Thread: [University Student Offering Professional Graphics - All types!](#)

Impact - June 7, 2016, 7:18 am

Hey I'm currently at college studying Web Design, 3D modelling, Animation and general Graphic Design!

[behance.net/elmos](#)

I'm willing to do anything design related no matter how big or small the project.
I like a challenge.

Portfolio: [behance.net/elmos](#)

What I can provide:

- Thread Design
- Website Design
- Backgrounds for phones, tablets, computers etc..
- Logos
- Banners
- Advertisements
- 3D work (game design, modelling, banners)

I've missed a lot on that list, but I able to do pretty much anything.

If you want to contact me either by reply on this thread, pm me or add my skype: Ninjawebb and say you're from HF.

Prices obviously vary depending on what you need doing. As I'm a student I'm not charging a lot!!!

Thanks for reading, hope this helps!

This isn't the correct section for paid graphics work, although there happen to be a few shops here.

Post here: [Graphics Market](#)

And put some effort in your shop. You aren't going to stand a chance against other paid graphic designers here if all you do is put a link to your portfolio and say hmu.

You should make a thread design for it. Refer to the link in my last reply, there are a few shops there that you could get the idea from, of what I'm talking about.
