription

Clint Eastwood. - July 24, 2016, 4:31 am

I have problem with this Keylogger looks like its not working for me atall,

I tried it on my other computers and nothing happens, the Stub gives me error and crash many times, and Autologv2 luncher crashed many times aswell,

i tried to add the support on the skype but no one is active..

DamienVC - July 24, 2016, 5:23 am

(Jul 21, 2016 11:30 AM)MezMo Wrote: [\[CITE\]](#) The passwords aren't being delivered to my Email. I only see screenshots & keylogs. I'm using the recommended settings. What do I do?

Depends on which version you used. First one was a bit unstable for the first few days and we've been present in the market dominating it for months since.

(Jul 22, 2016 09:34 AM)Gangg Wrote: [\[CITE\]](#) Looking to purchase this however I haven't touched any of this for a very long time.

Is it noob-friendly? I just don't wanna be pestering you with questions if I was to purchase it, also what crypters would you recommend that would work well with your product.

cheersYes, its easy to operate. No portforwarding, etc required - just an email

Recommended crypters: DataProtector, CyberSeal, EXE Protector, Olympic Crypter

(Jul 22, 2016 11:39 AM)MezMo Wrote: [\[CITE\]](#) I'm not getting any passwords to my Email other then Keylogs & screenshots :(

Responded.

(Jul 23, 2016 06:40 PM)peteje Wrote: [\[CITE\]](#) will my stubs be disabled after my subscription

No

(Jul 24, 2016 04:31 AM)momenzy Wrote: [\[CITE\]](#) I have problem with this Keylogger looks like its not working for me atall,

I tried it on my other computers and nothing happens, the Stub gives me error and crash many times, and Autologv2 luncher crashed many times aswell,

i tried to add the support on the skype but no one is active..

AutoLOGv2 issues:

Install latest version of .NET framework and run builder as admin

Turn off all AVs which are interfering

Stub issues:

Turn off Notification Msg (Doesnt work at all)

Turn off Get Sys Info if it is RDP/VM/VPS targets

Turn off UAC Exploit / Hide Process if target is not Win7

I'm back on Skype rn, will be doing setups rn.

donat2013 - July 25, 2016, 3:50 am

please give me your skype name.

i have bought this logger lifetime. my aol got blocked after i used it on this logger.

please tell me the best email provider which wont be blocked. i await your skype

DamienVC - July 25, 2016, 5:53 am

tenalp eht kcah - July 25, 2016, 11:34 am

Hi. You say this is coded in autoit and python, yet you claim it kills over 182 av processes. ESET NOD32 is one of the ones listed, along with many other major avs. Are you seriously telling me your program coded in autoit and python is going to effectively terminate the av process and keep it disabled? Your program coded in autoit and python can terminate processes protected by kernel mode drivers?

int_Fjord - July 25, 2016, 1:35 pm

You should know that there is a method that is implementable in any programming languages that allows the use of Win API. Looks like Dr Overflow combined it with IMFEO.

DamienVC - July 27, 2016, 12:04 am

(Jul 25, 2016 11:34 AM)tenalp eht kcah Wrote: [\[CITE\]](#) Hi. You say this is coded in autoit and python, yet you claim it kills over 182 av processes. Hey, a majority of the AVs listed are in fact killed and actually proof in the video is uploaded as a small demonstration. Of course it cant kill those running on kernel, since its just a simple keylogger tool being sold on HF, but infact better than all its competitors here on HF

(Jul 25, 2016 01:35 PM)int_Fjord Wrote: [\[CITE\]](#) Follow up on this, also interested. I'm assuming Damien uses the debugger property in the industry or some other exe image trick. No? Overflow has used IFEO and other tricks. Simple, but still not present in any other competing tool.

(Jul 26, 2016 12:13 AM)jesusuku Wrote: [\[CITE\]](#) Please I did all this and The program is good and reporting but not getting emails , password and key logs which are most important to me, I need help pls

Turn off notification email from 1st tab.

which of the crypters best crypts autologg? help needed, tell me the name here or pm me please, i have to know before buying this product.

blackvudu1 - August 2, 2016, 7:50 pm

interesting in getting the professional package, what I want to know is if am getting the builder with stubs, or I would get builder alone and which crypters work best with your product?

DAVID PALMER - August 3, 2016, 2:28 am

Hello

I paid premium autolog and The transaction ID

of this payment is: CPAG0IDA0AH7H5Z02LR1LBX0BY.

but I have not received my keylogger

sandersstephane@gmail.com

minhpham - August 3, 2016, 5:07 am

Hi,

I added you on Skype but haven't received a response. Would like to inquire about private stubs as well! PM?

vikvick - August 3, 2016, 7:15 am

Hi;

I tested the keylogger and for now it has been detected at first click by windows defender and emails got blocked even by disabling the notification.

in mail.com it tooks 12 hours to block it, i changed the time of delivery of 2 hours for logs and 30 mins to screenshot.

is it possible to change the email object to something else. keylogs and screenshots are two keylogger style object.

BR//

What is that mate? It is a PHP/MySQL error not with AutoLOG.

Thanks btw

(Aug 2, 2016 03:03 PM)ken0man Wrote: [\[CITE\]](#) which of the crypters best crypts autologg? help needed, tell me the name here or pm me please, i have to know before buying this product.

DataProtector, CyberSeal or Olympic/Codelux Crypter

(Aug 2, 2016 07:50 PM)blackvudu1 Wrote: [\[CITE\]](#) interesting in getting the professional package, what I want to know is if am getting the builder with stubs, or I would get builder alone and which crypters work best with your product?

You will get the builder that builds you stubs.

Builder = builder for malware

Stub = the file you spread

So it basically builds you stubs

Let me know if there's any confusion.

(Aug 3, 2016 07:15 AM)vikvick Wrote: [\[CITE\]](#) Hi;

BR//

Notification email renders NO email delivered at all except the notif. So please do turn that off.

And yes, some AVs detect it as we have a large userbase, we cant get to reFUDDing it as the same 5k+ users use the same stub

And yes, some mailboxes block it so thats why some people use private webmails of their own.

(Aug 3, 2016 05:07 AM)minhpham Wrote: [\[CITE\]](#) Hi,

How to install on a locked Win PC?

jackbaur57 - August 6, 2016, 12:01 pm

I have been talking to you on skype but not responding , what is the essence of buying your tool and i am not able to use it ? I tested it with my webmail and sent it to my webmail that was suceessful but when i wanted to build the stub , it will not allow me , saying i should check my email if it is correct or not. Just reply me Asap it going for almost a month npw without me using this stuff.

Thanks

DamienVC - August 6, 2016, 12:05 pm

Depends on how its locked.

hacmac - August 7, 2016, 8:04 am

Is this right to get a all in one product? Keylogger, Crypter and Binder? Or i need other tools too to hide the exe file?

DamienVC - August 7, 2016, 8:10 am

(Aug 7, 2016 08:04 AM)hacmac Wrote: [\[CITE\]](#) Is this right to get a all in one product? Keylogger, Crypter and Binder? Or i need other tools too to hide the exe file?

We are around 90% FUD. People use AutoLOG with & without crypters but a crypter is recommended

Supported ones: DataProtector, CyberSeal, Olympic Protector

rooneymark - August 7, 2016, 10:40 am

I have some issue with my Keylogger check ur skype and help me out

Harvin - August 8, 2016, 3:40 am

heard some good things looking for some new gear since coming back to this forum

Let me know.

??l?????? - August 8, 2016, 7:21 am

I will like to know the status of this product at the moment,i have used the 1 month package previously it didn't go well then i want to know if everything is working fine now
i want to purchase.

rooneymark - August 8, 2016, 8:26 am

Am having problem with your Keylogger saying Line 2284 (File 'C:\Users\USER\Desktop\stuv.exe') error: Variable used without being declared. and the second error is Line 2265 (File 'C:\Users\USER\Desktop\stuv.exe') error: Variable used without being declared. I sent you a message on Skype u didn't reply. The third error is when i execute exe and i restart my pc it doesn't show result again and it show is the error. Kindly help me fix this please Damien VC.. you can reply me on skype .

We are not 100% FUD, as we stated on the thread. It is 90% FUD so we have a few detections reFUDding it is useless as we've done it before and the huge userbase already gets the stub detected within a single day.

niiarmah - August 13, 2016, 8:20 pm

Damien,,,,please if u can let me know when u will be online today. I will wait for u to fix my setup too.i'm still sending u messages on skype. thanks

Well it does work, as shown in the video I presume plus I have personal test, I dont mind sending it over with blurred chrome passwords.

It even steals Pidgin/Skype lol.

(Aug 14, 2016 03:52 PM)Lermernerteh Wrote: [\[CITE\]](#) Hello! I bought the lifetime package and I tried setting up email but I get this error for nearly every email provider I try with (including my own email server).

Thanks!

Got it to work using GMail (of all things...).

Will say this logger is impressive. 4/35 FUD after all this time.

Yandex doesn't work, the rest mentioned in my post works, best ones being AOL & Mail. Gmail is pretty good except with the fact of unknown IPs

We cant maintain it as 100% FUD anymore, but our code scrambling methods at least keep it at a constant low rate (better than other keyloggers, so fine)

(Aug 14, 2016 09:09 PM)aaronzxv Wrote: [\[CITE\]](#) Hey pls 4/35 is relatively poor can you do better pls. And can I use ghost crypter to crypt it?

4/35 is not poor considering you've been running for months & had many customers. Other keyloggers do not show any single scans as they are heavily detected (15+/35) and they never reFUD it or update it. Oh, not to mention they all are .NET keyloggers

I dont think Ghost supports us.

Supported ones: DataProtector, Cyber Seal

(Aug 15, 2016 05:33 AM)Ahrt Wrote: [\[CITE\]](#) I have updated .NET to latest, rebooted and still occurring...

.NET is for the builder to run, not anything else. (Stub is 100% independent and built in autoit)
Do you still get the error? Its unlikely to happen when .NET is updated (latest is 4.6.2)

(Aug 15, 2016 05:45 AM)vikvick Wrote: [\[CITE\]](#) Hi;

Does this work to get gmail password from someone`s computer if I add the key logger to their computer?

@DamienVC

Ren4issance - August 18, 2016, 12:11 pm

Works Perfectly, and support answering quickly. Approved.

DamienVC - August 18, 2016, 12:30 pm

(Aug 18, 2016 09:23 AM)DynastyX_ Wrote: [\[CITE\]](#) Does this work to get gmail password from someone`s computer if I add the key logger to their computer?

@DamienVC

Yes, it'll either steal it from the browsers if saved, or keylog it

There's a smart way to do this too. Delete cookies (func in AutoLOG) & they're forced to retype it and its keylogged.

(Aug 18, 2016 12:11 PM)Ren4issance Wrote: [\[CITE\]](#) Works Perfectly, and support answering quickly. Approved.

No, the product works. People easily read the readme & they were able to do it. I'm on skype rn,
can handle questions/setups.

