Thread: [BlackShadow - IS NOT TRYING TO SELL ANY PUBLIC SCRIPT](#)

Black Shadow - June 5, 2016, 2:35 am

I have been accused of taking another members bustabit script without any proof whatsoever!

I really cant understand why he has done this, so lets sort it out here and now because I intend to clear my name.

This is the member he is new to the forum and has accused me of stealing his scripts.

<https://hackforums.net/member.php?action=profile&uid=3124454>

But the pathetic thing is half of you actually believe him without any proof whatsoever ?

This is the thread he made and is assuming I stole it just by looking at my graph on my account. This is not possible because they all work similar.

<https://hackforums.net/showthread.php?tid=5293452>

He has 3 scripts but it is only one of them he is saying I stole

This is his script that he says I stole download it from here for free.

<http://phex.io/bustabit#tab4>

Mine I will give out to independent HQ members who know what they are doing to clear my name.

This has been sorted out now the member that accused me has admitted he was wrong look at his post below

Inb4 people say the "coder" is just you on a VPN.

But for real dude - if it's a fake claim, just state that it's a fake claim and the script isn't copied. Why not find a user from the old sales that bought it or tested it to check what they already have downloaded with what the other guy is saying you took it from?

No offense man but you can just edit "his script" now to make it different - which is why we need someone from back then to compare the two.

Cameron - June 5, 2016, 2:39 am

Why would we believe an account that is about to register only to defend you? For all we know you could be making another account just to defend yourself. Kinda like you did when you got banned

from HF for a week.

I'm here to give you some advice man, just let it go. I'm pretty sure everyone already forgot about this drama but now you returned it.

c4rm4 - June 5, 2016, 2:43 am

Do you count me high enough? I don't want to use your script but I can check it and I will tell my honest opinion if I have ever seen any script like that. I have tried 10 different script in busta at least so I am sure that I will know if it's some free script.

I would offer to check it myself but there's no point.

The script he could give now could be completely different to the one he sold back then which is why we need a user who bought/tested his old script to compare it against the one he is claiming he hasn't plagiarized.

I can definitely look at what ever script he gives me to look at, I can then compare it to the one from the other guy - but there isn't any proof that what black shadow gives me is what he was selling.

I'm saying this in OPs defense as it's best he finds a completely legitimate way of clearing his name and not leave holes like the above as users will pick them apart.

Buffy Summers - June 5, 2016, 2:47 am

Wasn't the script a flop anyway? But yeah, I'm not sure as I haven't looked at either of them. However, he did say that the numbers were exactly the same in all variables. Seems suspicious IMO if it is true.

2????????????????4k - June 5, 2016, 2:49 am

no one cares about the scripts. the way u pm'd him saying u would get him banned was a cunt move, cunt.

Biker BoyZ - June 5, 2016, 2:54 am

There has been alot of people who are accusing top members like you. i don't know why but its been going on pretty much lately.

This isn't the first community alert against the Bust A Bit scripts he has been selling. I personally never seen his scripts, nor do I even care. Considering you'll lose all your money long term, no matter what script you use.

Quux - June 5, 2016, 2:56 am

I don't think anyone cares about the script, people are pissed about the way you messaged him thinking you are staff or some shieet "I will get you banned"

Bluffer - June 5, 2016, 2:56 am

What about you threatening to get him banned from HF? Was that true or false?

He didn't just say "I will get you banned", he also said he has gotten previous members banned! ?

OK that was wrong of me but I was just pissed off at the time for accusing me of something I had not done.

Respect to you for at least owning up to it and taking responsibility for your actions.

In all honesty, good luck to you in resolving this ordeal with those accusing you of this stuff.

The coder in question is always on bustabit he is not me go to the chat and speak with him yourself.

Here is his profile

MartinG - June 5, 2016, 3:25 am

I just looked at phex`s script on paste bin. It`s some very basic code. As in literally the coder`s experience is with the BASIC programming language.

Anyways, the idea of skipping games after a loosing is obviously not unique. The script I wrote for Blackshadow utilizes a game skipping strategy, but it is implemented completely differently.

Blackshadow`s script has nothing to do with Phex`s script. It seems that phex thinks he owns a patent on skipping games after loosing, which gamblers have been doing for thousands of years.

Thank you man I am really sorry I had to ask you to join here just drag you into all of this.

Exchange.Service - June 5, 2016, 3:38 am

I'm not siding with anyone but I can say that the two scripts are completely different (not even similar)

Well these are my words but I can say that MarinG did code for blackshadow, also bustaphex isnt even made by himself so he cant say shit imo.

justmy2cents.

MartinG - June 5, 2016, 3:40 am

In case I wasn't clear, I am the one who wrote BlackShadow's scripts. They are definitely not Phex's scripts.

Did you take inspiration from other peoples game play or analysis of other users profiles?

Wardow - June 5, 2016, 3:55 am

Stop with those attention sicking threads, please thanks!

No one is ever trying to disturb you unless you post bullshit, just do your business if it looks serious nobody will ever go complain to you

I believe it is blackshadow that tells him what he wants then marting does the job

MartinG - June 5, 2016, 3:59 am

BlackShadow told me exactly what strategy he wanted, i asked a few questions to clarify some edge cases, the I implemented the strategy into a script. But after seeing Phex's script the only thing similar between the two is the idea of skipping games, which no one can claim as their own idea.

Black Shadow - June 5, 2016, 4:00 am

Now this has been sorted out time to close this thread.

My last say on this

I will admit they are similar but phex only has 1 pause feature on it were mine has 2 and this makes a lot of difference.

Gulddreng - June 5, 2016, 10:59 am

idk wai?

:s confused

someone help

Seems like he did not sell a public script.

Knucklez. - June 5, 2016, 11:36 am

^^^ He sent to everyone that posted in the thread accusing him, to clear his name I assume.
