Thread: [Basic UDP Flooder](#)

President Morty - June 8, 2016, 5:17 am

Hello everyone i'm just posting a basic UDP flooder that uses your connection as the beginning of little projects that i'm going to be working on

Download: <https://www.mediafire.com/?51v9rcbp371jb8a>

Where is thousands of these udp flooders in the internet, you could atleast add something new. I gues its made with VisualBasic, where is thousan websites where you can find souce code of it. Even if you made it still VB made tools wont hit hard because of its limits. Also to make it usefull u could make extra options like witch port use to launch attack, randomize data and etc.