(Aug 19, 2016 03:10 PM)Brad007 Wrote: [\[CITE\]](#) Thanks for the product. Would get em
Alright

(Aug 19, 2016 01:30 PM)nolongthing101 Wrote: [\[CITE\]](#) what is the best crypter for this logger.. cyber

the server.

OK

Replied on PM

(Aug 19, 2016 09:30 AM)DynastyX_ Wrote: [\[CITE\]](#) I have tried adding you on Skype to buy the
program but nothing.
I'm not there "all" the time, on it rn though

evaanna - August 20, 2016, 3:26 pm
I once bought this tool. Very nice, so cool.

waltervenza - August 22, 2016, 1:28 am

Autolog has not been able to report any installed logs.

i only gets the first message that autolog has been installed that passwords and logins will be sent to me shortly and i have waited for countless days still nothing shows up.

i always have 7/35 for anti-virus scans.

autolog is not know to do the work its says.

please i will be needing a refund.

thank you

malek00810 - August 22, 2016, 2:21 am

Website offline ? I can't buy it

DamienVC - August 22, 2016, 3:38 am

It is 100% clear that you never read any shit that has been given alongside.

DO NOT use the damn notification email, else other logs will be blocked & wont come. This has been written everywhere, Readme, Tutorial, and on my skype mood messages - literally everywhere and you did the EXACT opposite.

Plus, where are you scanning? I bet its VirusTotal or some forbidden site (which actually fucks up the whole stub for everyone, thanks) which distributes the stub, customers have been getting 2-4 on NoDistribute. Furthermore, we still only have advertised it as 90% FUD, while it has actually delivered better than or around that.

(Aug 22, 2016 02:21 AM)malek00810 Wrote: [\[CITE\]](#) Website offline ? I can't buy it
Seems like both Selly & Sellnow are offline rn.

(Aug 20, 2016 03:26 PM)evaanna Wrote: [\[CITE\]](#) I once bought this tool. Very nice, so cool.
Thanks, finally someone who understands.

malek00810 - August 22, 2016, 12:54 pm

Where can i buy it ? I want to buy :D

Sharifat - August 22, 2016, 12:58 pm

Salut bro. I need the AUTOLOG. contact me at sharifatgaber@netcourrier.com

DamienVC - August 23, 2016, 2:12 am

Changed all links to RocketR now, you will be able to purchase it directly from the site!

malek00810 - August 23, 2016, 2:58 am

(Aug 23, 2016 02:12 AM)DamienVC Wrote: [\[CITE\]](#) Changed all links to RocketR now, you will be able to purchase it directly from the site!

I've bought it but cant download ?

SIM-3258478 - August 23, 2016, 10:41 am

I am interested in buying it as well, using the rocketr links how is the download delivered?

c30c39 - August 23, 2016, 4:50 pm

Hi Autolog crew ! I am using your program since two weeks, everything was fine and good till I start testing the keylogger on Virtual machine, Then an error occurred, I can't login because of error: Access denied, machine or ip limit has been reached. Can you help me with that problem ?

xsilverdicex - August 24, 2016, 1:50 am

anyone else getting Net seal Application error only with Autolog?

Net seal working with all other programs just not auto log

Error:

Authenticator: 2.2.0.8, Loader: 2.0.0.6]

Update metadata is corrupt.

System.Exception
at #l.#is.#nj()

c30c39 - August 24, 2016, 1:55 am

(Aug 23, 2016 10:41 AM)v3rd1ct Wrote: [\[CITE\]](#) I am interested in buying it as well, using the rocketr links how is the download delivered?

After one bitcoin confirmation you get download link on the mail and license number, then you redeem your licence number and that is all.

(Aug 24, 2016 01:50 AM)xsilverdicex Wrote: [\[CITE\]](#) anyone else getting Net seal Application error only with Autolog?

Is .NET updated? Plus, make sure your AVs are off and you're running the program as admin

augustine99 - August 25, 2016, 9:10 am

DamienVC ,

when i test my stub it works very well,but my problem now is it doesn't come up when i shutdown or restart my pc.

The logs won't come up again.

i do receive logs once.

what will be the issue.

My problem with Autolog now is start up issue, i will receive log on my tested pc,once i shutdown the logs won't come up again. i think the startup is not functioning very well,

Or is it any other things that course the problem.

Please advice on it.

plogs - August 26, 2016, 10:17 pm

how effective is this logger?

TrueLarseehy - August 27, 2016, 3:47 pm

My AutoLog is Working but if i try any email for the stub its not working and giving me error

tbgemini2 - August 27, 2016, 4:22 pm

recovery is poor, this is one problme with this logger

DamienVC - August 28, 2016, 12:00 pm

(Aug 27, 2016 04:22 PM)tbgemini2 Wrote: [\[CITE\]](#) recovery is poor, this is one problme with this logger

Hey, it works. Want me to come on TV and show that?

Smh

(Aug 27, 2016 03:47 PM)TrueLarseehy Wrote: [\[CITE\]](#) My AutoLog is Working but if i try any email for the stub its not working and giving me error

Turn off notification email mate.

(Aug 26, 2016 10:17 PM)plogs Wrote: [\[CITE\]](#) how effective is this logger?

Pretty effective, once the basics are learnt.

(Aug 25, 2016 09:10 AM)augustine99 Wrote: [\[CITE\]](#) DamienVC ,

I also wonder why he's getting that error

Waggy - September 4, 2016, 10:07 am

What is a good email provider for the keylogger ? without it getting spam filtered or that didnt block autolog yet

??I?????? - September 5, 2016, 12:31 am

This whole issue is getting frustrating all the email provider keep requesting for password change and once change all connections will be lost, something has to be done about this,some keyloggers i have used on this forum previously don't have this issue even when your password is change you still recieve your logs if this functions can be implemented that will be good.

Autolog, i have search for Olympic Crypter and SerkanCrypter can't find there sales thread advice.Leave it, seems like a retard advised Serkan to me and it doesnt seem

that good.

salmonella121 - September 8, 2016, 8:25 am

hi i have ordered a stub way ago and used it, i was good
the detection i get from the keylogger is 2, anyway to make it FUD?

DamienVC - September 8, 2016, 8:26 am

(Sep 8, 2016 08:25 AM)salmonella121 Wrote: [\[CITE\]](#) hi i have ordered a stub way ago and used it, i was good

the detection i get from the keylogger is 2, anyway to make it FUD?

Sorry but no, we've contained it around 3 for a while now and its kinda hard with a lot of members.
Might do a crypter addon included with the last 3 packages, to get the detections down to 0/1.

salmonella121 - September 8, 2016, 8:27 am

ok and alright is there any way to remove the detections labelled GEN kazy bary zusy etc etc

max.crawford - September 8, 2016, 8:30 am

Hey I've left you an email, need to get in touch regarding some private code. Do you still offer silent exploit?

darkman121 - September 8, 2016, 10:01 am

(Sep 8, 2016 08:27 AM)salmonella121 Wrote: [\[CITE\]](#) ok and alright is there any way to remove the detections labelled GEN kazy bary zusy etc etc

use good icon from iconfinder and add random text in assembly editor

all gen will go away

Kornflex - September 8, 2016, 4:41 pm

Tried and tested.

Stub gets 4/35 which is good for me because I have access to my machines and can control the install process.

Logs are very clean and easy readable and reach my email account right on time.

Desktop screenshots have the size between 300 and 450 kb and are also clean and good looking.

I sent a PM to OP and amazingly, I received the answer in about 10 minutes or so. The question was asked because I had some technical issues with my laptop.

I'll keep you informed about this product.

So far so good, really can't complain.

OP GLWS!

Cheers!

donat2013 - September 10, 2016, 2:29 am

Hello, are you working on the ftp delivery? as i don't know the good email delivery.
my email is always asking me to change password.

Please if ftp deliver is not working can you recommend an email provider for me?

stephensking - September 10, 2016, 8:34 am

(Sep 10, 2016 02:29 AM)donat2013 Wrote: [\[CITE\]](#) Hello, are you working on the ftp delivery? as i don't know the good email delivery.

i agree! +1

donat2013 - September 10, 2016, 10:08 am

After executing i got this error message. Please check <https://imgur.com/a/33HTT>

I used the recommended setting, nothing was added.

The tested stub only bring execution report,, no new log.

P4r4docs - September 11, 2016, 1:21 am

Thanks for the update about mail server settings, very helpful indeed, although I haven't had any problems using yandex mail like other users are experiencing.

MEGA VOUCH for this keylogger. this is the one and only keylogger you should ever need. ALL FREE KEYLOGGERS ARE USELESS CRAP (in my opinion).

And a big thanks to DamienVC, who gave me a discount on a lifetime subscription after paying \$50 for two months to test the product. Friendly, helpful, and QUICK!

? GLWS ?

Zexus99 - September 11, 2016, 3:06 am

I bought that keylogger yesterday and it's amasing

Big VOUCH for that product !

stevesmith - September 11, 2016, 3:09 pm

Bought this product with 6 months license. Will review once i test it out

SIM-3258478 - September 12, 2016, 6:48 pm

Is this keylogger's stub FUD? I have tried MetroLog (detected) and HawkLogger (runtime and scantime undetected) but it was not really stable (screenshots were not coming through, and email log was not all that great). I am looking to evaluate this, basically trying to do a PoC for work to prove out that Microsoft's FEP (forefront endpoint protection a/v) is not enough.

Are you able to confirm its scantime/runtime FUD? I am interested in the .doc macro creation guide as well; does it work for Win10/Office2016 + UAC?

Codefuser - September 12, 2016, 7:22 pm

(Sep 12, 2016 06:48 PM)v3rd1ct Wrote: [\[CITE\]](#) Is this keylogger's stub FUD? I have tried MetroLog (detected) and HawkLogger (runtime and scantime undetected) but it was not really stable (screenshots were not coming through, and email log was not all that great). I am looking to evaluate this, basically trying to do a PoC for work to prove out that Microsoft's FEP (forefront endpoint protection a/v) is not enough.

Are you able to confirm its scantime/runtime FUD? I am interested in the .doc macro creation guide as well; does it work for Win10/Office2016 + UAC?If you want to test FEP, I can tell you the answer: It is not enough. I can probably bypass it in like 10 minutes.

ken0man - September 13, 2016, 1:50 am

autolog is the best keylogger i have ever come across. i have never had issues with yandex mail + autolog as well, i wonder why other users are having issues with yandex mail. Thumbs up to you damiencv.

