Thread: [There isnt more cancerous champion in the game than trundle!](#)

iSevere - June 4, 2016, 10:58 am

This champion is more antifun than both kindred and azir . It has ridiculous sustain from his passive , from the corrupted potion and from the stupid masteries in the defence tree and also his W !!! His Q has 30 mana cost and 4 sec cd gives him bonus ad , reduce targets ad , slows the target . His W gives him bonus movement speed which he can use to chase and disengage , attack speed bonus which has max 80% attack speed (ffs full stacked jax has 88% att speed bonus) and 20% increased healing and health regeneration from all sources for for 8 seconds . His E create that stupid thing that has a huge animation it can make you stuck and creepblock you into terrain and has a huge slow for the insane duration of 6 seconds . His ulti heals for the damage done and steal from the enemy his defence stats and cant be Qssed anymore .

How the hell are you suppose to lose the trade with this insane ammount of sustain in lane ? You go full tank you build one offensive item and you can 1 vs 1 anyone . This champion is pure cancer antifun and has literally easy and overloaded kit .

Have you played a full tank Fiora? Trundle is 0 compared to that.

ad teemo takes the cake for it.

There goes one old saying: "If thy cannot defeat ye foes, thy must become one of ye foes."

Well versus Trundle just go full tank Fiora and you are good. Other than that you could have your jungler focus on ganking and let the Trundle suffer the drawbacks.

Well, that's Trundle. His ultimate makes him so tanky, that if he has at least 3 tank items and boots,

you need 3 more people to kill him. (Unless you're really fed yourself)

He scales really well into mid to late.

I like the way you think.

Yeah, I played Trundle for the first time on a smurf and I read his kit.. it's literally insane.

Trundle is genuinely one of the best champions right now. I played him for a while a few months back and he felt weak but right now, he is strong as fuck.
