Thread: [\[TUT\] Spreading Method #5](#)

YayHar - June 6, 2016, 3:17 pm

Closing these. Reevaluating my time.

Koopa. - June 6, 2016, 3:19 pm

Damn dude,

You have some nice methods, glad you're releasing them for free.

Purple Kief - June 6, 2016, 3:19 pm

Another one of these, great that you're making these.

Mr HQ right here.

K3njii - June 6, 2016, 3:21 pm

Very interesting and creative method. I wouldn't say that they won't suspect anything though.

Anyone who needs a spreading method should definitely try this though.

A NEW ERA... - June 6, 2016, 3:23 pm

Cool ass method, for sure never clicking another photo sent from skype ever again. Creative as FUCK man, these spreading methods get better and better every day.

Plexcoo - June 6, 2016, 3:27 pm

Definitely saving this thread. Thanks for the HQ method.

VirtualMon3y - June 6, 2016, 3:47 pm

Yayharn is rocking with these spreading methods. Nice little engineerin trick right there.

Enigma brother! ?

kwebber321 - June 6, 2016, 4:40 pm

still learning, what do you mean by hosting?

YayHar - June 6, 2016, 4:43 pm

ok thank you for the tips. could i add you on skype if anything?

blazelord - June 6, 2016, 6:10 pm

thanks for this method wud try this soon .. :)

Page - June 6, 2016, 6:11 pm

That'll work very nicely! Friendly of you to share those methods for free man. You could've potentially made some cash by selling!

I Roll the Nickles - June 6, 2016, 6:19 pm

Great share bro, can really use something like this. I see you have spreading method #5 in your thread name. I be sure to look up your other threads :)

mrspecterhimself - June 7, 2016, 1:27 am

Thanks for sharing those awesome methods...definitely going to try some of them out :)

YayHar - June 7, 2016, 4:21 am

I'm glad you guys appreciate this ;D

If you have any requests on some ting for me to work on, let me know, I'll be happy to try and figure it out

Zarokee - June 7, 2016, 4:39 am

Great method! Thank you for this :D

President Morty - June 7, 2016, 4:48 am

The thing about this is that most of the pedos don't know how

Auto Downloader for the site? Just visit the site and it runs.

I don't understand your question

DI?E - June 7, 2016, 7:12 am

Nice share. Unique. Thanks for the share. Keep it up. Hitting you with some green for this.

Yes, upload the script and the stub. where it says stub directory, put the location of your stub on the site

Don't see why not

kwebber321 - June 7, 2016, 5:19 pm

I really dont know what im doing wrong here. Followed everything and your tips but nothing. my Skype is Kwebber321

?Criminal - June 8, 2016, 11:25 am

A better variant of this method I used in the past was sending a folder to the victim with a .jpg and a .txt file with an obfuscated command that can be parsed via cmd.exe, so when the victim enters it into cmd it would rename the .jpg to a executable file format, run your payload and the target would be none the wiser, it's alot more potent and effective then this method but I could see this being used as a starting out spreading method then spicing it up, APT groups used to use methods like I mentioned, another one to evade AV was splitting malware into multiple exe files then when the target ran a certain script it would combine all the exes into one and run it, it was called the splicing technique pretty smart.

Armada - June 8, 2016, 11:41 am

FINALLY I got an opportunity to give this a read, to no surprise fantastic information like always from OP.

Nice share man, sorry it took me so long to get around to this one.

I've seen the folder one before, but some people don't like to download zips. From personal experience people will change it to .scr.

I'll make a spreading method with the zip technique later.

Yeah, i need to be more careful from now on.

Nighterance - June 20, 2016, 12:15 am

If they open file.jpg, do they still get infected or they need to put it as .scr?

They need to make it a .scr

Fapplagesia - June 20, 2016, 9:57 am

YayHar should get an award for most creative fuck on the RAT section, another great guide dude!

Coletheon - June 20, 2016, 1:08 pm

Correct me if I am wrong but do we need the hosting? Can we not just use a direct download link in the script?

Coletheon - June 20, 2016, 1:17 pm

(Jun 20, 2016 01:15 PM)YayHar Wrote: [\[CITE\]](#) Alternatively you don't need to use hosting, you could just skip the whole fake admin thread thing and just say "I have a free texture pack".

You'd get less installs, but it could work if you don't have the money for hostingThis is your skype spreading method not the texture pack method ???