All i need now is a 100% fud doc/pdf exploit (cheaper rate) to work with autolog. Damienvc i hope you are coming up with doc exploit soonest

MasterRankam - September 13, 2016, 5:37 am

Please, someone answer my question, I'm not sure buying and I do not see at the moment that someone was active.

sry for my ENG

SIM-2053312 - September 14, 2016, 6:02 pm

I have bought this program with Bitcoins but I have not received the license or the email I was suppose to get upon delivery. I have sent you 3 Private Messages regarding this. Thx

I have took a screenshot of the wrong BTC transaction which I sent to rocktr for your program, I have just sent you another PM which is a total of 4 PMs I have sent you. Awaiting license/program, thanks once again

DamienVC - September 16, 2016, 3:42 am

(Sep 8, 2016 08:27 AM)salmonella121 Wrote: [\[CITE\]](#) ok and alright is there any way to remove the detections labelled GEN kazy bary zusy etc etc

Use a HQ icon & assembly info.

(Sep 8, 2016 08:30 AM)max.crawford Wrote: [\[CITE\]](#) Hey I've left you an email, need to get in touch regarding some private code. Do you still offer silent exploit?

I'll reply to your email, kind of busy right now so can't handle the stuff. Silent exploit sales will be resumed sometime in the future so you can subscribe to its thread to be notified when it does.

(Sep 8, 2016 10:01 AM)darkman121 Wrote: [\[CITE\]](#) use good icon from iconfinder and add random text in assembly editor

all gen will go awayThanks.

(Sep 8, 2016 04:41 PM)Kornflex Wrote: [\[CITE\]](#) Tried and tested.

Stub gets 4/35 which is good for me because I have access to my machines and can control the install process.

Logs are very clean and easy readable and reach my email account right on time.

Desktop screenshots have the size between 300 and 450 kb and are also clean and good looking. I sent a PM to OP and amazingly, I received the answer in about 10 minutes or so. The question was asked because I had some technical issues with my laptop.

I'll keep you informed about this product.

So far so good, really can't complain.

OP GLWS!

Cheers!

Thanks for the vouch mate, we cant handle much about detections due to the fact we have a large userbase but I have plans with some future updates & a possible reFUD with USG

(Sep 10, 2016 02:29 AM)donat2013 Wrote: [\[CITE\]](#) Hello, are you working on the ftp delivery? as i don't know the good email delivery.

my email is always asking me to change password.

Please if ftp deliver is not working can you recommend an email provider for me?

Mate FTP does work and so does email. Email:

<https://hackforums.net/showthread.php?tid=5291787&pid=51465238#pid51465238>

FTP isnt included as much people dont use it, I can edit the post when I'm back home.

(Sep 10, 2016 08:34 AM)stephensking Wrote: [\[CITE\]](#) i agree! +1

I suggest you to use mail.ru or Yandex if it works (unconfirmed on Yandex)

(Sep 10, 2016 10:08 AM)donat2013 Wrote: [\[CITE\]](#) After executing i got this error message. Please check <https://imgur.com/a/33HTT>

I used the recommended setting, nothing was added.

The tested stub only bring execution report,, no new log.

I'd request you to PM me (HF PM, yeah) with the screenshots of the first three tabs.

I dont have access to Skype rn.

(Sep 11, 2016 01:21 AM)-eNLiL- Wrote: [\[CITE\]](#) Thanks for the update about mail server settings, very helpful indeed, although I haven't had any problems using yandex mail like other users are experiencing.

MEGA VOUCH for this keylogger. this is the one and only keylogger you should ever need. ALL FREE KEYLOGGERS ARE USELESS CRAP (in my opinion).

And a big thanks to DamienVC, who gave me a discount on a lifetime subscription after paying \$50 for two months to test the product. Friendly, helpful, and QUICK!

? GLWS ?

Thanks for the vouch mate. Haven't been online lately as I'm just reconfiguring my setup & out of town for a few days while its done. Will be available on Skype as soon as I come back.

Thanks again for being a loyal customer.

(Sep 11, 2016 03:06 AM)Zexus99 Wrote: [\[CITE\]](#) I bought that keylogger yesterday and it's amasing Big VOUCH for that product !

Are you able to confirm its scantime/runtime FUD? I am interested in the .doc macro creation guide as well; does it work for Win10/Office2016 + UAC?

It is not FUD, but the rates have been at 3-4 lately and that's better considering other ones with are .NET and having over 10 detections. The DOC exploit is just complimentary, it works on Win10 & Office 2016 & with UAC (depending on whether your stub has admin requirements or not)

(Sep 13, 2016 01:50 AM)ken0man Wrote: [\[CITE\]](#) autolog is the best keylogger i have ever come across. i have never had issues with yandex mail + autolog as well, i wonder why other users are

More logs with passwords and information will come soon right after successfully installation of the keylogger, which can take a few minutes (that always belongs on how fast the pc and its internet connection is)

If you don't receive any further emails than this one, it could mean that the installation has failed. Maybe the Av has blocked it or something else went wrong. In this case just wait a bit longer. Especially when you have choosed many recovery options such as skype database (which can be up to 80MB or even more) which is too big for some email provider to be send (or it takes very long)

If you still don't receive logs, even after restart of the target pc. You may should read the readme file again, to get sure you did nothing wrong or you contact the support, but please be patient.

3 hours waiting I already do all password ooVoo and skype and possibly firefox facebook and all etc.

the problem of long no work keylogger and scerrnshot logger , webcam logger, ip logger , clipoard tealer He has not received email yahoo

DamienVC - September 24, 2016, 8:20 pm

You are making no sense in speaking.

You are sounding stupid yourself as you aren't disabling the DAMN notification email then how the

fuck do you expect it to work?

Not to mention checking up all the functions that are OS specific and then complaining it doesn't work, plus your English is shit so I have to read four times to understand what you actually meant.

augustine99 - September 24, 2016, 11:58 pm

once computer shuts down or restarts, i don't get reports anymore despite. report is just that first moment - i don't get any when computer shuts down and restart. which button i "add to start up" what can i do to make sure my stub starts reporting when computer restarts?

Please that is the issue am facing with your keylogger

chikeluba2 - September 25, 2016, 12:11 am

the autolog can't open on my system it keep asking me for update

cant wait for you - September 25, 2016, 2:12 am

amazing service

i will try this soon

DamienVC - September 25, 2016, 9:34 am

(Sep 24, 2016 11:58 PM)augustine99 Wrote: [\[CITE\]](#) once computer shuts down or restarts, i don't get reports anymore despite. report is just that first moment - i don't get any when computer shuts down and restart. which button i "add to start up" what can i do to make sure my stub starts reporting when computer restarts?

Enable add to startup & hidden startup.

Make sure that notification email isn't enabled.

(Sep 25, 2016 12:11 AM)chikeluba2 Wrote: [\[CITE\]](#) the autolog can't open on my system it keep asking me for update

You need to update it to come towards the latest version

?

So exist any fud runtime keylogger + crypter ?

for 100\$?

200\$?

300\$?

step1step2 - September 26, 2016, 2:45 pm

Any way to use this without an executable file? I hardly doubt by target wants to open an executable.

Only way I can image is when it's added to valid executable and the target has a viable reason to open it. Last one is is anyone's guess.

Last but not least I've got two questions for you...

Is it possible to delay the restart requirement message? It's so fishy right after the executable got executed.

Will I receive anything in case a software manages to block the thread?

Bugsplat - September 26, 2016, 4:10 pm

Sweet product bro. I'll have to pick it up some time.

DamienVC - September 26, 2016, 11:11 pm

Temporarily turned off autoupdate so that everyone's versions will work fine while I resolve server issues.

(Sep 26, 2016 02:45 PM)step1step2 Wrote: [\[CITE\]](#) Any way to use this without an executable file? I hardly doubt by target wants to open an executable.

Restart requirement only happens when the functions are admin & require it. Doesn't usually happen with AutoLOG so just avoid admin funcs to be safe as they interfere with the Action Center.

You can use the DOC exploit provided alongside, the document can be modified as per your liking to make it convincing for them to "Enable Content"

You can masquerade the EXE file as a part of a setup package as well to make the target open it.

(Sep 26, 2016 11:06 AM)Sexy19941 Wrote: [\[CITE\]](#) So exist any fud runtime keylogger + crypter ? for 100\$?

200\$?

300\$?

You could easily get private runtime + scantime FUD crypts alongside a good native keylogger around \$100-\$150

Hard to maintain keylogger's runtime FUD due to large userbases, doubt so nobody in the market provides runtime FUD in the sale version.

(Sep 26, 2016 10:52 AM)Zexus99 Wrote: [\[CITE\]](#) Same, we have to wait ? Fixed

Sry for my english1. Scantime mostly, runtime AVs happen to be more agile. I suggest using a crypter

2. Not directly but using a crypter would be preferable.

3. DataProtector, it does give a good stealth approach. You can also try CyberSeal.

4. RATs & Keyloggers are relatively the same when it comes to executions just that RATs lag after a certain thousand in amount and keyloggers don't have a problem with the number infected. You can easily use a keylogger without having to portforward while you'll need to setup a DNS/etc for a RAT (for those who find it hard)

ej247 - September 27, 2016, 12:09 am

Hello DamienVC,

The key logger is not FUD, Does it mean i can send it out like that? Or should i make use of

crypter?????

royalhacker86 - September 27, 2016, 4:41 am

Hey guys i f anybody wants full version of key logger just mail me @ royalhacker86@gmail.com

philwilson - September 27, 2016, 4:59 am

Please i need to know if there is any update as regarding the UAC bypass. Does the UAC bypass work for Windows 8 - 10 ?Thank you.

step1step2 - September 27, 2016, 4:31 pm

(Sep 26, 2016 11:11 PM)DamienVC Wrote: [\[CITE\]](#) Restart requirement only happens when the functions are admin & require it. Doesnt usually happen with AutoLOG so just avoid admin funcns to be safe as they interfere with the Action Center.

I highly suggest using a crypter, DataProtector works fine

(Sep 27, 2016 04:59 AM)philwilson Wrote: [\[CITE\]](#) Please i need to know if there is any update as regarding the UAC bypass. Does the UAC bypass work for Windows 8 - 10 ?Thank you.

I have a UAC bypass that works upto Win8.1 but haven't fully implemented it yet as it corrupts the end code of the stub. Hence the current one is the same exploit for the Win7 version

(Sep 27, 2016 04:31 PM)step1step2 Wrote: [\[CITE\]](#) I've got an excel file the target might want.

Does it work for excel files as well?

What if the target decides to upload the spreadsheet to Google instead?

Nopes, I was into the XLS part though, might upgrade the bonus exploit to include DOC & XLS when I'm done with it. I'll let you know then

Uploading to Google might bypass code execution.

(Sep 28, 2016 06:30 AM)elruso Wrote: [\[CITE\]](#) the cookie stealer work? as cookies are entered in the browser?

Yes, the cookies implemented in one's browser is stolen & can be implemented into another browser on any PC.

@Keylogger send me a PM and try clarifying what you want.

<https://hackforums.net/private.php?action=send&uid=2334861>

I'm not up for name-calling & hurling abuses, so if you're wanting to do that, I'll be happily inclined to ignore you - but if you have genuine product questions, then do ask them as I know you're not using the product correctly.

