?n?ny???? When i posted about hawkEye Reborn Keylogger Issue on Ispy tread you complain  
about it.

it is getting over a month now i keep waiting for the new updates but yet not out. you started right  
from time selling the two keylogger. You now abandon it,continue selling your Ispy keylogger and  
keep on updating Ispy keylogger all the time.  
when i post on HawkEye tread no one reply. ????????†? (HawkEye Products) have more buyer.

You have to know that all your Ispy buyers is from HawkEye keylogger.  
Please, treat us that using HawkEye Reborn keylogger, the same way, you treat Ispy users And updates HawkEye Reborn As you said before.

Your Ispy & HawkEye Reborn keylogger is the best in Hackforums.net

All the function you have just Added on Ispy, Please add to HawkEye Reborn As well.

You are the best so far ?n?ny????.

hello.. i need this hawkeye

i need this hawkeye, please how can i get it..

**christocity05** - June 3, 2017, 3:16 am

both hawkeye,iSpy, Gear Infomer and infinity logger has been discontinue.

You all should know that real owner of Hawkeye keylogger with domain name hawkeyeproducts dot com died 2 years ago in a car accident.

all these other guys claiming to be Hawkeye deceived Hawkeye brother and cheated him to steal codes then reprogram and started selling the products to buyers, then when Hawkeye brother FOUND OUT he disabled the server and shutdown

no one should listen to that criminal Michael with Skype username michaelogu6, he is a ripper and he selling old cracked Hawkeye keylogger that does not bring effective logs. check the link below and try to close them up
