Yes. You'd need SMTP and also it does take attachments to inbox (that is; if the attachment is not virus).

This is the best tool. Trust me :)

Imkasumidloke - February 24, 2017, 11:18 pm

Alright. Question.

I see its possible to spoof email and put the email title but what about "Displayed name"? Without this, instead of name, email address will be displayed which isn't look good.
