Thread: [\[airmon-ng\] problems with kali linux and alfa wifi adapter \[with screenshots\]](#)

**wanbetaaler** - June 3, 2016, 11:06 am

Hello,

I need help with the following situation.

when i start airodump on my wlan0mon it wont find any network?

i use a: alfa wifi adapter the awus036NH.

I managed it to work one time but i forgot how i did it.

If you want to help my via skype i would appriciate that.

You can see the steps i performed on the following screenshots

Spoiler [\(Click to View\)](#)

p.s. my network type i used with my virtualbox is NAT and i used usb filtering with the wifi adapter
