Thread: [Silly Mother D:](#)

chase. - June 5, 2016, 6:12 pm

So i was browsing HF today in a call with some friends and suddenly my internet drops so i go reset my router and modem as this has always fixed my problems before. My brother starts bitching at me for breaking his xbox and ipad because when i reset router "everything stopped working" i ask my dad what is wrong because he knows how to fix problems like this. My mom went to check outside to see if she turned off cable box while cleaning. Turns out she was using a snipper thingy to cut a bush and she cuts THE FUCKING INTERNET CABLE STRAIGHT IN HALF the 2 feet of wire exposed she cuts. RIP Interent ISP is saying they will fix it in 3 days D:(typing this on phone)

Tl:dr my mom is silly and cut our internet cable

Jason™ - June 5, 2016, 6:14 pm

Damn that really sucks.

Living without internet is pretty much impossible for me.

Have fun using all your data!

I suggest you take care of the bush trimming from here on out. Hopefully you get your internet back soon.

What a great way to start off Goodwill Monday.

Life aint the only thing your mom sucks at

Ta-kun - June 5, 2016, 6:17 pm

I'm pretty lost on how the fuck you can trim a bush and not notice the black cable you're cutting. That shit takes a little more force than a bitch ass bush and you'd have to notice... What the fuck...

Spyro The Dragon - June 5, 2016, 6:17 pm

that's unfortunate mate, use the time wisely, spend it with you family

I got hit off for a week, they completely fucked my router, had to go a whole week with no internet RIP

Jason™ - June 5, 2016, 6:18 pm

Am I dumb or is she lucky she didn't get electrocuted?

Condoms - June 5, 2016, 6:19 pm

Can you connect to the router on your computer? If so, you can usually restart the router from your own computer without needing to get up.

Underworldproblem - June 5, 2016, 7:31 pm

Happened to me like around 10 years ago. They installed a temporary line going from a tree to the roof, and inside my house somewhere idk. Then they permanently fixed it a week later.

Do you not have unlimited 4G? Should not be a problem since most time 4G is faster than home connections. But that sucks, good luck on getting it fixed.
