Thread: [My bustabit challenge starts right now / Update finished the challenge 14/06/2016](#)

Black Shadow - June 5, 2016, 7:53 pm

OK so you all know how much I go on about bustabit and my scripts ect, well I have set myself a challenge to get all my accounts in the positive.

My bustabit story

I first found bustabit about 2 - 3 months ago on the first day I deposited \$50 2 days later I had 13 BTCs, but this was mainly won manual betting I know I was just lucky thats all for those few days. Over the course of the first week after wining I lost 10 BTCs but I wasnt down, so I decided there must be a way of making a script that that can beat this site so I spent the next 2 months trying to work out sequences ect. Just last week after hour and hours of work I have finally found the way and I am going to prove it. I have made this thread really for my own sake as now I have a challenge on my hands, so lets see ?

I am only down on these accounts because of script testing, but that has finished I have reached my goal with my script.

I am using a semi auto pilot method with a script and manual betting, this is the only way to win on BAB as a script run on its own will just lose.

Once I have got all these accounts positive I will not be using them any more bar one of them

Now how I am going to do that is by getting all of my accounts back in the positive within the next month with my new method.

Here is a list of my accounts so that you can follow my progress.

1. <https://www.bustabit.com/user/Dex> ----- This is in the positive 2,473,465.72 bits This account has never been negative.. I have now closed this account
2. <https://www.bustabit.com/user/Omnisient> ----- This is in the positive 306,480.36 bits This account has never been negative.. I have now closed this account
3. https://www.bustabit.com/user/BlackShadow_Test -----This Was in the negative -416,970.55 bits Now is positive 101,831.70 bitsI have now closed this account
4. <https://www.bustabit.com/user/BlackShadow> ----- This was in the negative -662,323.96 bits Now is positive 125,996.40 bits My main account using now
5. <https://www.bustabit.com/user/BlackShadow2> -----This was in the negative -724,700.97 bits Now is positive 126,694.52 bits I have now closed this account

Update 07/06/2016

Started running the Blackshadow_Test account. 3.30.AM

Stopped running the Blackshadow_Test account at 11.30 PM

Here is today's results up over 500k

Update 08/06/2016

Started running the Blackshadow account. 12.00 AM

Left it on auto pilot before sleeping but it hit a 3 loss run (now recovered) its 7.30 AM

Made a terrible mistake and put on a 350k bet by mistake and it lost it was meant to be 35k ? 9.30 AM

Its now 5PM went for a sleep for 4 hours but managed to make 25k

A bit slow today lots of low reds coming in that fucked it slightly 11.55 PM

Here is today's results up over 200k

Update 09/06/2016

Still running the Blackshadow account. 12.00 AM

Bad loss yesterday from that manual bet mistake I made but made 200k so getting there slowly.

Made everything back from the mistake, now time to get this account positive.

Its now 1.00 PM last night made a stupid decision at the wrong time and lost 200k from a manual bet but still up \$120 from the start

Its now 11.00 PM had a bad day today, I am running the script on a semi auto that requires a manual bet every few hours. This has gone wrong the way I was doing the bets, but I have found a solution for this problem so now had to start again.

Update 10/06/2016

Everything was going really well but I hit a bad patch and now down again. I have just discovered something so back to it and lets get these accounts sorted.

Update 12/06/2016

Sorted the problems out I managed to get BlackShadow_Test up to 100k now to start back on the BlackShadow account

Its now 11pm and doing OK today made about \$500 and getting the accounts back in the positive like I said.

Update 13/06/2016

Running the BlackShadow account still and only 400k to go its now 3.00 AM

Its now 1200. PM I left it running on a 4 run loss and it bust out within minutes of me going to bed FFS recovered the losses though with method

5.00 PM I am nearly there only 144k to go until this account gets positive.

6.00 PM I have finally got this account positive. I did take some chances with big manual bets but most of it was the script I use

6.30 PM I just fucked up big time I left the script running from a 6k base bet it was meant to be a 2 run loss but did not delete the 4 and lost 500k ?

10.00 PM I managed to get 500k back in 4 hours and put the BlackShadow account 100+ positive. Time to do the last one.

11.00 PM Started the BlackShadow2 account now

Update 14/06/2016

Still running the BlackShadow2 account

Its 12.00 AM I am doing really well on this account under 400k left to get positive.

Its 2.00 AM and I have completed the challenge to get all of my accounts positive

Its now 7.00 AM I have had a good night its been a bit of up and down but mostly up and finished positive on every account

I am just going to let the BlackShadow2 account run on full auto pilot while I sleep as testing some new settings

Its now 12.00 PM and its all over the final results are above.

Sorry I'm new here

Its a fairly old Bitcoin Gambling site. The game bustabit is based on luck. You bet with the multiplier and you can stop when ever you like. but the multiplier can bust anytime. so you could lose it all.

This is the first time I have made a challenge thread. I have made sales threads but they always got sales trashed thats why I deleted them.

The reason why I deleted them was some members kept stating that some of my accounts were down because of the script I was selling.

But they were wrong I was testing other scripts and manual betting on them thats the only reason they were down

So now I am going to prove they work by making this thread and showing you all the truth to it all as I have nothing to hide.

Right this is what this challenge is....

To get all of my accounts that are negative positive with my new script that I made last week.

Dex account is positive

BlackShadow_Test I am working on now it was 400k down now its 200k down meaning I have won 200k bits in the last 24 hours.

So when I win another 200k + it will be positive.

