Thank you, Ik my thread looks like cancer and makes my shop look very LQ, but my designs are differently worth the prices.

lets expose you, <http://xjbutera.wix.com/jbsdesigns#!portfolio/cwvn> server icons are stole from woodpunch <https://woodpunchsgraphics.com/collections/server-icons/products/new-tnt-server-icon> this as n example, all you have on your port are on this shop. Banners the half are not yours, and if they are 80% of them are templates from spigot with a bit of modified animation. Also battlecraft one its not made by yours, the .ae got leaked ages ago. will take here the designer if needs. Some of the banners you say that are yours, they arent yours because files got leaked. But the most important thing its that you stole server icons from woodpunch. So devouch, if need more proof i can bring more.