There are certain MEASURES you need to take for the keylogger to work on WinXP (not to mention Win7 targeted exploits being used in the wrong place), and similar configs with RDPs & VM systems. Hence I will request you to take this issue to a private communication platform where both of us can understand what you actually intend to say.

Keylogger - September 28, 2016, 10:35 am

batfire - September 29, 2016, 9:01 am

Purchased that product twice; but the main problem I'm facing is that I cannot see the password on the logs or I see them by looking hardly in the logs i received.
I can see a login but i don't see its password.
Can you improve that function please?

suNk1z - September 29, 2016, 12:13 pm

Does this work via Facebook chat?? I really want to know that :)

PM me if it's possible.

elruso - September 29, 2016, 12:31 pm

cookies in format are? They are in json?

It can be used EditThisCookie? for cookies?

SIM-2053312 - September 29, 2016, 2:52 pm

What is the best email client/provider to use with this keylogger?

Can you please tell me all the correct settings to use with this program so everything works 100%? I heard ur only suppose to do hourly intervals and dont put stub execution notification on. So is there any more? All i want is the keylogger + startup + cookie stealer + mutex options. I also want to bind this in a RAT but when I used this, I didn't and this didnt work.

What I did soecify was setup a mail.com email, sent a test email so I knew it worked. Then I enabled 10 min sending intervals. Disabled everything but those options I said above. After the first

keylog + cookies email I got nothing else. Please PM, T.V, or reply back on here how to set this up. Thanks in advance.

Dark Refuge - September 29, 2016, 9:49 pm

Only downside with this logger is that it doesn't work with encrypted emails such as cock.li none the less its a awesome one.

teekaygold - September 30, 2016, 12:40 am

Please i paid almost 50\$ for lifetime. I have not received my product and my bitcoin account has been debited. Please let me know how i can get my product ?

I can't send a PM. Please check your skype! i paid and can't get my keylogger!

MrAlex - September 30, 2016, 10:04 am

Mind explaining what and how the USB keylogger works?

suNk1z - October 2, 2016, 2:55 am

I just bought it, and got it to work, and for real, this is the best thing I've ever used, and I still don't know a lot about this kinda stuff. :)

AutoBEST.

linkups707 - October 3, 2016, 12:30 pm

Why doesn't it recover outlook passwords?

timdahacka - October 3, 2016, 8:09 pm

This is a great program but can I please get a refund. I've been asking for a while now. I just have no use for it and when I do try to use it, it either gets detected or it just doesn't run at all. (The Stub)

DamienVC - October 4, 2016, 5:47 am

(Sep 29, 2016 09:01 AM)batfire Wrote: [\[CITE\]](#) Purchased that product twice; but the main problem I'm facing is that I cannot see the password on the logs or I see them by looking hardly in the logs i received.

I can see a login but i don't see its password.

Can you improve that function please?

It steals all data saved on the browser i.e host URL & username/password (either can not also exist too)

(Sep 29, 2016 12:13 PM)suNk1z Wrote: [\[CITE\]](#) Does this work via Facebook chat?? I really want to know that :)

PM me if it's possible.

If its crypted and DOC exploit used, it can be done

(Sep 29, 2016 12:31 PM)elruso Wrote: [\[CITE\]](#) cookies in format are? They are in json?

It can be used EditThisCookie? for cookies?

Yes

(Sep 29, 2016 02:52 PM)Chef Curry Wrote: [\[CITE\]](#) What is the best email client/provider to use with this keylogger?

Z3thing - October 8, 2016, 3:32 pm

I recently bought autolog and I'm loving it. The only issue I'm having is the steam data not being sent.

I heard there was a private version of the program for sale. How much does this cost, and how can I get it?

Thanks!

DamienVC - October 8, 2016, 11:35 pm

(Oct 8, 2016 03:32 PM)Z3thing Wrote: [\[CITE\]](#) I recently bought autolog and I'm loving it. The only issue I'm having is the steam data not being sent.

Thanks mate, Steam data is only sent in case the vdf/config/ssfn files are there. In case of using Steam Delete, those files are removed to force a relogin attempt, hence overlapping both functions doesnt work properly.

We used to sell private stubs & private builders at a higher price than the normal rates having more functions & a maintained FUD rate.

Z3thing - October 9, 2016, 1:17 am

Thanks for the reply! That would explain the problem then, I'm pretty sure I had both of those selected when I built the stub.

If private builds ever come back, I would be very interested in purchasing one.

Thanks for the amazing program!

elruso - October 9, 2016, 6:24 am

The steam boiler does not work !, to been proven in 3 teams and no data to send e-mail. folder

contains steam files and folder keylogger too. but they are not sent!

only send password, keylogger, logs, and cookies

DamienVC - October 10, 2016, 2:16 pm

Alright here, Skype fucked up and we both know thats the part here. I've shown you proof that your claim doesn't happen, and the several customers don't lie.

As I told, try the solution I recommended, and I'm not going anywhere. We're here for the clientele, and will never run off on them unlike other keyloggers which did.

Also product is not "poor" in everything, your words seriously berate the product just because you didnt get it to work and countless others did. But still, we're willing to help our customers, passwords & keylogs proof has been shown (test made today). As told, try using IsPressed for a change.

(Oct 11, 2016 05:49 AM)rooneyleo Wrote: [\[CITE\]](#) autolog always bossing used just once but has my vouch

Thanks mate legit customer.

UPDATE: DOC, XLS & PDF exploits are going to be available soon.

We already provide compatible XLS, DOC & PDF exploits* with AutoLOG. Updating designs soon

* PDF's with limited usage.

softprofit - October 13, 2016, 4:04 pm

The xls,doc and pdf is it inbuilt?

The updates is it available now?

DamienVC - October 13, 2016, 4:48 pm

(Oct 13, 2016 04:04 PM)softprofit Wrote: [\[CITE\]](#) The xls,doc and pdf is it inbuilt?

The updates is it available now?

Not inbuilt, exploit mechanism is external, so you can use it with any other third party JAR or EXE too.

PDF is limited usages for the members alongside the lifetime pack.

jessy007 - October 14, 2016, 1:38 am

Please i am interested in getting AutoLog Keylogger. How do i get it?

Please is there an email i can use to contact you privately? i need the AutoLOG Keylogger .

Thanks mate, a few updates are in the works right now, just dont have much time so its a bit delayed.

Updated changelogs, GFX update coming soon.

Planned update includes UAC Bypass Win 7 to 10 x86 & x64

Just bypassed Avast runtime easily with the current stub. ?

Generated stub:

<http://NoDistribute.com/result/image/VOsbEZe35q48tNv0.png>

DOC exploit:

<http://NoDistribute.com/result/image/xRM7oCj3KvTEVbBNmalP150s.png>

XLS exploit:

<http://NoDistribute.com/result/image/dsD2LuReEBT1XCl6MW8Jc57.png>

PDF exploit:

<http://NoDistribute.com/result/image/AYdPro6kiyEbRB37Tq9g5Fe8fQ.png>

Mons - October 15, 2016, 3:57 pm

Amazing keylogger you have there, Damien.

PS: Very nice design.

DamienVC - October 16, 2016, 1:53 am

AutoLOG is relatively easy to use, the steps it takes is just setting up your email (using an existing one is fine, but I prefer a new one), and then testing the email, and building with recommended settings. Thats pretty easy for the typical user.

(Oct 17, 2016 11:16 AM)ganstephanos Wrote: [\[CITE\]](#) I wanted to ask whether you guys planned to increase compatibility of special hide process from taskmanager

Hide Process will be concentrated on the next update alongside with tuning the keylogging function. We are currently focusing on UAC exploit & PW stealer.

Doesnt seem he's online rn though.

Dillerhans - October 18, 2016, 10:52 am

I can only get it to infect if I choose run as admin? Which I highly doubt the end-user will do

garymuwaut - October 18, 2016, 11:14 am

does doc exploit work with open office macros?

DamienVC - October 18, 2016, 11:14 am

(Oct 18, 2016 10:52 AM)Dillerhans Wrote: [\[CITE\]](#) I can only get it to infect if I choose run as admin? Which I highly doubt the end-user will do Nah, basic funcs dont require admin, and we have a UAC exploit (currently for win7 but all windows to be implemented in a few days), so admin req's aren't even a worry by then

Codefuser - October 19, 2016, 12:27 am

Hi, I am the new AutoLog developer and I am excited to announce news regarding the next update.

Features added: Added Windows and Microsoft Office key recovery for secondary stealer

UAC bypass working on all Windows (Except 1 version of Windows 10). This exploit is FILELESS and not runtime detected.

New obfuscator is being added, this will improve your security and remove some detections.

Features removed: Removed Notification Email as it was buggy and served no purposes

Features Improved: Slight modification and improvement of the Antivirus Killer

Modification of Persistence

UAC bypass working on all Windows (Except 1 version of Windows 10)

7 - October 19, 2016, 12:36 am

23rd October

Update log:

(Oct 19, 2016 12:27 AM)Codefuser Wrote: [\[CITE\]](#) Hi, I am the new AutoLog developer and I am excited to announce news regarding the next update.

Features added:Added Windows and Microsoft Office key recovery for secondary stealer

UAC bypass working on all Windows (Except 1 version of Windows 10). This exploit is FILELESS and not runtime detected.

New obfuscator is being added, this will improve your security and remove some detections.

Features removed:Removed Notification Email as it was buggy and served no purposes

Features Improved:Slight modification and improvement of the Antivirus Killer

Modification of Persistence

UAC bypass working on all Windows (Except 1 version of Windows 10)

salmonella121 - October 19, 2016, 8:39 am

nice to see it happy to be autologger customer

good, i get a lot of infection NATIVE keylogger

craggie.barzelay - October 19, 2016, 8:53 am

hello best to see autologger doing well

best keylogger in the world

i will like to place order for 2 licenses.

Thanks, can't wait for the update ?

ken0man - October 19, 2016, 11:20 am

damienVC, i need you to make this clear. are your upcoming exploits going to be macro or silent?

DamienVC - October 19, 2016, 11:37 am

(Oct 19, 2016 11:20 AM)ken0man Wrote: [\[CITE\]](#) damienVC, i need you to make this clear. are your upcoming exploits going to be macro or silent?

Exploits provided alongside AutoLOG will be macro, written in ToS too since for a max price of \$45 you can't expect a fully silent FUD exploit, we will be offering silent exploits at an additional rate.

Codefuser - October 19, 2016, 7:14 pm

I have also added a license key recovery utility that is a part of the secondary stealer.

DamienVC - October 19, 2016, 7:25 pm

(Oct 19, 2016 07:14 PM)Codefuser Wrote: [\[CITE\]](#) I have also added a license key recovery utility that is a part of the secondary stealer.