My scripts pause when the low numbers come in

So most of the time if a really high number comes in anything over 20 the next number is nearly always a 1.00 - 1.09 but my script will stop before.

(Jun 7, 2016 03:37 AM)Black Shadow Wrote: [\[CITE\]](#) Right this is what this challenge is....

To get all of my accounts that are negative positive with my new script that I made last week.

Dex account is positive

BlackShadow_Test I am working on now it was 400k down now its 200k down meaning I have won 200k bits in the last 24 hours.

So when I win another 200k + it will be positive.

My scripts pause when the low numbers come in

So most of the time if a really high number comes in anything over 20 the next number is nearly always a 1.00 - 1.09 but my script will stop before.

If you read [this](#) forum post about how the bust for each game is created then you will see that it is created completely pseudo-randomly; that is that on any bust the next bust has an equally likely chance of being any number between 1 (instant bust) and the game limit.

How does this corroborate your theory?

rather not do it since gambling can get you addicted, and look what happened to you, you went negative on several accounts, are down majorly in profit, and now, are trying to prove to others how your script works.

I wonder, what will happen when the day comes all of these accounts will hit positive? Will you go and scramble around for another extra buck, and attempt to sell your script again? Who knows.

But I mean, yeah I guess I couldn't copy the script that, if it loses 3 games in a row it stops for 20, then continues... seems pretty difficult. ?

There is not. The script would be huge to get the whole Algo to work. I think ryan has a system in place to pick up the scripts and suddenly makes them lose it all.

Yes I am now on the 2nd to last account, this is my main account BlackShadow it was 600k down so a bit to go with this one.

I left it running all night while I slept but it must have bust out 3 times shortly after I went to bed. Not to worry though I have reset it and started again.

Thats the thing with bustabit it can run it for an hour a day or even a week on full autopilot you just have to be lucky I guess.

I just made a really bad mistake by putting on a 350k bet that should of been 35k and let it run to long.

I need to concentrate more there was just 1 zero to many that fucked it completely.

Now I will have to start over again but 800k to recover ?????

(Jun 10, 2016 07:04 AM)Shorta Wrote: [\[CITE\]](#) no, you're just a fucking liar, you keep doing manual bets whenever your script backs down, which it apparently do a lot, also both of your fucking accounts is in minus.

The one you got to positive is now in deep minus again? the fuck? <http://prntscr.com/beptos>

The one you are going with now "-600K" on page it's like "-900K" the fuck?

Fuck off with your bullshit lies and just fucking dump this website already, it's lost you more respect, money, and honor then anything else.

Why are you so mad this is my problem NOT YOURS , this is my challenge NOT YOURS its not over yet I did say a month in the OP.

Just because its down now means nothing I SAID 1 MONTH!!!!

(Jun 10, 2016 07:11 AM)Nice Net Bro Wrote: [\[CITE\]](#) Your script is bull fucking shit just quit it already man if you lose its always manual this bla bla bla ur full of shit

I will never quit if I quit now I lost the challenge.

I am doing a semi auto pilot method using the script that involves manual betting.

Yes it lost again but this is gambling I have never said its 100%.

I did mention in the OP on how I am doing this challenge.

I have noticed a pattern only this morning when and how BAB wipes all over the scripts out. Just keep watching I will do this.

240K is nothing, I see people losing double that on a daily basis.

Black Shadow - June 13, 2016, 4:31 pm

Just sorted out the BlackShadow_Test account now to get back onto the BlackShadow account

Its now 3.00 AM now on the 13/06/2016

Good day yesterday I managed to win 1 BTC

Still running the BlackShadow account only 400k left to get positive.

Just started running the BlackShadow account again about 2 hours ago and got it to the 300s... not far to go now.

The script is working well now with my method its 5.00 PM and just 140K left I can then start on the last account today I hope.

The BlackShadow account is now positive its 6.00 PM ON 13/06/2016 I will move on to the last account soon.

I am a fucking idiot left the script run by mistake on a 6k basebet it was meant to be 2 loss but I did not delete the 4 before it and lost 500k ???

I managed to make back the 500k and more and now thats the BlackShadow account now finished with a nice profit today.

Today's profit

Its just turned the 14th June and I reckon I will complete this challenge today.

Looks like you're in the green now ;)

Rubixa - June 13, 2016, 8:07 pm

All accounts are in the green, good work!

Yes like I said it would I had \$20 on Friday now look + 500k bits still in my bankroll ?

Edit: I am soooo tired now so just going to leave this bot running on low settings while I sleep then conclude this later.

Check out the progress here

Not really marketing as I just wanted to prove my point to all the disbelievers that said it couldn't be done.

Or more to the point my scripts are BS they said... I like to prove people wrong.

.Reef - June 14, 2016, 1:03 am

Good stuff man. I was rooting for u non-publicly the whole time. Happy b day as well mate.

Black Shadow - June 14, 2016, 4:38 am

Thats it completely finished the challenge and all testing.

Bad times

There was 3 times I lost 500k - 600k

Good times

I won it all back

Overall winnings

Around about \$1500 ?

Around about \$1500 ?Are you serious? You are selling that script for \$1000? This is probably the 5th thread I have seen and they all end up with a negative balance.

No \$100 and none of these accounts are of negative balance.

To be honest I have pulled sales now as not sure what to do.

The script works well but I think a bot would be a better option.

All betting scripts are rendered useless when the coders find your pattern.

It is knowing the correct time to put on the bet that matters.
