Which one is best?

New Gradient Soft Light:

try putting the gradients on soft light or something.

Nvidia - July 9, 2010, 7:12 am

Tried using soft light, and it came it to be a cool snow effect. Look at my first post.

I personally think this is one of your best..maybe a little too bright on the arms....but other than that great...8/10

Black Diamond - July 9, 2010, 2:05 pm

Not bad buddeh, not epic though either. Lol, the scan line one is just fowl. xD

Nvidia - July 9, 2010, 2:40 pm

Ok xD

I like it, though I wish you blended in the text more. All the colors look nice, but make sure you aren't too strong with the filters.

It was odd trying to blend text in with this one, wasn't sure what to do, and the only filter I used was sharpen. (I think?)
