Welcome to CSGO Skin Slut, the one and only ultimate ebook to getting free skins and making thousands selling skins. This method is honestly amazing and will only be at this price for a little while before being lifted due to saturation purposes, and nobody wants that. This method will have many versions and will constantly be released / updated. All customers will receive updates. This method works for all countries and is not region based. The method is blackhat, but is very minimal and is nothing to get worried about. I can assure you I've done this many of times and have not had anything done to me. It's honestly nothing risky and you'll be safe, I can guarantee you that. The method will be updated whenever I feel that there is sufficient information to give you guys and that it will help you. Every copy comes with free support. If you wish to get personal 1 on 1 training or mentoring that will cost extra. It wont be much extra and it will be time based. There is also a terms of service when you buy my product. When you buy my product, you automatically agree to these terms and will not break them. Breaking the terms of service will guarantee you no support, no refunds, and possibly a scam report. If you would like to purchase please hit me via PM.

Got given this ebook/method to review.

OP does explain and walk you through what is required and how to properly do the method quite well and explains how to maximize profits/income. Method isn't straightforward but as I pointed out you should understand everything fairly quick. The method in general/overall isn't very clean so if you're an ethical person this is not for you.
