Thread: [CloudFlare Blocks While Posting or Editing](#)

Omniscient - June 8, 2016, 7:21 am

I'll start trying to configure the Firewall for less blocks while posting or editing but I will need members to assist by providing their RayID when it happens.

The RayID is at the bottom of the block page. DO NOT SEND ME SCREENSHOTS. I want it in text form only please.

Here is an example of the block page which unfortunately the member didn't include the rayID.

<https://i.imgur.com/7DBKbYv.jpg>

I'll try to adjust the firewall so that this occurs less.

Cryptic™ - June 8, 2016, 7:22 am

This has been so annoying, happened to me yesterday. Going to replicate it and send you the rayID shortly.

Edit: Sent RayID via PM

illuminati? - June 8, 2016, 7:23 am

Thanks for letting us know.

If I have this issue again, I'll send you the rayId.

Michael - June 8, 2016, 7:25 am

Seems like a lot of users are having this issue lately indeed.

Good to know you're working on this so this will not occur as much as before.

Omniscient - June 8, 2016, 7:26 am

RayID allows me to lookup the actual block in Cloudflare which will provide me the exact rule being triggered. I can then decide if I want to turn that rule off and what adjustments I can realistically make without reducing our security too much. Some of Cloudflare security is redundant to what I already run on HF. Plus I already know we're secure from SQLi and XSS at least for right now.

One concern is when we upgrade to MyBB 1.8x. Likely I'll enable all rules at least for a short time.

I'll try to do a better job of cataloging my custom edits to the rules. Cloudflare has literally hundreds of toggles right now to enabled/disable. During the fake dump I had all rules enabled. Undoing that is going to be a bitch.

Armada - June 8, 2016, 8:02 am

You want this on every event, or only once?

Does the ray ID change at all?

Ive PMed you about this previously, will gladly provide what I can to help fix it, its damn annoying.

RumbleFrog - June 8, 2016, 8:04 am

If I encounter this issue, I will send you the ray id.

TheWHO? - June 8, 2016, 12:53 pm

Should I private message you the ray id, or just post it here?

Nasyr - June 8, 2016, 1:01 pm

I've been offline today, hopefully this issue has been partly resolved but if I get any blocks I'll send ID's.

Im gone brah - June 8, 2016, 2:21 pm

Finally! I'll be sure to send you some ray-id's lol.

Mr. WAVES - June 8, 2016, 6:43 pm

Let me try some XSS:

Code BLOCKED(2b00e4f424b33fcb): <[]ript >alert('123')</ st > Let me try some XSS:

Code BLOCKED(2b00e4f424b33fcb): <[]ript >alert('123')</ st >

Blocked2: < s..cr..ipt> (no dots, no space)

Blazin - June 9, 2016, 10:08 am

As soon as I come into this problem I'll throw you the RAYID boss.

AK81 - June 9, 2016, 10:10 am

Who is ray and why do you want his ID?

OT: I do get these quite often, especially when sending PM's that quote lots of links.

Good Luck - June 9, 2016, 10:14 am

I sent this to omni yesterday, Thank you so much for creating a thread about it omni. <3. I had a lot trouble editing my thread yesterday and this literally happened 30-40 times throughout the day.

I did not send the rayID as I did not know if That's what I should have sent instead.

Thank you for the update omni.

Omni I might have a possible lead for this check pm

C Doubt - June 10, 2016, 3:44 pm

thats cause there on a vps and usually i have hte same thing but there's just a captcha i have to fill out and im in

Black Shadow - June 10, 2016, 4:05 pm

I have been getting these a lot lately but cant send you a PM as I am your blocked list.

Any chance you can take me off it and I promise not to bother you if its not important.

I know I wont as I give you permission to rekill me if I do and believe me I dont want that.

Come Omni everyone deserves a second chance.

Nysta - June 10, 2016, 4:06 pm

Is this dude serious? Lmfao

labroca - June 10, 2016, 9:21 pm

Good luck Omniscient, I know you will step into the right path to unfold a better community.

you could run a country god damnit

I really like how you take the time to explain stuff, it makes for a good environment.

[\$(5)\$] - June 14, 2016, 3:57 am

I'm glad to hear that this is being worked on! I've actually just sent you a private message with a ray ID of an error I've been having. Thanks in advance for the assistance.

AnonNinja - June 14, 2016, 10:27 am

Spoiler ([Click to View](#))

I keep getting this when i'm trying to PM you
CloudFlare Ray ID: 2b2f7c27694e2cae

iKinky - *June 29, 2016, 5:53 am*

RayID - 2ba9819c582c094a

Do you need the function named that causes it?

Talu - *June 29, 2016, 6:26 am*

This happened to me twice a couple days when I was posting a lengthy reply, I'll be sure to PM you the next time it happens.

TRAUMA - *July 1, 2016, 9:04 am*

CloudFlare Ray ID: 2bbb0b1ef37a0d13

Thanks man. Trying to update a mega thread and it keeps blocking me.

Kamizuki - *July 1, 2016, 5:59 pm*

Just sent you the Ray ID that I keep getting when trying to edit a thread title.

Omniscient - *July 2, 2016, 2:46 pm*

Closing this for now until I get to the firewall rules.