271 total license keys will be recovered

Thanks Mate.. Great support.

darkman121 - October 20, 2016, 6:44 am

autolog is the best keylogger in the world

for a price of 15-45\$
you get the following:

- three exploits alongside it, completely FUD.
- native keylogger at such a cheap rate, can infect win 98 to win10 with NO problem unlike other SHITTY keyloggers which need .net framework to run, autolog stubs run anywhere !
- LARGE password effecnt recovery
- effective ANTIVIRUS killer, i cant even open my Avira or Avast tests on my VM haha
- EVEN STEALS WIFI SAVED PASSWORDS, AWESOME!
- stub is not good on detections but update is said to come soon, and private stub service was 100% good when i used it, 100% FUD stubs
- screenshot trigger really efficient and good

Overall AUTOLOG is the best keylogger i have used so far, thanks

max.crawford - October 20, 2016, 6:47 am

there really is nothing to replace autolog, it has been on for so much months, by the time other people would have ran off with their projects, autolog delivered upto its promises.

We customers are really satisfied.

Confirmed yandex is working rn, gmail has issues

ken0man - October 20, 2016, 8:05 am

damienVC, it is clear you have a team of expert and talented coders, why don't you guys convert autolog to a HQ http/https botnet (e.g. betabot, zeus, citadel etc) + all autolog's current and future features added to it (with prizes not changed ?).

Besides, i'm patiently waiting for your silent exploits release.

You and your team should work on my 2 requests please.

DamienVC - October 20, 2016, 8:58 am

(Oct 20, 2016 08:05 AM)ken0man Wrote: [\[CITE\]](#) damienVC, it is clear you have a team of expert and talented coders, why don't you guys convert autolog to a HQ botnet + all autolog current and future features added to it (with prizes not changed).

Besides, i'm patiently waiting for your silent exploits release.

You and your team should work on my 2 requests please.

Botnet will require a webpanel, will require more stuff i.e. webpanel, security tests. Botnets also include a lot of tasks like DDoSing, etc which is more preferable in a language like C++ instead of AutoIT. We may release a fully coded secure botnet soon, but as you may know, a botnet isn't an easy task to do, and it will require time.

We will be releasing a free macro builder with AutoLOG in the new update, and we will work on the silent exploit soon. Raymond is the designated member who deals with silent exploits, and he hasn't been online lately.

Releasing a webpanel is a easy task, yeah but releasing a 100% secured webpanel isn't a easy thing to do. Many HF products have been known for having existing exploits within webpanels that can be used to triangulate the malware spreader, expose the customer database & several more stuff that can potentially backtrace to our users. We were working on an AutoIT RAT alongside Dr.Overflow but he's on a long break so that project was abandoned mid-development. Might release existing version for free, perhaps.

ken0man - October 20, 2016, 9:15 am

ok bro i understand, i believe you guys can do it, waiting for your updates. autolog remains the best keylogger.

11MalEfiC11 - October 20, 2016, 1:08 pm

How often does the logger send emails after the person is infected? Is it 24 hours after they ran it for the daily logs? Because im not getting my emails and i set it all up right

DamienVC - October 20, 2016, 1:21 pm

(Oct 20, 2016 01:08 PM)11MaEfiC11 Wrote: [\[CITE\]](#) How often does the logger send emails after the person is infected? Is it 24 hours after they ran it for the daily logs? Because im not getting my emails and i set it all up right

Emails are dependent on your logs, turn off notification msg to receive logs.

(Oct 20, 2016 09:15 AM)ken0man Wrote: [\[CITE\]](#) ok bro i understand, i believe you guys can do it, waiting for your updates. autolog remains the best keylogger.

maggie_grace - October 23, 2016, 5:23 pm

Sorry to bother you in this thread, but I might have some serious question.

I have a problem with synchronizing AutoLog with CyberSeal. Everytime I use a CyberSeal to crypt the stub generated by your keylogger, while using in-built CyberSeal binder to attach stub to .pdf document I get the following problem.

The attached file is constantly showing up after the system is restarted. It just tend to pop up everytime Windows is restarted (Win7), tested this on SandBox and test computer.

I did not choose an option in CyberSeal to add the crypted file to start up, neither did I choose the binded file to start up. All I did was just select the option in AutoLog for: StartUp + Hidden Startup, and yet I get this .pdf document popping up time and again.

Did I do something wrong or is it some sort of bug that I can report to you ?

Zexus99 - October 23, 2016, 8:00 pm

thanks

Also, about the downloader, it just downloads and runs the file once in the first execution or whenever it gets started with window ?

It only logs the key so it would be something like "ddaa laf mootj baif" instead of that.

And the downloader only runs on the first execution.

garymuwaut - October 24, 2016, 4:30 am

when you select both "delete cookies" and "recover passwords" options, does it recover passwords before deleting them?

Codefuser - October 24, 2016, 5:37 am

(Oct 24, 2016 04:30 AM)garymuwaut Wrote: [\[CITE\]](#) when you select both "delete cookies" and "recover passwords" options, does it recover passwords before deleting them?

Cookies is different from passwords. Only cookies will be removed and not the saved passwords.

garymuwaut - October 24, 2016, 5:39 am

thank you a lot for clearing that up!

?

Update has been released & thanks for your patience & support.

(Oct 23, 2016 05:23 PM)maggie_grace Wrote: [\[CITE\]](#) Sorry to bother you in this thread, but I might have some serious question.

I have a problem with synchronizing AutoLog with CyberSeal. Everytime I use a CyberSeal to crypt

the stub generated by your keylogger, while using in-built CyberSeal binder to attach stub to .pdf document I get the following problem.

The attached file is constantly showing up after the system is restarted. It just tend to pop up everytime Windows is restarted (Win7), tested this on SandBox and test computer.

I did not choose an option in CyberSeal to add the crypted file to start up, neither did I choose the binded file to start up. All I did was just select the option in AutoLog for: StartUp + Hidden Startup, and yet I get this .pdf document popping up time and again.

Did I do something wrong or is it some sort of bug that I can report to you ?

Compatibility with CyberSeal does specify some terms. I suggest you to turn off all the features in AutoLOG (like startup, persistence etc) and only use core features (keylogger, PW stealer, screen/snap loggers, etc) and crypt with CyberSeal and enable startup, etc on the crypter instead of AutoLOG. It'll work fine then.

(Oct 23, 2016 08:00 PM)Zexus99 Wrote: [\[CITE\]](#) The problem is not about AutoLog but about CyberSeal. Contact the crypter owner and tell him your problem(s) ?
CyberSeal owner would say the same solution.

(Oct 24, 2016 02:11 AM)OnlyLee Wrote: [\[CITE\]](#) one more question, does autoLog give log in Vietnamese, something like "dây là mot bài kiểm tra" ?
thanks

Also, about the downloader, it just downloads and runs the file once in the first execution or whenever it get starts with window ?

No we do not have Vietnamese support yet but I will keep it as a priority for future updates.

Downloader drops the file once executed, the file will run on startup if it has a startup func inbuilt. We have a multi-file downloader that will download all files you specify.

(Oct 24, 2016 04:30 AM)garymuwaut Wrote: [\[CITE\]](#) when you select both "delete cookies" and "recover passwords" options, does it recover passwords before deleting them?

Saved passwords are not deleted, cookies are the session data, which once deleted, will force the user to re-login. Now there are two options

(I) manually type the username/password & get keylogged.

(II) in case of saved password, it is recovered already.

It's normal the reg exploit builder make a sound when opening ? ?

darkman121 - October 24, 2016, 5:41 pm

thanks a lot for this update
was waiting weeks for it and its awesome

autolog is always the best keylogger and always will be

max.crawford - October 24, 2016, 5:42 pm

Just needed this, perfect it came on the time you promised. Always delivers in fast.
I will like to inquire about private exploits.

DamienVC - October 24, 2016, 5:45 pm

(Oct 24, 2016 05:41 PM)Zexus99 Wrote: [\[CITE\]](#) It's normal the reg exploit builder make a sound when opening ? ?

Yes, PDF also does. Same voice on building all of the exploits. ?
Could disable it in future updates, also didn't get the icons on them.

REG is a freebie, it requires sys restart to execute the stub on runtime though.
Feel free to test with putty.

Can't be working on exploits rn, V2.5.1 will be released next week with a major improvement to the built-in obfuscator that will render the stubs made 100% FUD.

max.crawford - October 24, 2016, 5:45 pm

Perfect plans for an update, I will look forward for a FUD stub for Autolog keylogger. Thanks.

Zexus99 - October 24, 2016, 6:44 pm

Amazing update, keep up the good work.

Please add a browser's history grabber. I am purchasing soon and really expect this.

And is there a solution for this :

in the very first day of November, i send my friend a stub, he runs the file and get keylogged. I feel happy with his password. However, 1 week later, i want to RAT him, so do i have any option in your keylogger to download my RAT on the internet and run it ?

You can see that i don't have my RAT prepared at first execution.

how does Webcam/screen logger work ? does it have any any interval ? (5 minute ?)

thank you.

Codefuser - October 24, 2016, 7:55 pm

Regarding the first question, if you have enabled the autoupdate feature, you can use it to update the keylogger with a binded stub of your RAT and the original kl file.

Screenshot is captured every 1000ms (or 1 seconds) last I checked.

OnlyLee - October 24, 2016, 9:09 pm

We might just add that in the next update, and auto-update function will work fine for that situation. You'll just need to know its basics (written in the Readme).

Webcam/screen logger takes snapshots/screenshots at the same time. You can specify the required intervals

ken0man - October 24, 2016, 10:56 pm

Autolog is really the number one keylogger on sales rn.

I am an old customer of the product, been using it for a while.

I just want to know how the "autoupdate" features really works, instruction is there in the "Readme" file but still don't understand how to go about it.

Do i need to create an empty "version.txt" file and write only "2" in it and nothing else then in my web folder i also add the "update.exe" (new stub i created)?

For example if my hosting link is www.link.com/autolog/ then i add "version.txt" and update.exe" files in "/autolog/" folder? then link will be www.link.com/autolog/update.exe ? what is the time interval for the update.exe to be download+executed? i don't think it is stated in the builder. How does the REG exploit execute? i added an exe link to it and created a stub, when i executed the stub putty didn't show up, it only says reg has been added.

DamienVC - October 25, 2016, 2:52 am

Thanks for the vouch, we are at #1 and are working hard to remain there (hopefully the native tag already puts a huge advantage over competitors), the readme is yet to be updated. Autoupdate works over HTTP, just have a directory on your webhost that has two files, update.exe & version.txt

Change value in version.txt to 2 and change the update.exe, the stub will get updated. Similarly change it to 3, 4, 5 .. so on replacing the exe file to keep on updating it

As such, you can RAT the user, or disinfect the user in the future

ken0man - October 25, 2016, 4:12 am

and is it HWD?

By HWD if you mean hardware, then no, its not a physical but a remotely installable keylogger. If you meant HWID, then there are 3 HWIDs allowed on all accs.

