Thread: [\[FREE\]\[TUT\] INCREASE POINTS IN KINGDOMLIKES RAPIDLY](#)

vellouise - June 6, 2016, 1:14 pm

A trick to get some kinda decent amount of kingdom likes credit everyday within a minute ! Log into your kingdom likes account

[KingdomLikes](#) is a network like Addmefast to gain FB likes, FB followers, Twitter followers etc.

Then open this link: http://kingdomlikes.com/free_points/web-traffic

In your browser on incognito mode in 10 tabs ;)

Then it automatically keeps on loading sites in iframes ! You will be getting credits around 10 credits if u wait for 60 secs !

The trick here if you open that link in 10 tabs for every 60 secs you will be getting $10 \times 10 = 100$ credits in a minute ? !

After sometime it show no more ads come again later you gotta wait to get new ads (or) clear history & open those links again and repeat the process after 3 hrs from different IP !

Cheers enjoy making credits for free ?

Please do leave a feedback if you like the tutorial ?

I haven't received a verification e-mail yet after retrying. Not sure if the servers are loaded or if it's a phish lol

Edit: received

No more free points for web traffic.

Doesn't work. Each tab require you to create a profile and confirm email
