One of the best tutorial series for graphic design! Thank you Maxim for sharing your knowledge with the rest of the community!

I just wanted to ask one thing! Where can we find good presets? Where do you find yours?

Thank you again :D

**Anarchist07** - June 6, 2016, 4:15 am

I love the tutorial, so simple to follow and I always enjoy tutorials that are made like that, I always use it when I have to do photoshop myself.

Keep up the good work mate.

Vouch for That Guy Maxim. He has hooked me up in so many ways with my GFX (Including this). He's a legend!

Thank you, I appreciate your awesomeness.

Edit: This was my 500th post!

Great tutorial. Just a suggestion: on Photoshop, using the timeline feature you can create frame animations to make animations, and save them for web as a .GIF

You can't do advanced animations in Photoshop.

You have not tried After Effects, you do not know the difference.

Really detailed thread, I love it man.

Keep up the good work!

Thank you babe.

-

I am planing on recording and speeding it up by x2 when doing a full thread design. Will probably be posted in a week.

**JesusIsTheWayEveryday** - June 8, 2016, 4:03 am

Thank you for sharing your knowledge, all that is needed is practice to make perfect :)

**Millionare** - June 10, 2016, 9:06 pm

This is a dope tutorial, thanks for sharing it! Nice thread design too!

**Anti Democratic** - June 14, 2016, 7:32 pm

Enjoyed your first two tutorials, really useful. Over time, I hope I get better at things like these, really useful, thanks.
