Thread: [How to Copy and upload content multiple sites to one site automatically](#)

seawolve1 - June 8, 2016, 7:10 pm

What are solutions for a website where we post the content automatically from another websites?

Example:

I have a website Example.com where I want to post breaking news, articles, tweets, from sites like ESPN, UFC, etc... automatically. Kind of like a fire and forget missile.... How difficult would this be? Has anyone tried something like this? I looked on Google however I didn't find a good example of what I want to do. Any advice would be greatly appreciated! Thanks in advance!

Very simple, its called RSS. Go and search it on google, it should help you alot. You just setup and rss feed on your site, and select sources etc

You could use a Wordpress with some plugin like this one to get it done:

<https://fr-be.wordpress.org/plugins/rss-post-importer/>