(Oct 26, 2016 09:43 AM)MrDuabi Wrote: [\[CITE\]](#) Hi,

Just gotten the premium. Would like to understand more on the PDF exploit. Tried on my end but don't seems to get it work, sent you Skype msg for support
Compatibility is for all versions of Foxit and v6-v9 of Adobe Reader, you just need to specify a direct link (pomf.cat)

(Oct 26, 2016 10:27 AM)qazooo Wrote: [\[CITE\]](#) i always getting error, then trying load on my pc:

Make sure you're using the compatible PDF versions (v6-v9 Adobe & all Foxit)

(Oct 27, 2016 02:23 AM)Donig Wrote: [\[CITE\]](#) i will buy this ... one day , i think this is a good keylogger . if anyone can give me a tip how to spread it ...

You can spread it via emails using PDF/DOC exploit, or to some certain people you want to infect. Or in general torrent spreading etc

yeyeyeik - October 27, 2016, 5:51 am

Just bought this, i have read instructions- double checked- triple checked. Tried gmail and mail. I can not get a test mail sent to me. And yes- i have the correct settings turned of on my gmail although auto log says the email was sent.

IntelCore8700K - October 27, 2016, 6:10 am

Just ordered this will update when I have the product.

Edit: Got the product tried it but when does it sends the passwords cause wasnt included with the

logs

yeyeyeik - October 27, 2016, 7:04 am

I managed to get email to work, not sure how, just started working. When the client or me opens it. I get my fake message however a second error comes up saying -
"Error: Variable used without being declared."

Codefuser - October 27, 2016, 8:07 am

Alright, since the update we had a few bugs in the program, mostly relating to PW recovery. Primary is fully fixed and secondary's fix will be sent today itself.

Certain people have been facing errors due to secondary, I will suggest disabling that till we send an update (identified 1-2 probs with it, in process of fixing them)

Rest assured, it has been working for me, other team members and customers personally. That is why we need your co-operation in identifying the related problem & fixing it immediately.

^ Latest update squashed all bugs with primary PW recovery, secondary works for approx 90% of the users but we've been getting bug reports hence we're dealing with it asap.

I'd also have to make note the following:

- *) If your skype database exceeds the attachment limit, problems may be caused.
- *) Make sure less secure / unknown apps is enabled on your email. Gmail blocks external IPs so use an offshore one if you're testing elsewhere
- *) If you're testing on a RDP/VM, try turning off Get Sys Info func
- *) Disable secondary recovery for the time being

(Oct 27, 2016 06:10 AM)Deadly050 Wrote: [\[CITE\]](#) Just ordered this will update when I have the product.

Edit: Got the product tried it but when does it send the passwords cause wasn't included with the logs

Passwords are dependent on your intervals, if you have it set at 2-3h then it will regularly send it alongside the logs.

(Oct 27, 2016 08:58 AM)softprofit Wrote: [\[CITE\]](#) I have license for this program since the passwords rec started working what is the recommended crypter for it?
DataProtector or CyberSeal

(Oct 27, 2016 09:11 AM)Deadly050 Wrote: [\[CITE\]](#) I got the screenshots sent to my email but the logs aren't coming. Can someone help me?
Can you send me your settings/config to me via PM or Skype? Thanks.

NOTE: UAC Bypass says upto Win7 (GUI to be fixed in next update) it actually works for all Windows

ChaoticForce - October 27, 2016, 2:50 pm

if you can implement so many features and have it stable your "next" project wink wink will really take over that specific thread for sure

That is one of the dependencies of the primary recovery (VS runtime, present on almost all computers). Wait for the secondary fix to be rolled out.

DamienVC - October 28, 2016, 6:11 am

Update released: Primary, secondary recoveries fixed.

(Oct 27, 2016 02:50 PM)ChaoticForce Wrote: [\[CITE\]](#) if you can implement so many features and have it stable your "next" project wink wink will really take over that specific thread for sure
We have a couple of stuff in store.
Stay tuned 8)

(Oct 27, 2016 10:13 PM)makmoney Wrote: [\[CITE\]](#) I HAVE COMPLAINED TO DAMIENVC SO MANY TIMES, SUPPORT IS VERY BAD AND THERE IS NO PDF/.DOC EXPLOIT AFTER UPDATING NUMEROUS TIMES. I HAVE A PREMIUM LICENSE SO I SHOULD GET ALL THE FREEBIES . I HOPE SOMEONE WILL GIVE SUPPORT FAST
Be patient, its on autoupdate and just press YES.
Password recovery fixed.

(Oct 27, 2016 10:19 PM)Zexus99 Wrote: [\[CITE\]](#) Damien himself said to send him a PM or redownload the keylogger to get the pdf exploit. For the doc it's your fault, update work perfectly fine.

(Oct 27, 2016 10:29 PM)Codefuser Wrote: [\[CITE\]](#) New obfuscator update coming out soon to secure your data even more and decrease the amount of detection.
Got the detection rate from 9 down to 2 during my tests. Adding it to the builder atm.
I've messaged the user the link on skype. Thanks for the help.

(Oct 27, 2016 10:29 PM)makmoney Wrote: [\[CITE\]](#) i have redownload the keylogger and still not getting any pdf exploit and what do you mean 'for the Doc it's you fault?
DOC & PDF works fine on all compatible versions as written.
I have sent you the lifetime link mate (AutoLOG Premium.rar) it is within the same folder.

(Oct 27, 2016 10:30 PM)Codefuser Wrote: [\[CITE\]](#) The doc works fine. Did you update the keylogger? If not contact DamienVC on skype. You must be a little more patient, he is going out atm.
Update has been sent out.
Official word.

(Oct 27, 2016 10:38 PM)Deadly050 Wrote: [\[CITE\]](#) So used password recovery on myself works fine, but when I try it on my other computer I get a empty file?
Errors with PW recv have been fixed, please retry.

(Oct 28, 2016 02:21 AM)Deadly050 Wrote: [\[CITE\]](#) Is there a option to refund, let me know.
The refunds are usually offered at our discretion for cases in which locational disadvantage puts the customer at no use for the product. As such, we fully reimburse the customers. But recently, there has been a lot of people attempting to abuse the system so we've just been getting a bit strict.

Pretty sure the tests work for all PCs rn, sent it out & had 2 more confirmations regarding functionality. And you are not testing in a VM or RDP right?

(Oct 28, 2016 01:08 AM)yeyeyeik Wrote: [\[CITE\]](#) Just wondering when i know theres been an update- do i simply redownload or will it notify me?
Updates are automatic and it automatically downloads and overlaps the previous NetSeal versions

(Oct 28, 2016 03:40 AM)ChaoticForce Wrote: [\[CITE\]](#) Maybe because the pdf, office, reg exploits arent in the pogram? -. - but in a folder, when you confirm that you purchased it to Damien he will send you a download link which includes pdf, office, reg exploits and autolog itself, But I am unsure if he will give you it if you bought before the promotional offer was put up... Since I said I am cute he gave it to me ?

All sales are final

its "a public theme" as I was told atleast
The exploits are seperate builders, so you can use the builders to build other exploits (EXE/JAR) of other programs as well, not just AutoLOG.

Thanks for the help mate
And regarding the sales part, I don't actually say all sales are final, there are rare cases in which I refund customers, but mostly due to regional disadvantage/restrictions

(Oct 28, 2016 04:00 AM)softprofit Wrote: [\[CITE\]](#) I have a license with Autolog where can i get updated autolog link?
Sent the link via PM

(Oct 28, 2016 05:02 AM)ChaoticForce Wrote: [\[CITE\]](#) That is if the program doesnt work... and most of the time sellers say that in order to get someone to buy, I doubt Damien will give him a refund
The issue will be looked into.

Thank you.

You need to have a FTP server, and your license is locked with your HWID yes.
You can transfer it to any FTP server but you must have the authorization to the FTP (user/pass)

Going to add sFTP support soon.

(Oct 28, 2016 04:29 PM)softprofit Wrote: [\[CITE\]](#) Should i crypt the stub before exploiting it and which crypter is recommended?

Pls advice.

Yes I recommend crypting it rn with DataProtector or CyberSeal. (we will release a reFUD update in the next 1-2 days soon)

(Oct 28, 2016 05:26 PM)NOSCOPE100 Wrote: [\[CITE\]](#) So Damien I sent you a contact req on skype I would like help configuring this

I've responded to everyone on skype, send me a message again if you were missed.

yeyeyeik - October 30, 2016, 1:41 am

Passwords worked. All together its working very well, although the log layout isn't the best. I can't see keylogs written in certain applications. Skype DB doesn't seem to work either.

DamienVC - October 30, 2016, 2:45 am

(Oct 30, 2016 01:41 AM)yeyeyeik Wrote: [\[CITE\]](#) Passwords worked. All together its working very well, although the log layout isn't the best. I can't see keylogs written in certain applications. Skype DB doesn't seem to work either.

You need to browse the skype DB using the skyperious tool.

It will only send/upload based on the following criteria:

- provided the maximum attachment size is not exceeded by the size of the skype DB (works fine for FTP)

- provided that a skype main.db file exists

- * provided that the upload speed is good enough to send the file which may range from x-xxx MBs

When the client's PC is turned of, the logs stop. They will resume when the computer is turned back on right? I had the default 'add to start-up' checked.

vito80 - October 30, 2016, 1:01 pm

Hi all!

Bought AutoLog yesterday.
Everything is fine to understand with the readme file.

But i have one problem...

I've generated the stub.exe on one system.
(with the default setting. only mail settings is changed to a aol mail adress)

But when i copy the stub.exe to stick and put stick into other system,
antivir free edition on this system is deleting stub.exe before i can click on the exe.
error msg: "TR/Downloader.Gen"

do you guys know, what can be wrong?

MasterRankam - October 30, 2016, 1:56 pm

A question, im running the stub within a VMware environment, why is it communicating outside the vmware after i execute it? Want to remind you, that it does not topic to aid.

Ask DamienVC on pw or skype ?

And

I'm sorry, but i do not understand the question.

You run stub exe ? And you ask, why connects to the outside vm?

(Oct 30, 2016 06:51 PM)dodouble Wrote: [\[CITE\]](#) pls does the macro .doc / pdf exploit still come with the packedge....

Im looking into buying this, have bought n used it before though...i belive wen it came early...from reddington

can any one let me knw pls On the first page, still is "PROMOTIONAL OFFER: Free FUD Macro DOC & XLS Exploit Builder along with Advanced, Professional & Premium Packages

Premium users also get a FUD PDF exploit builder!"

I think it is still Adding to the program.

Wait for DamienVC.

DamienVC - October 31, 2016, 6:16 am

(Oct 30, 2016 03:22 PM)skype101 Wrote: [\[CITE\]](#) I still cant undestand how to generate the doc file from the builder after inserting my url

Upload your stub to your own FTP host (with a domain) so that it is like <http://site.com/stub.exe> [or use pomf.cat]

Generate the code, copy it and go to MS Word. Create a macro and then go to the Project explorer on the left side and click on MS Word Open Objects > ThisDocument. Paste the code and click Ctrl+S and prompt No (macrofree doc) and save as 97-2007 .doc file.

