Thread: [C# Decrypt Chrome Passwords ?](#)

ov3rf10w. - June 7, 2016, 8:44 am

Hi!

I know there is a file called Login data in C:\Documents and Settings\<username>\Local Settings\Application Data\Google\Chrome\User Data\Default

Does anyone have idea how to decrypt the passwords file via SQLite.dll or any other way ? Thanks!

GuRuHaX - June 7, 2016, 9:50 am

I think this is what your searching for.

http://raidersec.blogspot.be/2013/06/how-browsers-store-your-passwords-and.html#chrome_decryption

?

The passwords are encoded in SQLite 3 format; I use a library for this called Chromium, I acquired it through a friend although I'm not sure where it actually is online. ?