[same as writtein in the guide]

(Oct 30, 2016 03:29 PM)vito80 Wrote: [\[CITE\]](#) Thanks for your answers guys!

(Oct 30, 2016 11:25 PM)Codefuser Wrote: [\[CITE\]](#) Primary recovery is working.

(Oct 31, 2016 02:56 AM)MasterRankam Wrote: [\[CITE\]](#) AutoLOG v2.5.1.0 released - 10/27/2016
• Password Recovery Optimization

All works fine ?

Want to remind you, that it does not topic to aid.
Ask DamienVC on pw or skype ?
And
I'm sorry, but i do not understand the question.
You run stub exe ? And you ask, why connects to the outside vm?

On the first page, still is "PROMOTIONAL OFFER: Free FUD Macro DOC & XLS Exploit Builder along with Advanced, Professional & Premium Packages
Premium users also get a FUD PDF exploit builder!"
I think it is still Adding to the program.
Wait for DamienVC.
Thanks for the support guys

You can use the exploits to drop a JAR file, and I don't exactly recommend binding and JAR & EXE
but you can test it for once for yourself.

(Oct 31, 2016 09:31 AM)FIRE BLOODCLAT Wrote: [\[CITE\]](#) Please i need help on a clean link to

I also cryted with kazy crypter.

pls help me pls..

I cannot warrant tests after the crypt. Also I dont think Kazy is compatible.

DataProtector/CyberSeal are compatible.

And if you get the test it means that the logs will also be sent similarly.

qwertzuiop - November 3, 2016, 1:12 pm

really big growing Project. vouch op !!!!

Dillerhans - November 3, 2016, 1:32 pm

Tried sending .doc exploit both with Gmail and mail.ru - can't even send it, because it gets caught as virus

yacood - November 3, 2016, 7:16 pm

does it come in silent exploit?

i mean on first run, will it recover passwords then later send another 2 hrs later?

It depends on internet speed, if you're running a 10+ mbps connection it will come first else it will be delayed and will come in the next interval

For me 35 passwords were found in 0.679000139236 seconds [Pidgin, Skype, Firefox, Chrome, Filezilla]

(Nov 8, 2016 06:29 AM)DamienVC Wrote: [\[CITE\]](#) Recommended crypters are DataProtector & CyberSeal that work with AL. Private crypting works fine too

Rest assured we are working on the reFUD and will try our best to release it asap

Their crypters are too expensive for the time being,

I prefer to opt for a free alternative or less expensive if possible.

thank you for your reply and work!?

SIM-2059193 - November 8, 2016, 11:57 am

Is this keylogger FUD? Would i need a crypter for this?

DamienVC - November 8, 2016, 11:59 am

(Nov 8, 2016 12:57 PM)Caractacus Wrote: [\[CITE\]](#) Is this keylogger FUD? Would i need a crypter for this?

No it isnt FUD rn, but we are working on a reFUD soon.

(Nov 8, 2016 08:48 AM)move-you Wrote: [\[CITE\]](#) Their crypters are too expensive for the time being, I prefer to opt for a free alternative or less expensive if possible.

thank you for your reply and work!?

Oh alright, there aren't much free crypters around but you could ask around for a free crypt

Protip: never scan stubs on virustotal

Codefuser - November 8, 2016, 8:03 pm

For those who are not getting PW: it does take a while for the password recovery module to be loaded. Be patient.

Donblings - November 8, 2016, 9:36 pm

The test is not sending successfully for three different smtp emails.

teekaygold - November 9, 2016, 12:39 am

PDF EXPLOIT IS NOT WORKING, I'M SORRY BUT I'LL SAY IT'S NOT WORTH IT. SORRY BUT I'S JUST THE TRUTH.

DamienVC - November 9, 2016, 3:27 am

(Nov 8, 2016 10:36 PM)Donblings Wrote: [\[CITE\]](#) The test is not sending successfully for three different smtp emails.

Did you follow the TUT post.

For some emailboxes like AOL, mail, etc your whole email address is your username
For others like Rambler, Gmail etc your username is email without @domain.com

(Nov 9, 2016 01:39 AM)teekaygold Wrote: [\[CITE\]](#) PDF EXPLOIT IS NOT WORKING, I'M SORRY BUT I'LL SAY IT'S NOT WORTH IT. SORRY BUT I'S JUST THE TRUTH.

It is upto Adobe v9 and all versions of Foxit Reader.

You really dont expect a 0day for free right?

skype101 - November 9, 2016, 11:07 am

We just need a video tutorial for all this exploit things none works for me

teekaygold - November 9, 2016, 2:10 pm

(Nov 9, 2016 04:27 AM)DamienVC Wrote: [\[CITE\]](#) Did you follow the TUT post.

(Nov 14, 2016 09:24 PM)Raymond Reddington Wrote: [\[CITE\]](#) Hallow .. where is my

Your license is right where it is supposed to be ?

codefuser i was thinking the silent exploit will be private/unique builder for each customer, if it is a public tool that means you guys have to make it cheap and free reFUD as the customers are many it

won't last one day

nic22258 - November 16, 2016, 8:33 am

Nice Keylogger! It's worth the money!

teekaygold - November 16, 2016, 2:14 pm

(Nov 16, 2016 06:05 AM)Codefuser Wrote: [\[CITE\]](#) Yes, but you are paying once and the silent office exploit would need a reFUD daily/weekly with this many users, and it is expensive.

@All working on the final part of the reFUD update, should be done soon. Price would not matter if it's the real deal. You bet!

DamienVC - November 17, 2016, 12:49 am

(Nov 15, 2016 06:45 PM)ken0man Wrote: [\[CITE\]](#) @DamienVC, do you mind grabbing raymond in the balls to force him to release the latest silent exploit please?

He's been online for everyone to kick him in the nutsack!

<https://hackforums.net/member.php?action=profile&uid=2061024>

(Nov 16, 2016 12:30 AM)teekaygold Wrote: [\[CITE\]](#) Read closely, "Put a new price tag" i never said you should offer for free after all i paid for the premium and it wasn't free.

All that I can say is that we are working on it, we have a lot on our plates. Raymond used to handle silent DOC exploits but he's been away for a while hence he wasn't able to sell them actively.

(Nov 16, 2016 08:35 AM)ken0man Wrote: [\[CITE\]](#) codefuser i was thinking the silent exploit will be private/unique builder for each customer, if it is a public tool that means you guys have to make it cheap and free reFUD as the customers are many it won't last one day

Yeah afaiK we were thinking of selling it as private builder and pay per reFUD just like Raymond used to do. But we recently have come upon a certain new project on our hands, which will be released later this year. Stay tuned.

(Nov 16, 2016 09:33 AM)nic22258 Wrote: [\[CITE\]](#) Nice Keylogger! It's worth the money!

Thanks mate!

(Nov 16, 2016 03:14 PM)teekaygold Wrote: [\[CITE\]](#) Price would not matter if it's the real deal. You bet!

Currently the exploit we have is not FUD, hence he will not be selling it.

Once a FUD silent exploit is made, we will be selling it for clients to use.

Till then, we have a few more stuff that requires attention (new project incoming)

fofobotter - November 20, 2016, 8:56 pm

I just bought it, it is getting detected by avast, wtf?

Windows Defender detects it too, don't buy this KL it really sucks

DamienVC - November 21, 2016, 12:11 am

(Nov 20, 2016 09:56 PM)fofobotter Wrote: [\[CITE\]](#) I just bought it, it is getting detected by avast, wtf?

Windows Defender detects it too, don't buy this KL it really sucks Really sucks? Do you really expect a FUD keylogger at \$15/m, that is the main reason why all of the leechers have bought cheap packages of \$15 ea and ruined the FUD by spreading it so much

The reFUD will now require a recode of the keylogger itself, due to the fact that the existing USG has been used so badly by current customers (dont know, some people even use VT to scan themselves, rip)

And yet, you are one of those who dont know the advantage of native over managed malware. A program in itself can only remain FUD if the customers co-operate (which they do, only on private stubs, since it costs them a bit)

(Nov 20, 2016 01:08 PM)HackYouBitch16 Wrote: [\[CITE\]](#) Just Purchased, After building a stub with default settings I am getting an error

Autolt Error

Line 1680 (File "C:\Users\XXXX\Desktop\stub.exe"):

Error: Incorrect number of parameters in function call.

OK

(Nov 20, 2016 02:38 PM)Gshay Wrote: [\[CITE\]](#) I used to get that error, but instead of that one i'm getting a new error.

Autolt Error

Line 1685 (File "):

Error: "Func" statement has no matching "EndFunc".

Autoupdate was off, fixed it.

Rerun AutoLOG.exe to get the updated version. (make sure AV, etc is disabled so they dont interfere with Netseal's update)

Common mistakes: Hide Task is just Win7 specific, dont test on Win8/Win10 with it

Get Sys Info doesnt work on RDPs AntiDebug is not supposed to be used for RDP/VMs (thats what the function is)

Automatic Stub Update - you are required to provide a HTTP link for your update server, else it wont work (dont leave it with the default text lmao, faced people having this error 5+ times, just dont

use the func if you dont know what it is)

* Follow this tutorial -

If the test machine is a RDP then disable getsysinfo/anti-debug (obv)

After few test I got everytime an error using UAC Bypass and Website Blocker.

Using VM with Win7

sean_wire - December 4, 2016, 9:53 am

Please how can i make it recover chrome and outlook, i enabled them but it didnt recover it
awaiting your reply
thanks

Diamond2015 - December 4, 2016, 11:22 am

Hello,

Please i am interested to purchase Silent office Exploit Builder.. Can i purchase from you?

Thanks

DamienVC - December 4, 2016, 8:34 pm

(Dec 4, 2016 12:22 PM)Diamond2015 Wrote: [\[CITE\]](#) Hello,

Please i am interested to purchase Silent office Exploit Builder.. Can i purchase from you?

Thanks

You'd have to contact Raymond, and I'm afraid he isn't online anymore.

(Dec 4, 2016 10:02 AM)Zexus99 Wrote: [\[CITE\]](#) After few test I got everytime an error using UAC Bypass and Website Blocker.

Using VM with Win7

Is AntiDebug turned off?

Website Blocker edits the HOSTS file and UAC bypass escalates privileges.

Does the functions work w/o being used together (i.e. individual stubs)

(Dec 4, 2016 10:53 AM)sean_wire Wrote: [\[CITE\]](#) Please how can i make it recover chrome and outlook, i enabled them but it didnt recover it

Hm, for testing, eliminate chrome.exe, and then execute the stub and wait for the interval

Imk if it didnt come.

Zexus99 - December 4, 2016, 10:08 pm

(Dec 4, 2016 09:34 PM)DamienVC Wrote: [\[CITE\]](#) You'd have to contact Raymond, and I'm afraid he isn't online anymore.

Hm, for testing, eliminate chrome.exe, and then execute the stub and wait for the interval
Imk if it didnt come.

Antidebug was turned off, Website blocker work without UAC Bypass but when active, it show an error when executed.

These features was tested in an individual stub (Only these activated).

DamienVC - December 5, 2016, 6:15 am

(Dec 4, 2016 11:08 PM)Zexus99 Wrote: [\[CITE\]](#) Antidebug was turned off, Website blocker work without UAC Bypass but when active, it show an error when executed.

purest21 - December 13, 2016, 4:49 pm
I don't know which is better, whether the program or the programmer himself??
This program has the best support service on HF!!
I mistakenly bought the basic package [\$14.99] thinking that it also comes with the exploits cos i was stupid enough not to read the first page thoroughly.
I explained my mistakes in details to the programmer, he forgave my clueless mind and still gave me full support meant for even premium users. I couldnt thank him enough ?
...hey but that doesnt mean anybody should go ahead to buy basic package and start to disturb him.

Thanks once again boss. I was even ready to pay extra \$10 for advanced package but he declined it. ?

please how do i wear this autolog on my signature for advert?? ?

DamienVC - December 13, 2016, 6:03 pm

Passwords do work.

<https://i.imgur.com/y4tJGuE.png>

Turn off AV, set interval to 1h and then reexecute the stub. Its attached alongside keylogs

0x320 - December 17, 2016, 11:08 am

On Password Recovery i get nothing.

On Use secondary recovery i get:

Password list:

[illegible]

why ? :/

aerohack - December 17, 2016, 7:45 pm

I have some questions about AutoLOG v2.5:

- The Antivirus Killer, will kill the AV process always the Operating System starts?
- Ultimate Stealth will hide the server from Msconfig, Windows task manager, Windows Explorer and Regedit?
- I'll need to use a Crypter?
- Strong Persistence and/or Immortal Process can protect my server from being removed by any BotKiller?
- There's Unicode support?
- Can extract browser's passwords saved from memory?

Wuya - December 18, 2016, 12:01 am

i dont become my test mail , can you pls pm here i cant pm you but i added you on skype maybe you can help me. thanks looks like a cool prg :)

i get these message after testing email..
Cant post a image..

But the message says :
Error: Error copying source to destination file.
C:\Users\Admin\AppData\Local\Temp\GZ7KSS50\Emai.exe

cant delete my post but i used the wrong port ..
test mail came :)

DamienVC - December 18, 2016, 2:18 am

 - I'll need to use a Crypter?
 - Strong Persistence and/or Immortal Process can protect my server from being removed by any BotKiller?
 - There's Unicode support?
 - Can extract browser's passwords saved from memory?- It uses a mixture of mechanisms, to freeze the process & terminate it & blacklist it from opening. Works against a lot of AVs (except some which are more advanced)
 - Regedit isnt used tbh, but hidden reg entries are possible, we dont write much anyway. Process hider is for Win7 (might do a all-windows compatible version soon, depends). Hidden startup is there yeah.
 - Yes
 - Not exactly, if you're up against strong malware (that sell for 4-5 figures), they have more advanced methods.
- But yes against the normal tools
- You mean autofill data? That is the saved passwords & yes

(Dec 18, 2016 01:01 AM)Wuya Wrote: [\[CITE\]](#) i dont become my test mail , can you pls pm here i cant pm you but i added you on skype maybe you can help me. thanks looks like a cool prg :)

i get these message after testing email..
Cant post a image..

But the message says :
Error: Error copying source to destination file.
C:\Users\Admin\AppData\Local\Temp\GZ7KSS50\Emai.exe

cant delete my post but i used the wrong port ..
test mail came :)
You can edit the post, add my skype - live:damienvc.hf if you need help

(Dec 17, 2016 12:08 PM)0x320 Wrote: [\[CITE\]](#) On Password Recovery i get nothing.
On Use secondary recovery i get:

Password list:

[illegible]

why ? :/

Can you use secondary only?

Or try this, turn off AV, run stub with 1h pass recv interval

Works here <https://i.imgur.com/y4tJGuE.png>

Wuya - December 18, 2016, 3:54 am

Okay i added you on skype the things work but only the restored password func doesnt work

0x320 - December 18, 2016, 4:28 am

i turned of anti virus, set use secondary and put the interval on 1H.

The same thing. what now ?

On "Password Recovery": i get no Passwords.txt (10H Tested)

On "Use secondary recovery": i get a Passwords.txt with but with "Libaries Loaded" Messages.
(Tested 4H)

:((

Wuya - December 18, 2016, 6:57 am

I Only get a empty passwort.txt whats the problem ?

DamienVC - December 18, 2016, 9:19 am

:((

Server IP was blacklisted, I debugged the updated version, tested a stub

Just avoid these funcs: Log Coloring

Anti Debug IP Logger

Get Sys Info

AntiDebug/GetSys only in case of RDPs. IP Logger sometime causes detections, log coloring kills formatting (rarely)

<https://imgur.com/a/6r8a7> -> tested right now, fresh

Replied

Please refrain from using the stub updater if you dont know how it functions.

Refer to readme for an explanation of it.

Wuya - December 19, 2016, 5:19 am

Best keylogger on hf im suprise how good that thing work (Y)

dcyber1 - December 19, 2016, 7:11 am

Is it still FUD or will I need a crypter to use it?

DamienVC - December 19, 2016, 8:19 am

(Dec 19, 2016 06:19 AM)Wuya Wrote: [\[CITE\]](#) Best keylogger on hf im suprise how good that thing work (Y)

Legit customer, thanks.

(Dec 19, 2016 08:11 AM)dcyber1 Wrote: [\[CITE\]](#) Is it still FUD or will I need a crypter to use it?
You will need a crypter. Our reFUD will be a bit delayed.

TucoSalvatore - December 19, 2016, 10:09 am

which ftp server you recomend?

Jockiboierik - December 19, 2016, 3:28 pm

When can I expect a reFUD? Which crypter do you recommend?

cheatgood - December 20, 2016, 8:30 am

This guy use the exploit in a linux source code and other software guys don't be stupid.

But nice guys !

DamienVC - December 20, 2016, 9:02 am

(Dec 19, 2016 10:55 PM)dcyber1 Wrote: [\[CITE\]](#) When can I expect a reFUD? Which crypter do you recommend?

It will be a bit delayed, no ETA decided yet

(Dec 19, 2016 04:28 PM)Jockiboierik Wrote: [\[CITE\]](#) I've added you now
I'm on now

(Dec 19, 2016 11:09 AM)TucuSalvatore Wrote: [\[CITE\]](#) which ftp server you recomend?
Try buying a normal Linux server and setting up FTP? You can also use OVH servers

(Dec 20, 2016 09:30 AM)cheatgood Wrote: [\[CITE\]](#) This guy use the exploit in a linux source code and other software guys don't be stupid.

But nice guys !
Hm ok whatever, didnt understand what you meant to say.

magic 3211 - December 20, 2016, 9:46 pm

looks very promising might use it in the future

raidercat12 - December 22, 2016, 11:52 am

still using your logger and loving it, cant wait for new updates
thanks bro

Glad to see people supporting it, going to release an update real soon.

Zatog1420 - December 22, 2016, 6:36 pm

This is a pretty nice work dude :)

RastaManKing - December 22, 2016, 9:36 pm

im interested in buying, but i have a couple questions, my level is not enough to send you a pm..
can you provideme with an email? i dont use skype.

davej634 - December 22, 2016, 9:58 pm

Very good product.
Keep on with your sale !!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

G0dzSoldiers - December 23, 2016, 7:30 am

Vouch for this is an amazing Keylogger an at a good Price.

5416339 - December 23, 2016, 10:44 am

I've seen some nice reviews of this. Out of curiosity, in which language is it coded it? I was looking for a cross platform solution that isn't ripped off from open source loggers in C#.

If it's coded in python or delphi. I'll go right ahead and have a look into this. Thanks.

duzzt - December 23, 2016, 12:13 pm

Looks cool, might try it out

Paul.Aubin - December 23, 2016, 1:41 pm

WAWWWW ITS SO GOOD ! :) i contact

davej634 - December 23, 2016, 10:06 pm

please i need this auto log keylogger for my system,, please who is the seller.
Guy i need your advice on this
thanks

HackYouBitch16 - December 24, 2016, 2:41 am

Unable to use it . it does not Auto Start after reboot, have been waiting for support to help me with the installation but looks like he is very busy to respond, its been a month and my subscription is about to expire I won't recommend it , Dude even if you fix the issue and help with install it will be too late since my 1 month subscription is about to expire due you lack of support

Zexus99 - December 24, 2016, 10:04 am

what happened to damiencv?

Zexus99 - December 24, 2016, 10:20 am

(Dec 24, 2016 11:15 AM)ken0man Wrote: [\[CITE\]](#) what happened to damiencv?

Exploit given with AutoLOG are developed by an other guy who claim DMCA. Check Damien rep to see proof.

darkman121 - December 24, 2016, 6:49 pm

(Dec 24, 2016 11:20 AM)Zexus99 Wrote: [\[CITE\]](#) Exploit given with AutoLOG are developed by an other guy who claim DMCA. Check Damien rep to see proof.

you cannot claim DMCA on malwares lol...

plus RIP (DR OVERFLOW) is coder of autolog and everything and he probably has rights for it rayane888 seem like copypaster his rat is leaked everywhere and shits too ?

(Dec 24, 2016 11:04 AM)Zexus99 Wrote: [\[CITE\]](#) RIP.. Hope this program is not dead too..

just talk to damiencv on skype and he said he will renew server to keep it online for the months to come.

davej634 - December 24, 2016, 9:56 pm

Hello mates please which is best for purchase ?

AutoLOG v2.5.4.0

AutoLOG v2.4.0.0

Zexus99 - December 25, 2016, 8:47 am

just talk to damiencv on skype and he said he will renew server to keep it online for the months to come.

I wanted to say that he claim right about these tools to Omni, that's why Damien is banned.

So, AutoLOG will be stopped next month or something ?

darkman121 - December 25, 2016, 9:37 am

dont know he is still on skype and responds to me

he tells he will renew the server each month so it isnt dead, update might be delayed i think thats it

and DMCA is for legit tools not hacking tools

i see damiencv rep on rayane Site Created: 2016-05-17 14:05:12 and autoLOG 2015-11-02 .. too i think he just start selling later.

Zexus99 - December 25, 2016, 9:43 am

davej634 - December 25, 2016, 10:26 pm

Hello Admin i have just been cheated while trying to buy AUTOLOG keylogger.

The person with this user name Glyco [bin@HF:] PM me directly saying Hey the guy who sells AutoLog his skype is vghworld. And i add the skype user and paid for 3 months plan of AUTOLOG keylogger and up till now they refuse to give me the product or even answer me .

And this was because i could not PM the seller directly due to not enough post.
please what do i do and how do i contact the real seller because i want to buy this product

thanks

Zexus99 - December 25, 2016, 10:37 pm
